DEPARTMENT OF INFORMATION TECHNOLOGY
Accredited By NBA, New Delhi

Activity Supports Employability/Entrepreneurship/Skill Development
Sub Code/Name:15UIT601-Cryptography & Network Security

The following activities are conducted in the course for the students to support Employability and Skill Development,

Visualization is a method of conveying information through images, diagrams, or animations. Visualization techniques have been used since the dawn of time, as evidenced by primitive drawings on buildings and monuments. Technology has made visualization a tremendously informative and simple to use technique. Computer models are rapidly becoming a crucial component of current scientific research.As a Result of this Students will be able to explore more Job opportunities.

Mind Mapping is a diagrammatic representation to organize information visually.It is frequently built around a single concept, which is drawn as an image in the center of a blank page and to which are added linked representations of concepts such as images, words, and sections of words. Other ideas branch out from the key ideas, which are linked directly to the central concept.Most effective uses for mind maps is to summaries their Ideas in an easy manner.
