Activity Supports Employability / Entrepreneurship / Skill Development
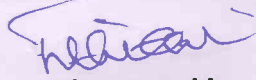

Subject Code: **15UCS508**

Subject Name: **CASE TOOLS LABORATORY**

Students practice with many real world problems as mini projects enhances their problem solving and programming skills.

When the students are improving their skills that will provide the employability as the students can solve any real world problem.

. They make use of one or more existing application programming interfaces (API). This allows them to gain practice in using specific objects, as well as learning that much of their future. As the students have complete knowledge of the full project they can also be an entrepreneur. This will also increase entrepreneurship.
