PULLOOR, KARIAPATTI – 626 115.

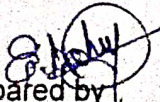

**DEPARTMENT OF BIOMEDICAL ENGINEERING**

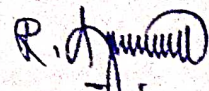

**Rehabilitation Engineering (15UBM915)**

**Activity Supports Employability/Entrepreneurship/Skill Development**

The following activities are conducted in the course for the students to support Employability and Skill Development,

Group Discussion activity helps the students to know more about the recent invention on rehabilitation devices. Group discussion leads to generate many thought-provoking questions regarding the topic. It helps students focus on a topic and to compare their point of view with that of others. Talking Points are easy to read so that students can concentrate their thinking on the subject under discussion. Students in discussion share their personal experiences and understanding. When many students discuss a topic, they also devise answers to those thought-provoking questions. Confidence level of a students show up in a group discussion. It is assessed that how confident students are, while putting up their opinion in front of others.
