(An Autonomous Institution] Accredited with 'A' Grade by NAAC)
PULLOOR, KARIAPATTI – 626 115.

DEPARTMENT OF BIOMEDICAL ENGINEERING

Human Assist Devices (15UBM702)

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Visualizing is an important reading strategy that would help the students to create images or videos in their minds to represent the ideas that they study in the concept. The images that they make help them to understand what they are reading at a deeper level. One way to introduce the idea of visualizing is to take your students on a virtual trip in their minds. This technique is very important for creativity of students.
- Hospital visit (Industrial Visit) is to provide an exposure to students about practical working environment. They also provide students a good opportunity to gain full awareness about hospital practices. Through hospital visit students get awareness about new technologies. Students can observe learn as to how theatrical concepts are put into action, thereby aiding their practical learning. This improves their practical knowledge about the subject and to work efficiently in an industry or hospital.
