DEPARTMENTOF INFORMATION TECHNOLOGY

Activity Supports Employability/Entrepreneurship/Skill Development

The following activities are conducted in the course "15UIT707- Image Processing Laboratory" for the students to develop Skill development.

Hands on experience through lab experiments helps to improve the programming skills. It supports the students to develop their own programming skills. This lab component delivers valuable solutions related to their scenario. Students are also able to work with recent modern tools that could improve their skill development.
