Pulloor, Kariapatti – 626 115 (An Autonomous Institution)

DEPARTMENT OF CIVIL ENGINEERING

B.E Civil Engineering
Curriculum & Syllabus
Regulation 2021[Batch – 2022-2026]
Choice Based Credit System

Approved in the Academic Council Meeting on 20.05.2024

Chairperson / BoS

Chairman Academic Council

SETHU INSTITUTE OF TECHNOLOGY

Pulloor, Kariapatti – 626 115

(An Autonomous Institution)

DEPARTMENT OF CIVIL ENGINEERING

Department Vision statement

To achieve excellence in technical education and research in Civil Engineering field for the betterment of the society.

Department Mission Statement

- **1.** Fulfilling the aspiration of the students by providing quality technical educational experiences to meet the needs of the industry.
- 2. Providing comprehensive learning environment
- 3. Imparting employability and entrepreneurial skills
- **4.** Establishing industrial collaborations
- 5. Promoting Research and Development activities in emerging areas of Civil Engineering
- **6.** Serving the society through quality education, technology and consultancy

Program Educational Objectives (PEOs)

Afterfewyearsofgraduat	AfterfewyearsofgraduationourMechanicalEngineeringgraduatesareexpected to:										
PEO I	Demonstrate expertise in offering solutions in civil Engineering field (Core Competence)										
PEO II	Exhibit professional skills to function effectively with ethical principles.(Professional and Ethical Skills)										
PEO III	Engage in perpetual learning and research with social responsibility.(Lifelong Learning)										

PROGR	AM OUTCOMES (POs):
1.	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2.	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3.	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and Environmental considerations.
4.	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5.	Modern tool usage: Create, select, and apply appropriate techniques, resources, and Modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6.	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7.	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8.	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9.	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10.	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11.	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12.	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
PROGR	AM SPECIFIC OUTCOMES (PSOs):
The Civi	l Engineering Graduates will be able to:
1.	Design, Create and maintain safe and cost effective Structural systems
2.	Design Hydraulic and Water supply systems with environmental concerns for sustainable development

B.E. CIVIL ENGINEERING CURRICULUM -Regulations 2021 [Batch – 2022-2026]

MATRIX AND CALCULUS (Common to All Branches-Except CSBS)

L	T	Р	С
3	1	0	4

Course Learning Objectives:

- To make the students capable of identifying linear equations based problems (Eigen Value) from practical areas and obtain the Eigen value oriented solutions in certain cases.
- To widen the students' knowledge base on linear algebra, growth rate computation and application of integrals.
- Able to integrating various types of functions using various integration methods.
- To familiarize the students with the basic rules of differentiation and use them to find derivatives of products and quotients of functions.
- To apply these mathematical concepts (matrix theory, differentiation and integration) in engineering field.

Unit I MATRICES 8 + 3

Eigen value and eigenvector of a real matrix – Characteristic equation – Properties – Cayley- Hamilton theorem (excluding Proof) – Orthogonal reduction – (transformation of a symmetric matrix to diagonal form) – Quadratic form – Reduction of quadratic form to canonical form by orthogonal transformation..

Unit II DIFFERENTIAL CALCULUS

9 + 3

Introduction – Definition of derivatives – Limits and Continuity – Differentiation techniques (Product rule, Quotient rule, Chain rule) – Successive differentiation (nth derivatives) – Leibnitz theorem (without proof) – Maclaurin's series – Physical Applications (Newton's law of cooling– Heat flow problems, Rate of decay of radioactive materials - Chemical reactions and solutions, Ohm's law, Kirchoff's law – Simple electric circuit problems).

Unit III FUNCTIONSOFSEVERAL VARIABLES

9 + 3

Partial derivatives – Euler's theorem for homogenous functions – Total derivatives – Differentiation of implicit functions – Jacobian – Taylor's expansion – Maxima and Minima – Method of Lagrangian Multipliers.

Unit IV INTEGRAL CALCULUS

8 + 3

Definitions and concepts of integrals – Methods of integration (Decomposition method, Substitution method, Integration by parts) – Definite integrals – Properties and problems – Reduction formulae – Beta and Gamma functions

Unit V MULTIPLE INTEGRALS

8 + 3

Double integration – Cartesian and Polar coordinates – Change of order of integration – Area as a double integral - Change of variables between Cartesian and Polar coordinates – Triple integration in Cartesian coordinates – Volume as triple integral.

SUPPLEMENT TOPIC (for internal evaluation only)

3

Evocation /Application of Mathematics, Quick Mathematics – Speed Multiplication and Division Applications of Matrices.

TOTAL: 45 (L) + 15 (T) = 60 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the basic concept in Matrix, Differentiation and Integration. ()	Understand
CO.2	Analyze functions using limits, continuity, derivatives and to solve Physical	Analyze
00. 2	application problems.

21UCY1	O6 CHEMISTRY FOR CIVIL ENGINEERS	L	Т	Р	С
	(Civil Engineering)	3	0	0	3
Course Le	arning Objectives:				
• To	explain the boiler feed water requirements related problems and water treatment t	tech	nique	es.	
• To	mpart the knowledge on basics and applications of spectroscopy.				
• To	explain the principles and applications of corrosion.				
• To	explain the applications of refractories, ceramics and cements				
Unit I	WATER AND ITS TREATMENT TECHNOLOGIES				9
Hardness of	of water – types – expression of hardness (Problems) – units – estimation of ha	rdne	ss of	wate	r by
EDTA – bo	oiler troubles (scale and sludge) - Internal treatment (phosphate, colloidal, sodi	um	alum	inate	and
calgon con	ditioning) - External treatment - Ion exchange process- zeolite process - desal	inati	on of	brac	kish
water – Re	verse Osmosis				
Unit II	CORROSION AND ITS PREVENTION TECHNIQUES				9
Introduction	n- Definition- Types –Chemical corrosion (Dry corrosion, mechanism ar	nd	its E	xam	ole)-
Electroche	mical corrosion (Wet corrosion, mechanism and its Types - Galvanic & Di	iffere	ential	aera	ation
Corrosion-	Pitting, crevice & Wire fence corrosion). Corrosion prevention				
-Protective	coatings – Paint, Electro plating – Gold plating.				
Unit III	INSTRUMENTATION FOR ANALYTICAL METHODS				9
Spectrosco	py - need and timeline - Beer-Lamberts law - Principle, instrumentation and	арр	lication	ons -	UV-
Visible spe	ctrophotometer- X-ray diffract meter - Atomic Absorption spectroscopy (AAS) -	Sca	nning	Elec	tron
Microscopy	(SEM), Transition Electron Microscopy (TEM)- Gas Chromatography- I	HPL	C a	nd N	lass
Spectrome	try- Principal and application.				
Unit IV	REFRACTORIES, CERAMICS AND CEMENT				9
Refractorie	s: Refractories: definition, characteristics, classification, properties – refractorines	s ar	nd RU	JL,	
dimensiona	Il stability, thermal spalling, thermal expansion, and porosity. Classification acidic,	bas	ic an	d neu	tral
refractories	, manufacture and uses of alumina, magnesite and zirconia brick				
1 lie !4 \/	CERAMICS AND CEMENT				9
Unit V					
	Clays, silica, Feldspars- preparation, properties and uses. Methods for fabri	icati	on of	cera	amic
Ceramics:	Clays, silica, Feldspars- preparation, properties and uses. Methods for fabrimic products; structural clay products, white wares, earthern wares.	icati	on of	cera	amic

TOTAL = 45 PERIODS

special cement- waterproof and white cement properties and uses.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the basic concept of chemistry involved in water treatment methods, corrosion types, instrumental methods and constructional materials.	Understand
CO.2	Apply the properties of refractories, cement and ceramics suitable for building.	Apply
CO.3	Analyze the impurities of water to find its hardness and remove the hardness causing substances.	Analyze
CO.4	Analyze the causes of corrosion, its consequences and methods to minimize corrosion to improve industrial designs.	Analyze
CO.5	Analyse the compounds by using different spectroscopic methods.	Analyze

21UCS10	PROBLEM SOLVING AND C PROGRAMMING	L	. T	Р	С
	(Common to ALL Branches)	3	0	0	3
OBJECTIV	ES:	<u>_</u>		II.	
• To i	mpact the concepts in basic organization of computers and problem s	solving technic	ques		
 To f 	amiliarize the programming constructs of C				
• To 6	explain the concepts of arrays, strings, functions, pointers, structures	and unions in	C.		
Unit I	INTRODUCTION				8
Generation	and Classification of computers – Basic Organization of a Comp	outer – Proble	m for	mulati	on –
problem Sc	olving – Need for logical analysis and thinking – Algorithm – Pseudo c	ode – Flow C	hart.		
Unit II	C PROGRAMING BASICS				9
Introduction	n to 'C' programming – fundamentals – structure of a 'C' progra	am – compila	ation a	nd lir	ıking
processes	 Constants, Variables – Data Types – Expressions using operator 	ors in 'C' mar	naging	Input	and
Output ope	rations.				
Unit III	DECISION MAKING AND LOOPING STATEMENTS				10
If - If else-	nested if else - else - if ladder statement - switch - go to - for -	- while - do	-while	– bre	ak –
continue st	atements – problem solving with decision making and looping statements	ents.			
Unit IV	ARRAYS, STRINGS AND FUNCTIONS				9
Arrays – In	itialization – Declaration – One dimensional and Two dimensional arra	ays – String –	Sting	opera	tions
 string arra 	ays – Function – definition of function – Declaration of function – Para	ameter passing	g meth	ods –	
Recursion -	 Storage lasses – Problem solving with arrays, strings and functions. 	•			
Unit V	POINTERS, STRUCTURES AND UNIONS				9
Pointers –	Definition – Initialization – Pointers arithmetic – Pointers and arrays –	Dynamic Me	mory a	llocati	ion –
Structure w	rith in a structure – Union – Pre – processor directives.				
		TOT	AL :45	PERI	ODS

After the successful completion of the course, the Students will be able to

- Illustrate the basics about computer.
- Develop simple programs using branching and looping constructs.
- Write C program to manage data using arrays.
- Develop programs using functions.
- Write C programs for simple applications.

