DEPARTMENTOF COMPUTER SCIENCE AND ENGINEERING

Activity Supports Employability/Entrepreneurship/Skill Development

Subject Code: 15UCS706

Subject Name: CLOUD COMPUTING LABORATORY

The following activities were conducted in the course for the students to support Employability /Skill Development

Most of the organizations are now moving into cloud computing for the storing the data and accessing the various types of services offered by the cloud service providers. It's been a great opportunity for the students to excel themselves in the field of Cloud computing.

With cloud tech services estimated to be up by 17.3% this year and 90% of business set to use cloud tech by 2022, having the skills and abilities necessary to join the cloud service industry is an increasingly relevant skillset for many job seekers.

Being a relatively new technological territory, it requires anyone looking to find a job within cloud technology to keep up to speed with essential skills for making cloud computing as efficient as it can be.
