DEPARTMENT OF AGRICULTURE ENGINEERING

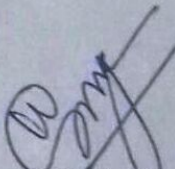

19UAG404 – SURVEYING AND LEVELLING

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Field work the students were taken to field and they were given a particular area to a group of students and find the area of that field and level the field. This would help them to prepare a field and find the area of the field. This helps them to understand the subject clearly and develop their levelling skills. This improves the planning skills of the students. This would greatly help them in their employment.
- Group assignments activity promotes the teamwork among the students. Problems were given to find the area, elevation and heights etc.. The students are practiced to work in teams to measure the area, elevation and heights. Working in team and measuring skills are developed among the students.