21UME109	ENGINEERING GRAPHICS	L	Т	Р	С
	(Common to ALL Branches-Except CSBS, CSD and Al&DS))	3	1	0	4
Course Learnin	ng Objectives:				
 To deve 	lop student's graphic skill for communication of concepts, ideas and desig	n of	enai	neerir	าต
	and expose them to existing national standards related to technical drawing		og.		.9
•	rt knowledge in development of surfaces, isometric and perspective projection				
·	ID CONVENTIONS (NOT FOR EXAMINATION)				4
					•
Importance of 0	Graphics in Engineering Applications – Use of Drafting Instruments – BIS	Co	nven	tions	and
Specifications -	- Size, Layout and Folding of Drawing Sheets - Lettering and Dimensionir	ng -	Intro	ductio	n to
Plane Curves, F	Projection of Points, Lines and Plane Surfaces				
Unit I PR	OJECTION OF SOLIDS				12
Draination of air	male colide like prieme pyromide cylinder and cone with cylin is parallel	norr	ondi	oulor	and
•	mple solids like prisms, pyramids, cylinder and cone with axis is parallel,	perp	enai	cular	and
inclined to one of					
Unit II SE	CTION OF SOLIDS				10
Section of solids	s - simple position with cutting plane parallel, perpendicular and inclined to o	ne o	f the	plane	
Unit III DE	VELOPMENT OF SURFACES				10
Development of	lateral surfaces of simple and truncated solids - Prisms, pyramids and cyl	inde	rs an	d con	es -
Development of	lateral surfaces of sectioned solids.				
Unit IV ISC	DMETRIC PROJECTIONS				12
Principles of iso	metric projection – isometric scale – isometric view - isometric projections of	sim	nle s	olids a	and
cut solids.		0	p.0 0	ondo (21.0
Unit V OR	RTHOGRAPHIC PROJECTION				12
Representation	of Three Dimensional objects - General principles of orthographic pro	jectio	on-	Need	for
importance of r	multiple views and their placement – First angle projection – layout views	s – I	ayou	t viev	vs -
Developing visu	alization skills of multiple views (Front, top and side views) from pictorial view	ws o	f obje	ects	
	TOTAL 45 (L) + 15	(T) =	= 60 I	PERIO	DDS

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Draw orthographic projections of basic geometrical entities in various positions and translate the Geometric information of engineering objects into engineering drawings.	Understand
CO.2	Apply the principles of orthographic projections to draw projections of solids and sections of solids	Apply
CO.3	Develop lateral surfaces of regular and sectioned solids.	Apply
CO.4	Prepare isometric drawings of simple solids from orthographic views.	Apply
CO.5	Construct orthographic projection from the given pictorial view.	Apply
CO.6	Analyze the projections of various solid models using different resting conditions.	Analyze

21UME109	PROBLEM SOLVING AND C PROGRAMMING	L	Т	Р	С
	LABORATORY	0	0	2	1
	(Common to ALL Branches-Except CSBS)				
OBJECTIVES:			-		
 To make 	the students to work with office software.				
 To familia 	arize the implementation of programs in C.				
LIST OF EXPER	RIMENTS:				
A) WORI	D PROCESSING				
D	ocument creation. Formatting, Table Creation, Mail merge				
B) SPRE	AD SHEET				
C	hart – Line XY, Bar and Pie, Formula – Formula editor				
C) C PR	OGRAMMING				
	 Programs using simple statements. 				
	 Programs using decision making statements. 				
	 Programs using looping statements. 				
	 Programs using one dimensional and two dimensional arrays. 				
	 Solving problems using string functions. 				
	 Programs using user defined functions and recursive functions. 				
	Programs using pointers.				
	 Programs using structures and unions. 				

COURSE OUTCOMES:

• After the successful complementation of this course, the student will be able to

TOTAL: 30 PERIODS

- Create the document in Word Processing Software.
- Write programs using control constructs.
- Apply functions to reduce redundancy.
- Design and implement C programs for simple applications.

HARDWARE/SOFTWARE REQUIRED FOR A BATCH OF 30 STUDENTS

21UME111	ENGINEERING PRACTICES LABORATORY	L	Т	Р	С
J ! ! !		0	0	2	1
	(Common to Mech, EEE, Civil, Agri and Chemical)	•	•		<u> </u>
OBJECTIVE					
	onstrate the plumbing and carpentry works.				
	the students to perform welding, fitting and drilling operations.				
 To demo 	onstrate residential house wiring, fluorescent lamp wiring, measurement of ea	arth i	esist	ance,	,
Color co	ding of resistors, logic gates and soldering.				
	GROUP A (CIVIL & MECHANICAL) CIVIL ENGINEERING PRACTICE				
LIST OF EXPE					
•	f pipeline joints, its location and functions: valves, taps, couplings, unio	ns, I	reduc	ers,	and
	n household fittings.				
Preparat	ion of plumbing line sketches for water supply and sewage works.				
3. Hands-o	n-exercise: Basic pipe connections-Mixed pipe material connection Pipe	cor	nect	ions	with
different	joining components.				
4. Demons	tration of plumbing requirements of high-rise buildings.				
5. Study of	the joints in roofs, doors, windows and furniture.				
6. Hands-o	n-exercise: Wood work, cutting, planning and joints by sawing -Half lap joint				
MECHANICAL	ENGINEERING PRACTICE				
LIST OF EXPE	RIMENTS:				
 Preparat 	ion of arc welding of butt joints, lap joints and tee joints.				
2. Drilling F	Practice.				
3. Sheet m	etal model making – Trays, funnels, etc.				
4. Different	type of fittings-'V' type, 'L' Type				
5. Study of	Lathe Machine tool.				
6. Study of	Plastic Injection Moulding.				
	GROUP B (ELECTRICAL & ELECTRONICS) ELECTRICAL ENGINEERING PRACTICE				
LIST OF EXPE	RIMENTS:				
a) Resi	dential house wiring using switches, fuse, indicator, lamp and energy meter a	and S	Stair	case	
wirin	g.				
b) Fluoi	rescent lamp wiring.				
c) Meas	surement of resistance to earth of electrical equipment.				
-					

ELECTRONICS ENGINEERING PRACTICE LIST OF EXPERIMENTS: a) Study of Electronic components and equipments – Resistor, colour coding b) Measurement of AC Signal parameter (peak-peak, rms, period, frequency) using CRO. c) Study of logic gates AND, OR, EX-OR and NOT Gate. d) Soldering practice – Components, Devices and Circuits – Using general purpose e) PCB.

TOTAL: 30 Period

COURSE OUTCOMES:

After the successful completion of this course, the student will be able to

COs	CO Statements	BT Levels
CO.1	Illustrate the centrifugal pump, air conditioner, lathe machine tool, molding, operations of foundry and fittings.	Understand
CO.2	Demonstrate the carpentry work and plumping work for a given diagram to complete the work.	Apply
CO.3	Select suitable tools for fabrication of sheet metals like cone, funnel and tray.	Apply
CO.4	Practice the welding and drilling operations for the various structures.	Apply
CO.5	Manipulate the components, Logic gates, soldering practices with help of printed circuit boards (PCB).	Apply
CO.6	Operate the various electronic components and using that for the industrial and housing application.	Apply

EQUIPMENT REQUIREMENT

CIVIL ENGINEERING

S. No.	Name of the equipment	Quantity Required
1	Assorted components for plumbing consisting of metallic Pipes, plastic	5 sets
'	pipes, flexible pipes, couplings, unions, Elbows, plugs and other fittings	
2	Carpentry vice (fitted to workbench)	15 Nos
3	Standard working tools	15 sets
4	Models of industrial trusses, door joints, furniture joints	5 each
5	Power tool rotary hammer	2 Nos
6	Demolition hammers	2 Nos
7	Planer	2 Nos
8	Hand drilling machine	2 Nos
9	Jigsaw	2 Nos

MECHANICAL ENGINEERING

S. No.	Name of the equipment	Quantity Required
1.	Arc welding transformer with cables and holders	5 Nos
2.	Welding booth with exhaust facility	5Nos
3.	Welding accessories like welding shield, chipping hammer, wire brush, etc.	5sets
4.	Oxygen and acetylene gas cylinders, blow pipe and other welding outfit	2 `Nos
5.	Vice	5 Nos
6.	Hacksaw frame and blade	5 Nos
7.	Files	5 Nos
8.	Study-purpose items: Centre Lathe, pattern, cope & drag box and moulding tools	Each 1 No.

ELECTRICAL ENGINEERING

S. No.	Name of the equipment	Quantity Required
1.	Assorted electrical componentsforhouse wiring	15 sets
2.	Electrical measuring instruments	10sets
3.	Megger (250V/500V)	1 No
4.	Study purpose items: Iron box, fanand regulator, emergency lamp	One each
5.	Power Tools: (a) Range Finder (b) Digital Live-wire detector	2 No 2 No

ELECTRONICS ENGINEERING

S. No.	Name of the equipment	Quantity Required
1.	Logic trainer kit	2 No
2.	CRO,AFO	2 Each
3.	Small multipurpose PCBs	10 No
4.	Soldering guns	10 No
5.	Multimeters	5 No
6.	Assorted electronic components for making circuits	Required quantity

	BASIC SCIENCES LABORATORY I	L	Т	Р	С
21UGS113	(Common to All Branches-Except CSBS)	0	0	2	1
OBJECTIV	ES:				
 To creat 	te scientific Temper among the students.				
• To kno	w how to execute experiments properly, presentation of observations	and	d arı	rival	of
conclusi	ons.				
• To view	and realize the theoretical knowledge acquired by the students through expe	rime	nts.		
	LIST OF EXPERIMENTS (Common to All Branches)				
1. Laser – Dete	rmination of particle size and wavelength of Laser source. using Diode Laser				
2. Ultrasonic Int	erferometer - Determination of velocity of sound and compressibility of liquid				
3. Poiseuille's n	nethod - Determination of Coefficient of viscosity of liquid.				
4. Spectromete	r – Determination of dispersive power of a prism.				
5. Air Wedge m	ethod - Determination of thickness of a thin wire.				
6. Uniform bend	ling method – Determination of Young's modulus of the given rectangular be	am.			
	A minimum of FIVE experiments shall be offered				
	TOTAL -	- 30	Perio	ods	
	CHEMISTRY LABORATORY				
Course Learni	ng Objectives:				
 To impa 	rt knowledge on basic concepts in applications of chemical analysis.				
Train the	e students to handle various instruments.				
To acqu	ire knowledge on the chemical analysis of various metal ions				
	LIST OF EXPERIMENTS				
	(Common to All Branches-Except CSBS)				
•	tion of molar and normal solutions of the following substances – Oxa	lic a	icid .	, Soc	lium
Carbona	ate Sodium Hydroxide and Hydrochloric acid				

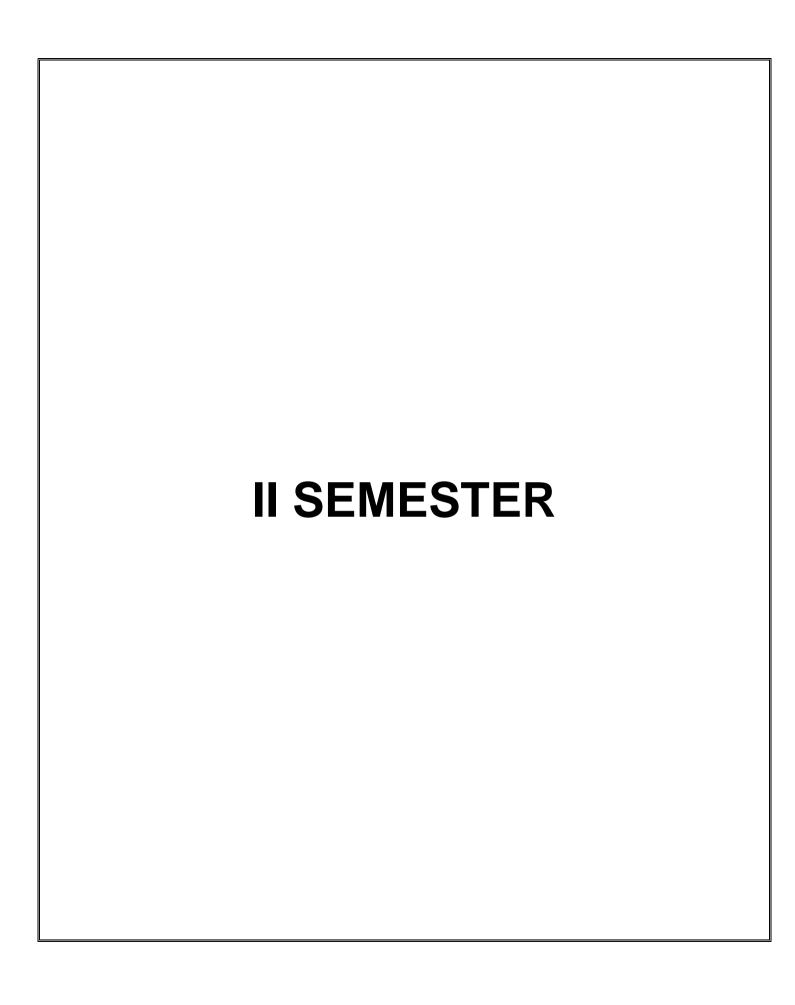

- 2. Conductmetric Titration of strong acid with strong base 3.Conductometric Titration of Mixture of Acids.
- Estimation of Iron by potentiometry.
- 4. Determination of Strength of given acid using pH metry.
- 5. Determination of molecular weight of polymer by viscometry.
- 6. Comparison of the electrical conductivity of two samples-conductometric method.
- 7. Estimation of copper in brass by EDTA method.

