DEPARTMENT OF AGRICULTURE ENGINEERING

15UAG911 – Agriculture Economics and Farm Management

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development.

- Flipped learning, flipped classes were taken to the students about the economics and management of farm , making and implementing of the decisions involved in organizing and operating a farm for maximum production and profit. Farm management draws on agricultural economics for information on prices, markets, agricultural policy, and economic institutions such as leasing and credit. This makes the students enlighten the business principles and practices of farming with an object of obtaining the maximum possible return from the farm as a unit under a sound farming programme. This develops their skills of maximizing the crop yield by maintaining a good eco system. This enriches their decision making skills that would also help them to get a good job opportunity.
