PULLOOR, KARIAPATTI – 626 115.

DEPARTMENT OF BIOMEDICAL ENGINEERING

Hospital Management (15UBM701)

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Brain writing activity In this approach, students are given time to come up with their own ideas individually before sharing them out loud or posting them to an online whiteboard or other shared platform. Building in space for individual reflection leads to better ideas and less groupthink. Brain Writing combines individual work with team. The students write the ideas individually. After the process of brain writing is done, the students evaluate and discuss the ideas in groups. It will help them in generating more ideas in writing as they combine their ideas with others ideas.
- Group Assignment promotes the teamwork among the students. Group assignment is given in Human Resource Department in Hospital. The students are practiced to work in team to provide the solution for the hospital issues in behalf of HR given to them. Working in Team and programming skills are developed during this activity.