A minimum of FIVE experiments shall be offered for every course

TOTAL: 30 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the principles of Optics, Laser physics and Mechanics to determine the Engineering properties of materials.	Apply
CO.2	Apply the knowledge of electrochemical techniques to study various ions present in the industrial effluents.	Apply
CO.3	Apply the principles of spectroscopy to determine the properties using prism.	Apply
CO.4	Apply the knowledge of Molarity and Normality to prepare standard solution for chemical analysis	Apply
CO.5	Analyze the concentration of a given analyte by analytical methods.	Analyze
CO.6	Analyze the given liquid sample to determine the viscosity and compressibility of the liquid.	Analyze

	COMMUNICATION SKILLS FOR PROFESSIONALS	L	Т	Р	С
21UEN201	(Integrated course)	1	0	1	1.5
	(Common to All Branches-Except CSBS)				
Course Learnin	g Objectives:				
- Improvo	their aral evareasion and thought				
-	their oral expression and thought.				
Develop	their confidence and ability to speak in public.				
Develop	their capacity for leadership.				
Unit I SE	F INTRODUCTION & DELIVER A SPEECH BEFORE AUDIENCE	(Tim	e: 5 t	:o 7 m	ninutes)
To Speak in fror	t of an audience with courage.				
Make your me	ssage clear, with supporting material.				
Create a stron	g opening and conclusion.				
Unit II SP	EAK ON THE CHOSEN CONTENT	(Ti	me: 5	to 7	minutes)
Select a general	topic and bring out specific purposes.				
Avoid using no	otes.				
	otes. ideas to develop your ideas				
Use symbolic		(Ti	me: 5	i to 7	minutes)

Total Hours =30 periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Communicate information ideas and opinions in any given situations.	Apply
CO.2	Use language appropriately with clarity and fluency in any given circumstances.	Apply
CO.3	Appraising the audience with clarity of thoughts with leadership quality.	Apply
CO.4	Present the ideas creatively with coherence for given topic.	Apply
CO.5	Evaluate the use of language to provide suggestions for correct usage.	Apply

- 1. Competent Communication- A Practical Guide to becoming a better speaker, Toastmasters International, USA.
- 2. Norman Lewis Word Power Made Easy, Pocket Book Publication, 2019.

041184400	DIFFERENTIAL EQUATIONS, COMPLEX ANALYSIS AND	L	Т	Р	С
21UMA20	TRANSFORM TECHNIQUES (Only for Civil)	3	1	0	4
Course Lea	rning Objectives:			<u> </u>	
	levelop an understanding of the basics of vector calculus comprising of gradient and line, surface and volume integrals and the classical theorems involving them.	t, div	erg	ence	and
	nake the student acquire sound knowledge of Laplace transform and its proper				
expo	sure to the solution of certain linear differential equations using the Laplace transf	orm	tech	ıniqu	e.
Unit I	SOLUTIONS OF ORDINARY DIFFERENTIAL EQUATIONS				8+3
Higher orde	er linear differential equations with constant coefficients - Method of variation	of p	ara	mete	ers –
Cauchy's a	nd Legendre's linear equations – Applications of ODE (Bacterial growth, Pe	opula	atior	n gro	owth,
Decayed pr	oblems).				
Unit II	VECTOR CALCULUS				8+3
Gradient D	ivergence and Curl – Directional derivative – Irrotational and Solenoidal vect	or fi	elds	-Ve	ector
integration -	- Green's theorem in a plane, Gauss divergence theorem and Stokes' theorem (ex	kclud	ling	proo	ofs) –
Simple appl	ications involving cubes and rectangular parallelopiped.				
Unit III	PARTIAL DIFFERENTIAL EQUATIONS				8+3
Formation of	f partial differential equations – Singular integrals Solutions of standard types o	ffirst	orc	der pa	artial
differential e	equations – Lagrange's linear equation Linear partial differential equations of s	econ	d a	nd hi	igher
order with c	onstant coefficients of both homogeneous and non-homogeneous types				
Unit IV	COMPLEX INTEGRATION				9+3
Statement	and applications of Cauchy's integral theorem, Cauchy's integral formula and	Cau	chy	Res	idue
Theorem -	- Taylor's and Laurent's expansions - Applications of residue theorem to evaluate	e re	al ir	ntegra	als –
Unit circle	and semi-circular contour (excluding Poles on the real axis).				
Unit V	LAPLACE TRANSFORM				9+3
Existence	conditions – Transform of elementary functions – Basic properties – Transform of	of de	riva	tives	and
integrals –	Transform of unit step function, impulse function and periodic function - Inverse I	_apla	ice	trans	form

SUPPLEMENT TOPIC (for internal evaluation only)

Evocation / Application of Mathematics.

- Convolution theorem (excluding Proof) - Solution of linear ODE of second order with constant coefficients.

TOTAL: 45 (L) + 15 (T) = 60 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the knowledge of higher order ordinary differential equations in real life	Apply
00.1	engineering problems.	
CO.2	Apply the concept of vector identities in problem solving and evaluate the line,	Apply
00.2	surface and volume integrals.	
CO.3	Apply the knowledge of partial differential equation in solving linear and	Apply
00.3	higher order partial differential equation.	
CO.4	Apply the knowledge of singularities, residues in complex integration.	Apply
	Apply the knowledge of Laplace transform and solve the problems with	Apply
CO.5	periodic function, inverse transform of convoluted function and Ordinary	
	Differential Equation.	
CO.6	Apply the concept of particular integral, scalar potential, poles and periodic	Apply
00.0	function.

21UPH206 **BUILDING PHYSICS (Only for Civil)** 3 0 3 **Course Learning Objectives:** To examine how sound is generated and propagates as a principle for architectural acoustic design. To develop the fundamental research interest in Nano materials. To explore the detailed behavior of new engineering materials. THERMAL INSULATION OF BUILDINGS 13 Unit I Introduction-Thermal conduction, convection and Radiation- Thermal insulation-principles-Heat insulating materials- methods of heat insulation - heat gain and heat loss estimation - factors affecting the thermal performance of buildings -shading devices - central heating- Benefits of thermal insulation **BUILDING ACOUSTICS** Unit II 10 Introduction- Reverberation Time- Sabine's formula- derivation using growth and decay method - Absorption Coefficient and its determination —Factors affecting acoustics of buildings and their remedies -Echoes -Resonance-Noise – Loudness - Factors to be followed for good acoustics of building-Noise control in buildings **NEW ENGINEERING MATERIALS** Unit III 12 Introduction-Metallic glasses- preparation - properties - applications -Shape memory alloys- preparation properties & applications - Characteristics, properties of NiTi alloy, application, advantages and disadvantages of SMA Unit IV 10 COMPOSITESAND CERAMIC MATERIALS Composites - definition and classification - Fibre reinforced plastics (FRP) and fiber reinforced metals (FRM) :Ceramic Materials: Introduction - Classification - Methods of Processing - Slip casting - Isostatic pressing - Gas pressure bonding -Properties - Application. **UNIT V NANOMATERIALS** Introduction tonanomaterials-one, two, three dimensional nanomaterials, quantum dots -Bucky ball- carbonnanotubes -

graphene, Synthesis-Top down approach-Ball milling, Bottom approach –Physical vapour deposition, Chemical vapour deposition, solgel method, Properties; Mechanical, optical, thermal and electrical properties scanning electron microscope

TOTAL - 45 Periods

Application of nanomaterias

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the fundamental concepts of physics which provides foundation for building construction design.	Understand
CO.2	Apply the concept of physics for thermal and sound insulation in building design.	Apply
CO.3	Illustrate new engineering materials and their properties, encountered in civil engineering.	Apply
CO.4	Apply the science of architectural acoustics in building design.	Apply
CO.5	Analyze the effect of new engineering materials, composites and nanomaterials to improve strengthening of building materials.	Analyze
CO.6	Analyze the thermal concepts of buildings to design various building models with reference to climatic changes of environment.	Analyze

C 21UCE204 **ENGINEERING MECHANICS (Only for Civil)** 3 0 3 **Course Learning Objectives:** To impart knowledge on equilibrium of particles and rigid bodies both in two and three dimensions. To help the students to calculate centroid and moment of inertia of areas and sections. To comprehend the effect of friction on equilibrium. Unit I STATICS OF PARTICLES Fundamental Concepts and Principles, Systems of Units, Method of Problem Solutions, Statics of Particles Forces in a Plane, Resultant of Forces, Resolution of a Force into Components, Rectangular Components of a Force, Unit Vectors. Equilibrium of a Particle- Newton's First Law of Motion, Space and Free-Body Diagrams, Forces in Space, Equilibrium of a Particle in Space. **EQUILIBRIUM OF RIGID BODIES** Unit II 9 Types of supports – Action and reaction forces –stable equilibrium – Principle of Transmissibility- Moments and Couples - Moment of a force about a point and about an axis - Vectorial representation of moments and couples - Scalar components of a moment - Varignon's theorem - Single equivalent force -Equilibrium of Rigid bodies in two and three dimensions. Unit III PROPERTIES OF SURFACES AND SOLIDS Definition of Centroid & Centre of Gravity - Axes of Symmetry - Centroid of basic shapes by Integration -Numerical problems on Centroid of Composite sections - Theorems of Pappus & Guldinus - Concept of Moment of inertia - perpendicular axis theorem - parallel axis theorem - Moment of inertia of basic shapes by Integration - Numerical problems on moment of inertia of composite sections - Mass Moment of Inertia. **Unit IV FRICTION** 9 Friction force – Laws of sliding friction – equilibrium analysis of simple systems with sliding friction – Ladder friction - Rolling resistance. Unit V **DYNAMICS OF PARTICLES** 9 Displacements, Velocity and acceleration, their relationship - Relative motion - Rectilinear motion -

Curvilinear motion - Newton's laws of motion - Work Energy Equation - Impulse and Momentum - Impact

TOTAL - 45 Periods

of elastic bodies.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the fundamental concepts of engineering mechanics.	Understand
CO.2	Apply laws of statics and dynamics to resolve the unknown forces of particles and rigid bodies under equilibrium.	Apply
CO.3	Apply laws of mechanics to compute the properties of surfaces and solids.	Apply
CO.4	Analyze the equilibrium of particles and rigid bodies in 2D and 3D, to resolve the unknown forces.	Analyze
CO.5	Analyse the simple and compound stresses induced in rigid bodies subjected to various loadings.	Analyze
CO.6	Evaluate the Rigid bodies for various loading conditions.	Evaluate

Course Learnin	g Objectives:				
-	ze the Band gap, moment of inertia, thermal conductivity and rigidity modulu	is of	the n	nater	ials.
	PHYSICS LABORATORY				
	LIST OF EXPERIMENTS				
1.Determina	ation of Energy band gap of a semiconductor.				
2.Torsion permetallic wire	endulum – Determination of Moment of inertia of a metallic disc and rigidity e.	mod	lulus	of a	given
3. Spectron	neter - Determination of wavelength of mercury spectrum using grating.				
4. Laser – [Determination of numerical aperture and acceptance angle of an optical fiber	r.			
5. Newton's	rings – Determination of radius of curvature of a convex lens.				
6. Lee's Dis	c - Determination of thermal conductivity of a bad conductor.				
7. Determin	ation of Solar cell Characteristics using optical transducers kit.				
A minimum of F	FIVE experiments shall be offered				
	CHEMISTRY LABORATORY				
	LIST OF EXPERIMENTS				
1.Estimation	n of hardness of water by EDTA method.				
2.Estimation	n of alkalinity of water sample.				
3.Estimation	n of Chloride in water sample (Argentometric method).				
4.Determina	ation of DO in water.				
5.Estimation of o	chromium in tannery wastes.				
	n of available chlorine in bleaching powder.				
7.Estimation	n of iron by Spectrophotometry.				

