**DEPARTMENT OF AGRICULTURE ENGINEERING**

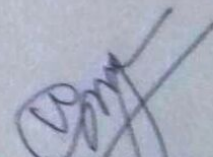

**19UAG301 – UNIT OPERATIONS IN AGRICULTURAL PROCESSING**

**Activity Supports Employability/Entrepreneurship/Skill Development**

The following activities are conducted in the course for the students to support Employability and Skill Development.

- Problem solving session in that students were given problems to find out the characteristics of a particular product. This would help them in identifying the specific character of any particular product which mostly helps us to find the properties of food and agricultural materials. This would help them to improve their ideas in quality checking of the products and it improves the knowledge of the students in food and agricultural processing. That would make them more easier while working in an food or agricultural processing industry.
- Industrial visit is to provide an exposure to students about practical working environment. They also provide students a good opportunity to gain full awareness about industrial practices. Through industrial visit students get awareness about new technologies. Students can observe and learn as to how theoretical concepts are put to into action, thereby aiding their practical learning. This improves their practical knowledge about the subject and to work efficiently in an industry.
