## DEPARTMENT OF BIOMEDICAL ENGINEERING

### Biomaterials (15UBM908)

#### Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Visualizing is an important reading strategy that would help the students to create images or videos in their minds to represent the ideas that they study in the concept. The images that they make help them to understand what they are reading at a deeper level. One way to introduce the idea of visualizing is to take your students on a virtual trip in their minds. Visualization enhances attention because it keeps the students focused on the subject matter. When students visualize the content of a lesson or a passage that they are reading, comprehension increases dramatically. This technique is very important for creativity of students.