TOTAL: 45 Periods

8. Determination of acidity of industrial effluents.

A minimum of FIVE experiments shall be offered

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the principles of Light and Elasticity to determine the Engineering properties of materials.	Apply
CO.2	Apply the basic knowledge of water quality testing for environmental sustainability.	Apply
CO.3	Estimate the quality of water that suits for domestic and industrial applications.	Apply
CO.4	Analyze the thermal conductivities of different bad conductors.	Analyze
CO.5	Analyze the Characteristics of a semiconductor.	Analyze
CO.6	Analyze the water quality parameters for industrial effluents to prevent water pollution.	Analyze

21UCE211

COMPUTER AIDED BUILDING DRAWING (only for Civil)

L	Т	Р	С
0	0	3	1.5

Course Learning Objectives:

• To prepare the Plan, Elevation and Sectional views of buildings in accordance with Development and Control rules satisfying orientation and functional requirements as per National Building Code.

PART – A

Manual Drawing:

Principles of Planning, Orientation—Cross section of a load bearing wall (including door, steps, floor, lintel & sunshade, roof, parapet, weathering course, etc.)

PART - B

Drawing using Drafting software:

Basic AutoCAD Commands [The Menu System, Toolbars (Standard, Object Properties, Draw, Modify and Dimension), Drawing Area (Background, Crosshairs, Coordinate System), Dialog boxes and windows, Shortcut menus (Button Bars), The Command Line (where applicable), The Status Bar, Different methods of zoom as used in CAD, Select and erase objects; Isometric Views of lines, Planes, Simple and compound Solids]- simple diagrams using the Commands

Preparation of Plan, Elevation and Section of

- 1. Single Storey Residential Building (Plan, Elevation & Section
- 2. Double Storied Residential Building with staircase using given area- RCC framed structure (Plan, Elevation & Section)
- 3. Library building plan
- 4. Fully tiled gable house
- 5. Institutional building School (Plan,)

3D view of a single story residential building.

TOTAL: 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Prepare a Plan, Front Elevation and Sectional Elevation and Section Elevation from line diagram and develop submission drawings for building.	Apply
CO.2	Prepare a plan, Elevation and Section of R.C.C framed buildings with typical cross sections of footings, beams and columns.	Apply
CO.3	Interpret the basic concept and usage of CADD software. Compare the utilities of alternate drafting software from open source.	Apply
CO.4	Plan and Design a residential, Public buildings as per requirements.	Apply
CO.5	Prepare a plan, Front Elevation and Sectional Elevation and Sectional Elevation from line diagram and develop submission drawings for building.	Apply

21UMA325 PROBABILITY, STATISTICS AND TRANSFORM TECHNIQUES (only for Civil) L T P 3 1 0						
Course Learning Objectives:						
 To make the student acquire sound knowledge of standard distributions that can describe real life 						
phenomena.						
 To acquaint the student with Fourier transform techniques used in variety of 	situat	ions.				
 To acquaint the student with the basics of Z - transform in its applicability 	to dis	screte	ely va	arying		
functions, gained the skill 423to formulate certain problems in terms of diffe	erence	equ	ation	s and		
solve them using the Z - transform technique bringing out the elegance of the	e proc	edure	e invo	olved		
Unit I RANDOM VARIABLES				9+3		
Axioms of probability - Conditional probability - Total probability - Bayes' theorem - Dis	crete	and o	conti	nuous		
random variables - Moments - Moment generating functions and their properties. Binom	ial, Po	oisso	n, No	ormal,		
Geometric, Uniform, Exponential and Gamma distributions.						
Unit II TESTING OF HYPOTHESIS	T			9+3		
Sampling distributions - Normal, t, Chi-square and F distributions - Tests for single mean,	Propo	rtion,	Diffe	rence		
of means (large and small samples) – Tests for single variance and equality of variances	- Ch	i-squa	are te	est for		
goodness of fit – Independence of attributes.						
Unit III FOURIER SERIES				9+3		
Dirichlet's conditions – General Fourier series – Odd and even functions – Half range sin	e seri	es –	Half	range		
cosine series – Complex form of Fourier Series – Perceval's identity – Harmonic ana	lysis	- App	olicat	ion of		
Fourier series						
Unit IV FOURIER TRANSFORM				9+3		
Fourier integral theorem (without proof) – Fourier transform pair – Sine and Cosine trans	sforms	- Pi	roper	ties -		
Transforms of simple functions – Convolution theorem – Perceval's identity - Application o	f Four	ier Tr	ansf	orm.		
Unit V Z-TRANSFORM AND DIFFERENCE EQUATIONS				9+3		
Z-transform - Elementary properties - Inverse Z-transform - Convolution theorem - Initial and Final value						
Theorems - Formation of difference equations – Solution of difference equations.						
TOTAL : 45 (L) + 15 (T) = 60 Periods						

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the knowledge of concepts of probability to acquired knowledge of standard Distributions.	Apply
CO.2	Apply the concept of testing of hypothesis for small and large samples in Real life Problems.	Apply
CO.3	Apply the knowledge of Fourier series for the given function or Discrete data and compute the Periodic function arising in the study of Engineering problems.	Apply
CO.4	Apply the Fourier Transform techniques to evaluate the given integral problems using Fourier Cosine transform, Sine Transform and its properties.	Apply
CO.5	Apply the acquired knowledge of Z transform and its properties inverse Z transform and difference equations.	Apply
CO.6	Apply the knowledge of concepts of probability to acquired knowledge of standard Distributions.	Apply

24110=202	STRENGTH OF MATERIALS	L	T	Р	С
STRENGTHO		3	1	0	4
Course Learn	ng Objectives:				
 To learr 	the fundamental concepts of Stress in simple and complex states.				
 To prov 	ide knowledge on shear force and bending moment for all beams by recogr	nizing	the	bear	n type
and loa	ding thereby calculating slope and deflectionusing various methods.				
 To have knowledge on determining the behavior of columns and cylinders. 					
 To deve 	elop knowledge on unsymmetrical bending of beams to locate shear cente	r and	d var	ious	failure
theories					
Unit I SIMP	LE AND COMPOUND STRESSES				9+3
Stresses in sin	ا pple and compound bars – Thermal stresses – Elastic constants - Thin cyl	indric	alan	d spł	nerica
	state of stress – Principal stresses and principal planes – Mohr's circle of s			-	
circular shafts.					
Unit II BENI	DING AND DEFLECTION OF BEAMS				9+3
I Types of beam	ا ه and transverse loadings– Shear force and bending moment for Simply	suppo	orted	. can	tilever
•	ing beams - Theory of simple bending - Stress distribution - Deflection				
_	hod – Macaulay's method – Area moment method – Conjugate beam metho				
Unit III INDE	TERMINATE BEAMS				9+3
Proposed Capti	ever and Fixed Beams – Fixed end moments reactions, slope and deflectio	n for	etan	dard	Cases
• •	ontinuous beams – support reactions and moments – Theorem of three mor				
•	oment Diagrams.	Herri	3 – 0	ilicai	1 0100
	JMNS AND CYLINDERS				0.2
					9+3
Euler's theory	of long columns – critical loads for prismatic columns with different end condit	tions			
Rankine's-Gor	Ion formula for eccentrically loaded columns – Eccentrically loaded short co	lumn	s – r	middl	e third
rule – core sec	ion – Stresses in thin cylindrical and spherical shell – thick cylinder.				
Unit V ADV	NCED TOPICS				9+3
Unsymmetrical	bending of beams - shear Centre - Theories of failure - Principal stress, p	rinci	oal s	train,	shea
stress, strain e	nergy and distortion energy theories - application problems - Curved bea	ams	– Wi	inkler	Bach
Formula - Stres	ses in Hooks.				

TOTAL : 45 (L) + 15 (T) = 60 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the concepts and principles of bending theory, column theory and failure theories.	Understand
CO.2	Apply the various methods to compute shear force, bending moment and deflection of determinate and indeterminate beams.	Apply
CO.3	Determine load carrying capacity and stresses induced in columns, cylinders, spherical shells and hooks.	Apply
CO.4	Analyze support conditions and loading conditions using structural elements.	Analyze
CO.5	Evaluate the reinforcement and deflection distribution as per SFD & BMD using codal provisions.	Evaluate
CO.6	Apply the stress strain distribution of structural elements.	Apply

C 21UCE304 WATER SUPPLY ENGINEERING 3 0 **Course Learning Objectives:** To understand and explain the concept of water treatment process and components of water supply system. To have adequate knowledge on distribution network and water supply to buildings. To equip the students with the principles and design of water treatment and distribution. INTRODUCTION TO WATER SUPPLY SYSTEM Unit I 9 Public water supply system - Planning, Objectives, Design period, Population forecasting (Arithmetic Increase method, Geometric Increase method, Incremental Increase method & Decreasing rate method); Water demand Sources of water and their characteristics –Surface and Groundwater – Impounding Reservoir – Development and selection of source – Water quality – Characterization – Significance – Drinking Water quality standards. **COLLECTION AND CONVEYANCE OF WATER** Unit II 9 Water supply - Intake structures - Functions; Pipes and conduits for water - Pipe materials - Hydraulics of flow in pipes – Transmission main design – Laying, jointing and testing of pipes – appurtenances – Types and capacity of pump – Selection of pumps and pipe materials. **CONVENTIONAL WATER TREATMENT** Unit III 9 Objectives – Unit operations and processes – Principles, functions, design, Operation & Maintenance aspects of water treatment plant, aerators, flash mixers, Coagulation, flocculation sedimentation tanks and sand filters -Design of Chemical feeding devices and Clariflocculator - Plate and tube settlers - Pulsator clarifier -Disinfection - Residue Management. ADVANCED WATER TREATMENT Unit IV 9 Water softening - Iron and Manganese removal - Defluoridation - Adsorption - Desalination - R.O.Plant demineralization process - Ion exchange - Membrane Systems - Operation & Maintenance aspects - Recent Advances - Sky Water Technology – Biofiltration – Ultraviolet Germicidal Irradiation. WATER DISTRIBUTION AND SUPPLY TO BUILDINGS Unit V Requirements of water distribution – Components – Service reservoirs Functions – Network design – Analysis of distribution networks - Software's used in Distribution process (EPANET, QANET) - Leak detection methods - Water supply to buildings - House service connection - Fixtures and fittings, systems of plumbing and types of plumbing.

