

## **15UGS531-Soft Skills and Communication Laboratory**

A group discussion is a group of individuals, gather at one place in the form of a circle with similar interest to share the ideas, solve problems or give comments. In simple terms, a group discussion is well known as GD. Generally, the group discussions are performed to assess the skill set of a person which includes communication skills, leadership skills, managing skills, team building skills, social skills, problem-solving skills and presence of mind. At last, the rating is given on a scale of 1 to 10.

When a topic is given just think over it; under which category the topic is. It might be related to life, current affairs, technology, political news and any other trending topic in the market. So, think about the topic and frame the sentence in your own words to speak. When you are speaking you need to agree or disagree with the other points and you need to give a proper reason to it. But, don't deviate/ mislead from the topic. Make others also speak & give chance to them to put the points into the discussion.

Through this Laboratory the students can improve their communication and Entrepreneur skills and also they can enhance their skills like

1. Grooming (appearance)
2. Be a good listener & support or add to the other points. (But don't interrupt in middle)
3. Speak loudly and clearly.
4. Try to be the first and the last speaker of the discussion.
5. Be confident while speaking (analyze with numbers if you know & it has to be fact).
