

**DEPARTMENT OF BIOMEDICAL ENGINEERING**

**Activity Supports Employability/Entrepreneurship/Skill Development**

**SUBJECT CODE WITH NAME - 15UBM905 Drug delivery systems**

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Brain storming session - Students are encouraged to come up with their own ideas individually before sharing them out loud or posting them to an online whiteboard or other shared platform. Building in space for individual reflection leads to better ideas and less groupthink. Brain storming improves active learning of individuals to work with team. The students discuss the ideas individually. After conducting brain storming session, the students evaluate and discuss the ideas in groups. It will help them in generating more ideas in thinking as they combine their ideas with others ideas.
- Group Assignment promotes the teamwork among the students. Group assignment is given in various drug delivery systems in healthcare industry. The aim of group work is to enable the students to undertake more detailed and comprehensive projects leading to deeper learning. This is achieved through the combined talents of group members contributing knowledge, skills and ideas.