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Define, Understand and explain the concept of water treatment process and components of water supply system.	Understand
CO.2	Apply the knowledge of water supply and treatment principles to be able to design the treatment process, supply mains, distribution network by calculating the water demand.	Apply
CO.3	Analyze the water quality and treatment, pump and pipe materials for the distribution system.	Analyze
CO.4	Design solution for water treatment and network system components that meet the specified needs with appropriate consideration for the public health and environmental consideration.	Apply
CO.5	Use the knowledge based on Analysis and Interpretation of population and water quality data to provide valid conclusion for treatment processes and network design.	Evaluate
CO.6	Select and apply appropriate advanced techniques for treatment and modern tools like EPANET, QANET for water distribution system.	Apply

21UC	E305	FLUID MECHANICS	L 3	T 0	P 0	C 3
Course	Learnin	g Objectives:	3	U	U	<u> </u>
		uce the students about properties of the fluids, behaviour of fluids under sta	itic C	ondi	tions	
		t basic knowledge of the dynamics of fluids through flow measurements,				
	•	ninar and turbulent) and forces on pipe bends with an exposure to the signi			•	• •
`		ory and its applications.				
		the fundamentals of dimensional analysis and model studies.				
		, , , , , , , , , , , , , , , , , , ,				
Unit I	FLUID	S PROPERTIES AND STATICS				9
Fluid – d	definition	n, distinction between solid and fluid - Units and dimensions - Properties	of 1	luids	- de	ensity,
specific	weight,	specific volume, specific gravity, viscosity, compressibility, vapour press	sure,	сар	illarit	y and
surface	tension	- Fluid statics: concept of fluid static pressure, absolute and gauge pr	essu	res	- pre	ssure
measure	ements b	y manometers and sensors - forces on planes – Centre of pressure – buoy	ancy	floa	tatior	١.
Unit II	FLUID	KINEMATICS AND DYNAMICS				9
Fluid Kir	nematics		inuity	equ	atior	one (
and thre	e dimen	sional differential forms)- stream line-streak line-path line- stream function	า - Ve	elocit	ty po	tential
function	- flow r	net. Fluid dynamics - equations of motion -Euler's equation along a stre	amlii	ne -	Berr	oulli's
equation	– appl	lications – Venturimeter, orifice meter and Pitot tube- linear momentul	m ed	quatio	on a	nd its
application	on to pip	pe bend.				
Unit III	DIMEN	ISIONAL ANALYSIS & MODEL STUDIES				9
Fundam	<u>ı</u> ental di	mensions - dimensional homogeneity - Rayleigh's method and Bucking	ghan	ı Pi	theo	rem -
dimensio	onless pa	arameters - similitude and model studies - distorted models				
Unit IV	FLOW	THROUGH PIPES				9
Reynold	's exper	iment - laminar flow through circular pipe (Hagen poiseulle's) – flow thro	ugh	pipes	s - D	arcy -
Weisbac	h's equa	ation - pipe roughness -friction factor - Moody's diagram- major and min	or lo	sses	of f	ow in
pipes - h	ydraulic	and energy gradient line - pipes in series and in parallel.				
Unit V	BOUN	DARY LAYER				9
Boundar	y layer	 definition- boundary layer on a flat plate – laminar and turbulen 	t bo	unda	ry la	ıyer -
displace	ment, er	nergy and momentum thickness – Momentum integral equation-Boundary I	ayer	sepa	aratio	n and

TOTAL - 45 Periods

control - drag on flat plate.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the basic concepts of fluid statics, dynamics, model studies and boundary layer.	Understand
CO.2	Apply the concept of statics and dynamics to solve the fluid flow problems.(Apply)	Apply
CO.3	Analyse the fluid flow problems with momentum and energy equations.	Analyse
CO.4	Evaluate the critical properties of fluids under different scenarios to suit field conditions.	Evaluate
CO.5	Investigate the fluid flow problems and models using the knowledge of statics& dynamics.	Evaluate
CO.6	Create a model of any measurement device using modern engineering and IT Tools to predict the fluidpressure.	Apply

241105207	MATERIAL TESTING LARORATORY	L	T	Р	O
21UCE307	MATERIAL TESTING LABORATORY	0	0	3	1

Course Learning Objectives:

- To apply knowledge of mathematics and engineering in calculating the mechanical properties of structural materials.
- To use the techniques, skills and modern engineering tools necessary for engineering.
- To understand the professional and ethical responsibility in the areas of material testing.

LIST OF EXPERIMENTS

I. Test on Cement

- 1.Fineness of Cement
 - 2.Determination of Soundness
 - 3. Determination of Consistency
 - 4. Determination of Initial and Final setting time

II. Test on Bricks and Blocks

- 1. Test for Compressive strength of bricks and blocks
- 2. Test for water absorption of bricks and blocks
- 3. Determination of Efflorescence of bricks

III. Test on Metals

- 1.Tension test on MS rod and HYSD rod
- 2. Torsion Test
- 3. Double Shear Test
- 4.Impact Test (Izod and Charpy)
- 5.Fatigue Test
- 6.Deflection Test on Metal Beam

IV. Test on Springs

- 1. Tension Test on Open Coiled Helical Spring
- 2. Compressive Test on Open Helical Spring

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Determine the stress, strain, deformation of metal under different types of loadings.	Apply
CO.2	Determine the quality of cement with regard to their suitability in construction.	Apply
CO.3	Determine the mechanical properties of metals and springs.	Apply
CO.4	Analyse the classification of hollow blocks and bricks based on its mechanical properties as per IS code.	Analyze
CO.5	Make use of problem solving approaches to various current issues regarding failure of structures due to unsuitable materials and make decisions in teams.	Respond
CO.6	Justify the suitability of Cement, Metals, hollow blocks and bricks as per IS code for construction based on its physical and mechanical properties and submit your report.	value

21UCE308		L	Т	Р	С
	SURVEYING LABORATORY	0	0	3	1

Course Learning Objectives:

- To impart knowledge on setting out of building and curves using chain and Theodolite.
- To familiarize the concepts on LS, CS, area and volume calculations.
- To impart knowledge on making measurements using modern survey techniques.

LIST OF EXPERIMENTS

I. Chain Surveying and Compass Surveying

- 1. Aligning, Ranging, Chaining and Setting out
- 2.Compasstraversing

II. Levelling

- 1.Fly Levelling using Dumpy level
- 2.Fly Levelling using Tilting level
- 3.Check Levelling
- 4. Contouring, LS and CS

III. Theodolite &Tachometric Surveying

- 1. Measurement of Horizontal and Vertical angle using Theodolite.
- 2. Measurement of heights, distances and Gradient by single plane and double

Plane method.

- 3. Measurement of heights, distances and Gradient using stadia and tangential system
- of Tachometry.
- 4. Setting out of a Simple Circular curve using Theodolite surveying.

IV. Total Station Surveying

- 1. Determination of angles and height measurement using total station.
- 2. Determination of area of a given boundary using total station.

V. GPS Surveying

- 1. Determine the length of given objects using GPS.
- 2. Determine the area of given boundary by GPS.

TOTAL: 30 PERIODS

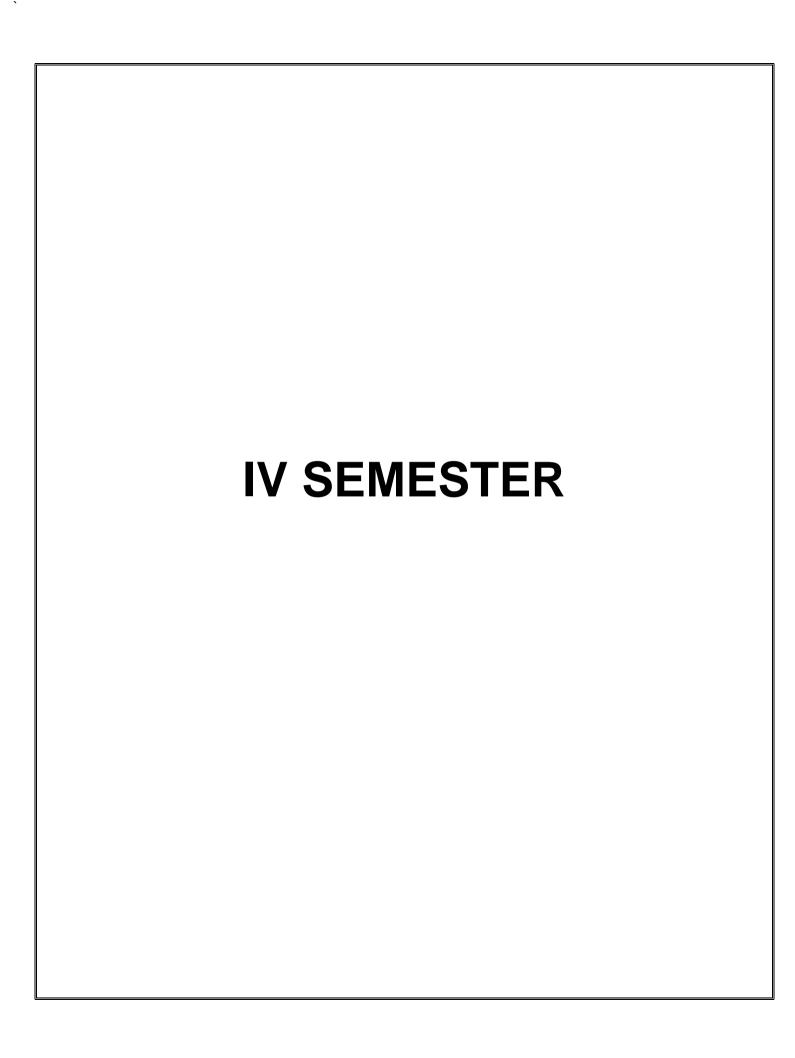

COURSE OUTCOMES:

After successful completion of this course, the students will be able to

21UCE402	SOIL MECHANICS	L	T 0	P 0	C 3
Course Learn	ng Objectives:				
• To imp	art knowledge to classify the soil based on index properties and to asses	ss th	eir e	ngine	eering
propert	es.				
To fan consoli	iliarize the fundamental concepts of permeability, stress transformation dation.	n, co	mpa	ction	, and
• To und	erstand the shear strength parameters on various geotechnical applications.				
To prov	ide the knowledge on behaviour and the performance of soil on stress distrib	ution	١.		
 To acqu 	uire knowledge on design and analysis of both finite and infinite slopes.				
Unit I BASI	C PROPERTIES OF SOIL				
Introduction - S	Soil formation – History and Types of soil -Phase relation – Engineering an	d inc	dex p	rope	rties -
Grain size dist	ibution – Atterberg limits – Soil classification significance – BIS classification	syst	em.		
Unit II PERI	MEABILITY AND STRESS DISTRIBUTION				9
Introduction- F	ermeability – Darcy's law - Laboratory methods – Field methods - Quid	ck sa	and	cond	tion -
Seepage - La	place equation - Flow nets - properties and applications -Liquefaction -	Stre	ess c	listrib	ution-
Effective stress	concepts – Boussinesq's equation – Stress due to line load and circular and	d rec	tangı	ular lo	oaded
area – Westerg	aard's equation for point load – Newmark's Influence Chart.				
Unit III COM	PACTION AND CONSOLIDATION				9
Introduction-co	mpaction- Influencing factors - laboratory and field methods- Settlemen	nt -	Con	npone	ents -
Immediate an	d consolidation settlement- Terzaghi's one dimensional consolidation the	heory	y -	Labo	ratory
consolidation t	est – Field consolidation curve – NC and OC clays - Final and time rate of co	onso	lidati	on– 1	√t and
log t methods.					
Unit IV SHE	AR STRENGTH				9
Introduction- S	hear strength of soil – Mohr-coulomb's theory – Measurement of shear stre	ength	ո - D	irect	shear
test, UCC test, triaxial shear test and vane shear test - Shear strength of cohesive and cohesionless soil- Pore					
pressure parameters – Factors influences shear strength of soil.					
Unit V SLOI	PE STABILITY				9
Slope failure mechanisms - Modes - Stress analysis - Infinite and finite slopes - Stability analysis for purely					
cohesive and	c - Φ soils - Method of slices - Friction circle method - Stability number	- S	lope	prot	ection
measures.					

