DEPARTMENT OF BIOMEDICAL ENGINEERING

Pathology and Microbiology (19UBM405)

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Students took seminars in the topic of "Cancer: sources and solutions". The students are presenting the social problem and the solution and during presentation, students are sharing their ideas to control or prevent cancer related issues, and causing factors. Group discussions have been suggested for students to bringing the solution like preliminary study of cancer, mini-project and they focused on cancer detecting devices. This additional facilitates will improve the ability of the students.
- Students are suggested to report group assignment regarding cancer issues, source of carcinogens and different types of cancer problem. The students are practiced to work in team to provide the solution. Working in Team and thinking skills are developed during this activity.
