DEPARTMENT OF BIOMEDICAL ENGINEERING

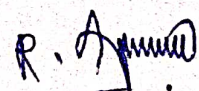

Pathology and Microbiology Laboratory (19UBM409)

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course for the students to support Employability and Skill Development,

- Students are encouraged to do mini-project or case study about bleeding disorder and cancer studies. The students are presenting their reports and the solution. During presentation, students are sharing their ideas to control or prevent cancer related issues, and causing factors of bleeding disorder and solutions. Group discussions have been suggested for students to bringing the solution like preliminary study of cancer, case study of bleeding disorder. This additional facilitates will improve the ability of the students.