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the various soil types, its characteristics and testing its engineering properties.	Understand
CO.2	Apply the knowledge of engineering fundamentals to determine the soil properties, strength, and stability of slope.	Apply
CO.3	Apply the knowledge of various Soil Mechanics theories and experimental studies to predict the stress equations and different failure modes of soil	Apply
CO.4	Analyse the various properties of different soil samples including stress distribution settlement and bearing capacity.	Analyze
CO.5	Investigate the merits and demerits of various soil tests and theories to compute an appropriate solution for the given scenario.	Evaluate
CO.6	Evaluate the various soil testing methods to provide a suitable method for determining the soil parameters.	Evaluate

21UCE	21UCE403 STRUCTURAL ANALYSIS – I		L	T	Р	С
Course	l earnin	g Objectives:	3	1	0	4
		-				
	-	ze the pin-jointed plane and space truss.			10.84	_
	-	se the indeterminate structures for internal forces by slope deflection	n m	etno	a&IVI0	oment
		on method.				
• T	o learn	the method of drawing influence lines and its uses in various applications	like l	bean	ns, b	ridges
а	nd plane	e trusses.				
• T	o analys	se the arches and suspension bridges				
Unit I	ANALY	SIS OF TRUSSES				12
Determin	ate and	indeterminate trusses - analysis of determinate trusses - method of joints	-met	hod	of se	ctions
- Deflect	ions of _l	oin-jointed plane frames - lack of fit - change in temperature - method of	tens	ion c	oeffic	cient -
application	on to spa	ace trusses.				
Unit II	SLOPE	DEFLECTION METHOD				12
Slope de	flection	equation- Analysis of continuous beams and rigid frames - Support settlem	ents.	ı		
Unit III	Unit III MOMENT DISTRIBUTION METHOD					12
Stiffness and carry over factors - Distribution and carryover of moments - Analysis of continuous Beams -						ams -
Plane rig	id frame	es with and without sway – Support settlement.				
Unit IV	MOVIN	G LOADS AND INFLUENCE LINES				12
Influence lines for reactions in statically determinate structures -Influence lines for shear force and bending						
moment in beam sections – Calculation of critical stress resultants due to concentrated and distributed moving						
loads - Muller Breslau"s principle – Application of Muller Breslau"s principle to propped cantilever and two span						
continuous beams - Indirect model analysis forinfluence lines of indeterminate structures – Beggs deformeter.						
Unit V	ARCHE	ES .				12
Arches - Types of arches - Analysis of three hinged, two hinged and fixed arches - Parabolic and circular						
arches –	arches – Settlement and temperature effects.					

TOTAL - 60 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the concepts and principles of bending theory, column theory and failure theories.	Understand
CO.2	Apply various methods to compute shear force, bending moment and deflection of determinate and indeterminate beams .	Apply
CO.3	Determine load carrying capacity and stresses induced in columns, cylinders, spherical shells and hooks.	Apply
CO.4	Analyze the beams and columns for different support conditions and cylinder, spherical shells and curved beams for different loading conditions.	Analyze
CO.5	Investigate reinforcement and deflection distribution as per SFD & BMD and codal provisions respectively.	Analyze
CO.6	Investigate stress strain distribution of beams, columns, cylinders and spherical shells using any analysis software.	Evaluate

21UCE404	WASTE WATER ENGINEERING	L 3	T 0	P 0	C 3				
Course Learn	ng Objectives:								
To develop the ability to apply basic understanding of physical, chemical, and biological phenomena for									
succes	successful design, operation and maintenance of sewage treatment plants.								
 To hav 	e adequate knowledge about the basic concepts of sewage composition a	and v	ariou	s se	wage				
treatme	nt processes and its design.								
To prov	ide the adequate information on various disposal standards for industrial effl	uents.							
Unit I PLAN	INING AND DESIGN OF SEWERAGE SYSTEM				9				
Characteristics	and composition of sewage population equivalent -Sanitary sewage flow								
estimation – S	ewer materials – Hydraulics of flow in sanitary sewers – Sewer design - Sto	rm ru	noff	estim	nation				
DWF and V	/WF - sewer appurtenances – sewage pumping-drainage in buildings-plu	umbin	ng sy	stem	is for				
drainage - Disc	harge standards for Effluents - General layout of house drainage - street cor	necti	ons						
Unit II PRIM	ARY TREATMENT OF SEWAGE				8				
Objectives – L	nit Operations and Processes - Selection of treatment processes - Onsite	e san	itatio	n - S	Septic				
tank- Primary	treatment - Principles, functions, design, Operation and Maintenance	aspe	cts o	f se	wage				
treatment units	- screens - grit chamber - primary sedimentation tanks.								
Unit III SEC	ONDARY TREATMENT OF SEWAGE				10				
Objectives – S	election of Treatment Methods – Principle, Functions, design and Operation	and	Mair	itena	nce -				
Activated Slud	ge Process and Extended aeration systems - Rotating biological contact	lors -	Trick	ling	filters				
Waste Stabiliza	ation Ponds.								
Unit IV ADV	ANCES IN SEWAGE TREATMENT				8				
Sequencing B	atch Reactor – Moving bed biofilm reactor - Membrane Bioreactor – Ar	naero	bic c	liges	tion -				
Reclamation a	nd Reuse of sewage – Constructed Wetland - Nutrient removal system	ns -	Oper	ation	and				
Maintenance.									
Unit V SEW	AGE DISPOSAL AND SLUDGE MANAGEMENT				10				
Dilution - Self-	purification of surface water bodies - Oxygen sag curve – deoxygenation ar	nd rea	aerati	on -	Land				
disposal – Sev	disposal – Sewage farming – sodium hazards - Soil dispersion system. Objectives - Sludge characterization –								
Sludge Thicke	ning - Dewatering - Drying - ultimate residue disposal - UASB - Biogas	Reco	very	- Se	ptage				
Management.									

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the concepts of wastewater sources, sludge composition and various sewage treatment processes.	Understand
CO.2	Apply the knowledge of sewage flow principles to calculate the sewage generation, design of sewer pipe line, wastewater treatment process and sludge disposal methods.	Apply
CO.3	Analyze the quality of sewage to decide the treatment process, sewer appurtenances and disposal methods.	Analyse
CO.4	Design the sanitary sewer system, wastewater treatment process and characteristics of sludge that meet the discharge standards.	Apply
CO.5	Evaluate the wastewater characteristics to provide valid conclusion for treatment processes and disposal methods.	Evaluate
CO.6	Select and apply appropriate advanced treatment techniques using autocad.	Apply

21UCE405	HIGHWAY ENGINEERING	L	Т	Р	С
210CE405	THO THAT ENGINEERING	3	0	0	3
Course Learning	Objectives:				
 To give a 	overview about the highway engineering with respect to, planning	g, desi	gn, con	structio	n and
maintena	nce of highways as per IRC standards, specifications and method				
 To introdu 	ce the fundamentals related to the Planning and design of road co	mpone	ents.		
To provide	knowledge on various materials of pavement construction and m	ethod	of desig	n of	
highway o	onstruction.				
Unit I HIGH	VAYPLANNING AND ALIGNMENT				9
Significance of	highway planning - Modal limitations towards sustainab	oility -	- Histo	ory of	roac
development in l	ndia – factors influencing highway alignment – Soil suitability a	nalysi	s – Roa	ad ecol	logy –
Engineering sur	veys for alignment, objectives, conventional and modern me	thods	- Clas	sificat	ion of
highways – Loca	tions and functions – Typical cross sections of Urban and Rura	l Road	ds.		
Unit II GEON	ETRICDESIGNOFHIGHWAYS				9
 Crosssectionalel	ements–Sightdistances–				
Horizontalcurves	Superelevation,transitioncurves,wideningatcurves–Verticalcury	ves-			
Gradients,Specia	alconsiderationforhillroads-Hairpinbends-Lateralandverticalclear	anceat	underpa	asses.	
Unit III DESIG	NOFFLEXIBLE ANDRIGIDPAVEMENTS				9
Pavement com	ponents and their role — Design principles -Design prac	tice fo	or flexi	ble ar	 nd
	RCmethodsonly)–Embankments-ProblemsinFlexiblepavement				
	VAYCONSTRUCTIONMATERIALS ANDPRACTICE				9
	uction materials, properties, testing methods – CBR Test for	or eub	arada	_ tos	
	tumen – Test on Bituminous mixes-Construction practice including		•

21UCE	406	APPLIED HYDRAULIC ENGINEERING	L	Т	Р	С		
21002	400	AFFLIED HTDRAULIC ENGINEERING	3	0	0	3		
Course Learning Objectives:								
To impart basic knowledge about the open channel flows with analysis of uniform flow, gradually varied								
flo	ows and	rapidly varied flows.						
• T	o impar	t knowledge on performance characteristics of turbines.						
• T	o impar	t knowledge on performance characteristics of pumps.				ļ		
Unit I	UNIFO	RM FLOW				9		
Definition	and d	ifferences between pipe flow and open channel flow - Types of Flow -	Prop	pertie	es of	open		
channel	– Туре	s and Regimes of flow - Velocity distribution in open channel - Mode	ern f	low	mea	suring		
Techniqu	ies in O	pen Channel Flow Steady uniform flow: Chezy equation, Manning equa	tion ·	- Bes	st hyc	Iraulic		
sections	for unifo	orm flow – Wide open channel - Specific energy – Critical flow and its comp	utatio	ons.				
Unit II	GRAD	UALLY VARIED FLOW				9		
Dynamic	equation	on of gradually varied flow – drawdown and backwater curves - Type	s of	flow	pro	files -		
Classifica	ations: C	Computation by Direct step method and Standard step method – Change in	Grad	des.				
Unit III	RAPID	LY VARIED FLOW				9		
Application	on of the	e momentum equation for Rapidly varied Flow - Hydraulic jumps - Types - I	Ener	gy di	ssipa	ition –		
		ative surges (Basic Concepts Only)			•			
Unit IV	TURBI	NES				9		
Turbines	- Class	ification - Impulse turbine – Pelton wheel - Reaction turbines - Francis turb	ine -	Kap	lan tı	urbine		
- Draft tube - Cavitations - Performance of turbine - Specific speed - Runaway speed.								
Unit V	PUMP	S				9		
Classification of Pumps - Centrifugal pumps - work done - Cavitations in pumps - specific speed of pump -								
characte	characteristics Curves - Multistage pumps - Reciprocating pumps - Negative slip - Indicator diagrams and its							

TOTAL: 45 PERIODS

variations - Air vessels - Savings in work done.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the basic concepts of open channel flows and hydraulic machines.	Understand
CO.2	Determine the characteristics of open channel flow and hydraulic machines.	Apply
CO.3	Analyze the various flow profiles in open channel flow using different methods.	.Analyze
CO.4	Evaluate the fluid flow characteristics in open channels under various flow conditions and efficiencies of turbines and pumps based on head, specific speed and discharge.	Evaluate
CO.5	Create a model/Program of hydraulic structures using engineering services to predict the fluid flow.	Apply
CO.6	Make an effective communication and presentation as an Individual/team in hydraulic Engineering related problems.	Apply

Text Books:

- 1. Bansal R.K. Fluid Mechanics and Hydraulic Machines, Laxmi Publications, New Delhi, 2018.
- 2. K. Subramaniya, Flow in open Channels.
- 3. Modi P.N. and Seth S.M., Hydraulics and Fluid Mechanics, Standard Book House, New Delhi, 2002.

Reference Books:

- 2. Rajesh Srivastava, Flow through open channels, Oxford University Press, NewDelhi, 2008.
- 3. Rajput R.K, Fluid Mechanics and Hydraulic Machines, Laxmi Publications, New Delhi, Ninth Edition 2010

Course Learning Objectives:

- To convey the principles of testing of water and wastewater.
- To carryout air and noise pollution measurements.
- To provide analyzing methods for water and waste water with modern tools.

LIST OF EXPERIMENTS

- 1. Sampling and preservation methods and significance of characterization of water and Waste water. (Demonstration only).
- 2. Determination of
 - (i) pH and turbidity
 - (ii) Hardness
- 3. Determination of iron & fluoride using spectrophotometer
- 4. Determination of alkalinity
- 5. Determination of Chlorides
- 6. Determination of Ammonia Nitrogen using spectrophotometer
- 7. Determination of Sulphate
- 8. Determination of Optimum Coagulant Dosage
- 9. Determination of available Chlorine in Bleaching powder
- 10. Determination of dissolved oxygen
- 11. Determination of suspended, volatile and fixed solids
- 12. Determination of BOD
- 13. Determination of COD
- 14. Determination of heavy metal using AAS.
- 15. Determination of air quality with ambient dust sampler.
- 16. Determination of ambient noise.
- 17. Determination of MPN index of given water sample (Demonstration only).

TOTAL - 30 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Determine the physical and chemical characteristics of given water, wastewater and sample.	Apply
CO.2	Use modern equipment in prediction of ambient air quality and micro level contaminants.	Apply
CO.3	Select suitable methods and perform tests for water and waste water.	Analyze
CO.4	Suggest suitable design treatment technology for the given wastewater.	Analyze
CO.5	Investigate the quality of water and wastewater samples based on the level of contamination.	Apply
CO.6	Examine the microbial contaminants present in wastewater to adopt modern techniques.	Evaluate

- 4. IS 3025 (Part 1-60) Indian Standard Methods of sampling and test (physical and Chemical) for water and wastewater.

Course Learning Objectives:

- To provide fundamental knowledge on properties of fluid flow and flow measuring devices.
- To familiarize the determination of major and minor losses in pipes.
- To provide hands on experience in characteristics of pumps and turbines.

LIST OF EXPERIMENTS

- 1. Flow measurement using Rotameter.
- 2. Flow through Venturimeter and Orifice meter.
- 3. Flow through Notches.
- 4. Bernoulli's Experiment.
- 5. Friction factor estimation in pipes .
- 6. Minor losses in Pipes with enlargement and contraction.
- 7. Characteristics of Centrifugal pumps.
- 8. Characteristics of Submersible pump.
- 9. Characteristics of Reciprocating pump.
- 10. Characteristics of Pelton wheel turbine.
- 11. Characteristics of Francis turbine.
- 12. Determination of Metacentric height.
- 13. Study of Pressure Measuring Devices.
- 14. Hydrostatic force on Flat Surfaces[Normal / Inclined].

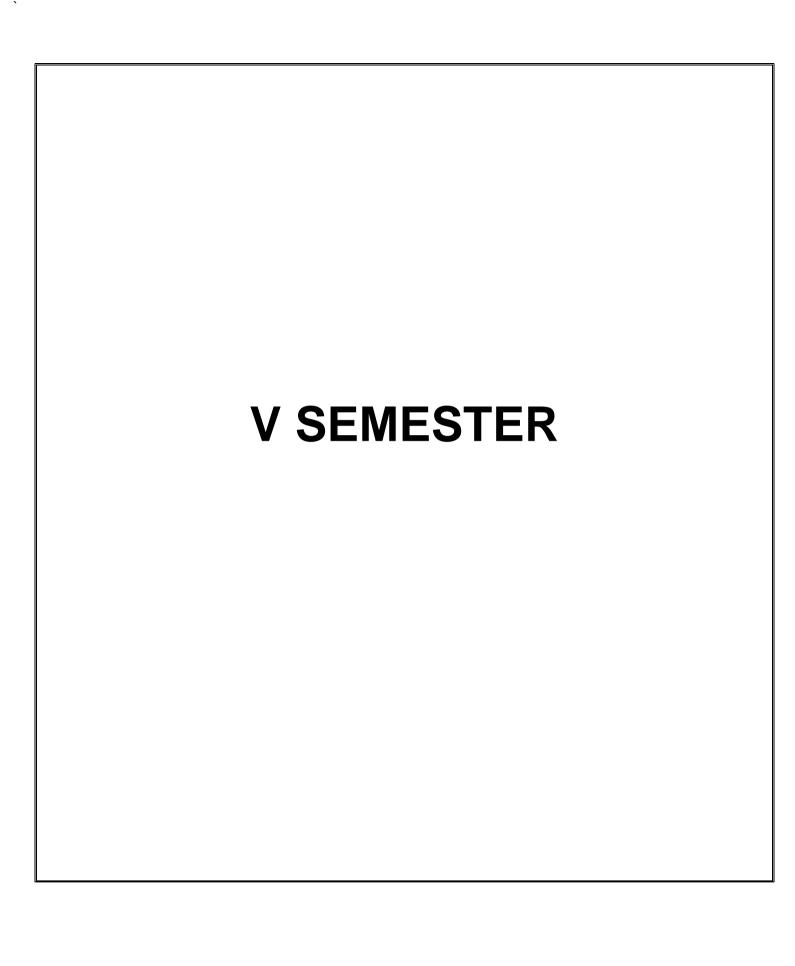

TOTAL - 30 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the concept of fluid Mechanics to measure the various fluid static and	Apply
	Dynamic Parameters.	
CO.2	Categorize the performance of flow measuring devices under varying flow	Analyze

21UCE	501	STRUCTURAL ANALYSIS – II	L	Т	Р	С	
21002	-501	OTROGIONAL ANALIGIO II	3	1	0	4	
Course	Learnin	g Objectives:					
• T	To introduce the importance of plastic analysis to calculate the collapse loads for beams and frames.						
• T	o formu	ulate the element stiffness matrix and assemble the structure stiffness	ma	trix 1	or s	olving	
in	determi	nate problems.					
• T	o analys	se statically indeterminate structures by imposing boundary conditions on flo	exibil	ity m	atrix		
• T	o analys	se the suspension bridges and space truss.					
Unit I	PLAS	TIC ANALYSIS OF STRUCTURES				12	
Beams ir	n pure b	ending – Plastic moment of resistance – Plastic modulus – Shape factor – I	Load	facto	or – I	Plastic	
hinge ar	nd mech	nanism – Plastic analysis of indeterminate beams and frames – Uppe	r an	d lo	wer	bound	
theorems	S.						
Unit II	MATR	IX STIFFNESS METHOD				12	
Restraine	ed struc	ture -Formation of stiffness matrices - equilibrium condition - Analysis of Co	ontin	uous	Bea	ms,	
Pin-jointe	ed plane	frames and rigid frames by direct stiffness method.					
Unit III	MATR	IX FLEXIBLITY METHOD				12	
Degree o	of Static	Indeterminacy -Primary structures - Compatibility conditions - Formation	flexi	bility	mat	rices -	
Analysis	of indet	erminate pin- jointed plane frames, continuous beams and rigid jointed pla	ne fi	ame	s by	direct	
flexibility	approa	ch.					
Unit IV	SPAC	E AND CABLE STRUCTURES				12	
Analysis	of Space	ce trusses using method of tension coefficients – Beams curved in plan - S	Suspe	ensio	n ca	bles –	
suspensi	ion bridg	ges with two and three hinged stiffening girders.					
Unit V	APPR	OXIMATE ANALYSIS OF FRAMES				12	
Approxin	nate and	alysis for gravity loadings - substitute frame method for maximum mom	ents	in b	eam	s and	
columns	– Appro	oximate analysis for horizontal loads - portal method and cantilever method	od –	assı	umpt	ions –	

TOTAL - 60 Periods

axial force, shearing force and bending moment diagrams.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the fundamental principles of analysis of beams, pin jointed frames, rigid frames and arches.	Understand
CO.2	Compute the member forces and deflection of determinate and indeterminate structures.	Apply
CO.3	Apply the slope defection and moment distribution methods to solve the beams and rigid frames under different loading conditions.	Apply
CO.4	Analyze the support moments, Shear forces for statically indeterminate and determinate structures using various analytical methods.	Analyze
CO.5	Analyze the vertical reaction, horizontal thrust and bending moment for two and three hinged arches.	Analyze
CO.6	Investigate the SFD & BMD of determinate and indeterminate structures using classical methods and modern tools.	Evaluate

T.				_	
21UCE502	FOUNDATION ENGINEERING	L	T	Р	С
		3	0	0	3

Course Learning Objectives:

- To acquire knowledge on planning and execution of geotechnical site investigation.
- To understand the design parameters of different type of foundations as per code.
- To familiarize the concept of earth pressure theories and retaining wall analysis.
- To understand the pile foundation, its type, capacity and settlement.
- To impart knowledge on basic concepts of special foundation.

Unit I Site Investigation and Selection of Foundation

9

Introduction – Scope and objectives – Methods of exploration – Depth of boring- spacing of bore hole – Standard penetration test – significance – sampling – types, techniques and requirements- Bore log and report writing – data interpretation- strength parameters and liquefaction potential – Selection of foundation based on soil condition.

Unit II Bearing Capacity and Settlement of Shallow Foundation

9

Introduction – Types - Location and depth of foundation – Codal Provisions - Bearing capacity of shallow foundation – Terzaghi's theory, Meyerhoff's theory and BIS formula – Factors affecting bearing capacity - Insitu tests (Plate load, SPT and SCPT) – allowable bearing pressure - Seismic considerations in bearing capacity evaluation – Determination of settlement of foundations on granular and clay deposits – Total and differential settlement – Methods of minimizing settlements.

Unit III | Pile Foundation

9

Introduction – Types of piles and their function – Factors influencing the selection of pile – Load carrying capacity of single pile in granular and cohesive soil – Static formula - Dynamic formulae – Capacity from in-situ tests (SPT and SCPT) – Negative skin friction – Uplift capacity – Group capacity by different methods (Feld's rule, Converse-Labarre formula and block failure criterion) - Pile load test & Interpretation – Under reamed piles - Settlement of pile groups – Codal provision.

Unit IV | Earth Pressure and Retaining Walls

9

Introduction – Types of retaining wall - Plastic equilibrium in soils – Active and passive states – Rankine's theory- Cohesionless and cohesive soil - Coulombs wedge theory – Condition for critical failure plane – Graphical methods – Rebhann and Culmann methods – Determination of earth pressures by analytical methods - stability analysis for retaining walls – Codal Provision.

Unit V Raft and Special Foundation

S

Introduction – Raft and Pile Raft – Types – Design – Bearing capacity and Settlement - Machine Foundation (Principles only) - Foundations of transmission line towers – data requirements – forces - choice of foundation type - design procedure only - Well foundation - Tilt and shift - Remedial measures- Bearing capacity - methods of construction - settlement - lateral stability – Recent scenario.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the concept of exploration techniques, earth pressure analysis for	Understand
CO.2	various types of foundations. Apply the knowledge of sub-surface investigation, various foundation types and testing its capacity, to find the solution for geotechnical problems.	Apply
CO.3	Present the failures in slopes and suggest appropriate improvement methods for foundation.	Apply
CO.4	Analyze the bearing capacity of different foundations using the principles of various theories, exploration techniques and in-situ tests.	Analyze
CO.5	Evaluate the earth pressure, safe load, and settlement to provide a suitable foundation by examining the safety and economic conditions.	Evaluate
CO.6	Design the foundation and retaining structure based on the load carrying capacity and settlement with appropriate consideration for safety.	Create

C 21UCE503 **DESIGN OF REINFORCED CONCRETE ELEMENTS** 3 1 **Course Learning Objectives:** To Impart the usage of codes for strength, serviceability and durability. To have knowledge in designing various structural elements design and detail the basic elements like beam, slab, column, footing and staircase. To afford knowledge in analysis and design of RC framed structures including planning and drawings INTRODUCTION TO WORKING STRESS AND LIMIT STATE METHODS Unit I 6 + 3Assumptions made in the working stress method - Permissible stresses - Flexural members - moment of resistance of singly and doubly reinforced rectangular sections - - Concepts of limit state design, Characteristic loads, Characteristic strength, Partial loads and Material Safety factors, Representative stress, strain curves, Assumptions in limit state design, Stress block parameters, moment of resistance of singly and doubly reinforced rectangular sections. Unit II **DESIGN OF SLABS** 7+3 Design of one-way slabs, two-way slabs, Continuous slabs using IS coefficients. Draw reinforcement detailing as per SP 34. DESIGN OF BEAMS Unit III 12+3 Limit state analysis and design of singly reinforced, doubly reinforced beams - Limit state design of T and L beam sections - Limit state analysis and design of sections for shear and torsion, Concept of bond, anchorage and development length, I.S Code provisions. Design examples in simply supported beams. Draw reinforcement detailing as per SP 34. **DESIGN OF COLUMNS** Unit IV 8+3 Types of columns - Design of short columns for axial load, combined axial load with uniaxial and biaxial bending - use of design aids. Draw reinforcement detailing as per SP 34. Unit V **DESIGN OF FOOTINGS AND STAIRCASE** 12+3 Footings: Different types of footings-Design of isolated, square, rectangular and circular footings. Types of

stairs - Types of Staircases - Design of dog-legged and open well Staircase. Draw reinforcement detailing as

TOTAL 45(L) + 15(P) = 60 Periods

per SP 34.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the code provisions for the design of structural elements.	Understand
CO.2	Apply the limit state concepts for the design of structural elements.	Apply
CO.3	Analyze the safety and serviceability requirements of various structural elements as per IS code.	Analyze
CO.4	Analyze the reinforcement detailing of various structural elements as per IS code.	Analyze
CO.5	Create the models of structural elements for the Engineering community.	Analyze
CO.6	Construct the reinforcement detailing of structural elements as per IS codes using Auto CADD software.	Apply

21UCE507	CREATIVE THINKING AND INNOVATION	L	Т	Р	С
21002307		0	0	2	1

Course Learning Objectives:

- To develop next generation Entrepreneurs and Creative Leaders to resolve live challenges.
- To transform innovative ideas into successful businesses.
- To use a range of creative thinking tools to develop Out of the Box Ideas.

Introduction to Creativity and Innovation- Creative Techniques - Problem Identification through Brain Storming - Solution Identification through Creative Techniques - Presentation on the Innovative Idea - Market Analysis - Revenue and Business Model - Preparation of promotional aids - Customer Feedback Analysis.

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels	
	Demonstrate the ability to assess societal, health and safety issues and the	Valuing –	
CO.1	consequent responsibilities relevant to the professional engineering practice	Affective

CO.5	Analyze the market potential and evolve the product strategy.	Analyse	
CO.6	Develop sustainable innovative solutions for societal issues with consideration	Create	
CO.6	for public health, safety and environment.		

Course Learning Objectives:

- To give exposure on classification of soil based on index properties.
- To provide knowledge on the shear strength of the given soil.
- To study about the compressibility of soil sample.

LIST OF EXPERIMENTS

Index Properties

- 1. Specific gravity of soil grains.
- 2. Grain size distribution Sieve analysis.
- 3. Wet Sieve analysis Hydrometer test (Study).
- 4. Relative density of sand.
- 5. Atterberg's limits test Differential free swell test.
- 6. Determination of Moisture Density relationship using Standard Proctor Test.
- 7. Permeability determination (constant head and falling head methods).

Determination of shear strength parameters by

- 8. Direct shear test on cohesion less soil .
- 9. Unconfined compression test on cohesive soil .
- 10. Triaxial compression test (Study).
- 11. One dimensional consolidation test (Determination of co-efficient of consolidation only).
- 12. Field density test (Core cutter and sand replacement methods).
- 13. Determination of CBR Value of various soil types.

TOTAL - 30 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the knowledge of soil mechanics to find the index properties of soil.	Apply
CO.2	Apply the concepts of Cohesion and consolidation to find the shear strength parameters of soil.	Apply
CO.3	Analyze the Moisture Density relationship, nature of flow and Grain size distribution of the given soil sample.	Analyze
CO.4	Evaluate the CBR value of various soil types and investigate the suitability of soil for various applications.	Evaluate
CO.5	Make use of problem solving approaches to various current issues regarding failure of soil.	Apply
CO.6	Justify the suitability of various soil stabilization techniques based on its physical and mechanical properties and submit your report.	Apply

	SURVEY CAMP	L	Т	Р	С
21UCE509	(During IV semester Summer Vacation 2 weeks)	0	0	0	2

Course Learning Objectives:

The objective of the survey camp is to enable the students to get practical training in the field work. Groups of not more than six members in a group will carry out each exercise in survey camp. The camp must involve work on a large area of not less than 40 acres outside the campus (Survey camp should not be conducted inside the campus). At the end of the camp, each student shall have mapped and contoured the area. The camp record shall include all original field observations, calculations and plots.

LIST OF EXPERIMENTS

Two weeks Survey Camp will be conducted during summer vacation in the following activities:

- 1. Triangulation Survey.
- 2. Trilateration Survey.
- 3. Contouring.
 - i. Radial tachometric contouring Radial Line at Every 45 Degree and Length not Less than 60 Meter on each Radial Line.
 - ii.Block Level/ By squares of size at least 100 Meter x 100 Meter at least 20 Meter interval.
 - iii.L.S & C.S Road and canal alignment for a Length of not less than 1 Kilo Meter at least LS at Every30M and C.S at every 90m.
- 4. Offset of Buildings and Plotting the Location.
- 5. Use of GPS to determine latitude and longitude and locate the survey camp location.
- 6. Traversing using GPS.
- 7. Traversing using Total station.

TOTAL - 30 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply modern surveying techniques in field to establish horizontal control.	Apply
CO.2	Plot the profile of the earth surface using different leveling methods	Analyze
CO.3	Apply the modern survey equipment to locate the given traverse for various	Analyze
00.3	engineering works	
CO.4	Familiarize in setting out work for plotting of buildings to the site.	Analyze

21UCE601	CONCRETE TECHNOLOGY		T	Р	С
	(Integrated course)	2	0	3	4

Course Learning Objectives:

- To introduce students to various construction materials, techniques and practices commonly used in civil engineering construction.
- To provide knowledge on the microstructure, admixtures, properties and mix design of concrete.
- To introduce the applications of special concretes and the concreting methods.

Unit I PRODUCTION OF CONCRETE AND ADMIXTURES

9

Production of concrete, mixing, compaction curing, Quality of water for use in concrete. Chemical admixtures - Accelerators – Retarders - Plasticizers - Super plasticizers - Water proofers - Mineral Admixtures like Fly Ash, Silica Fume, Ground Granulated Blast Furnace Slag and Metakaoline - Effects on concrete properties.

Unit II SPECIAL CONCRETES

9

Special concrete; types and specifications – Lightweight concretes - foam concrete- self compacting concrete – vacuum concrete - High strength concrete - Fibre reinforced concrete – Ferro cement - Ready mix concrete – SIFCON - Shot Crete – Polymer concrete - High performance concrete - Geopolymer Concrete.

Unit III DURABILITY OF CONCRETE

9

Durability – definition and significance. Permeability, sulphate and acid attack, chloride attack and carbonation, Resistance to freezing, , efflorescence, fire resistance- Quality control, Behavior of concrete in extreme environment; temperature problem in concreting, hot weather, cold weather and under water conditions, Inspection and testing of concrete-Concrete cracking, types of cracks, causes and remedies -Deterioration of concrete and its prevention Repair and rehabilitation.(Case studies).

Lab Exercise on Concrete as Practical Component

- I. Design of concrete mix as per IS-10262. Tests on fresh concrete:
- II. Tests on fresh concrete:
 - 1. Slump Cone
 - 2. Flow Table test
 - 3. Compaction factor
 - 4. Vee Bee test

III. Tests on hardened concrete:

- 5. Compressive strength test,
- 6. Split tensile strength test,
- 7. Flexural strength test

IV. NDT tests

- 8. Rebound hammer
- 9. Pulse velocity test

TOTAL - 30 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the Production, Properties, Mix proportion and Durability of Concrete.	Understand
CO.2	Estimate the Quantities of construction materials for concrete mix design.	Apply
CO.3	Determine the mix design and properties of concrete using standard techniques.	Apply
CO.4	Analyze the suitable special concrete and admixtures for different site conditions & requirements.	Analyze
CO.5	Perform the Quality control test on Fresh, Hardened and Durability of Concrete properties.	Evaluate
CO.6	Make use of problem solving approaches to various current issues regarding deterioration of concrete and its prevention techniques and make decisions in teams.	Respond

21UGS631	LOGICAL REASONING AND APTITUDE	L	Т	Р	С
2100001	(Common to Civil, BT and BME)	1	0	0	1

Objectives:

- 1. To make the student acquire sound knowledge of the characteristic of quantitative and qualitative aptitude.
- 2. To familiarize the student with various principles involved in solving mathematical problems.
- 3. To develop an understanding of the basic concepts of reasoning skills.

Unit I QUANTITATIVE APTITUDE

Ratio and Proportion - Averages - Percentages - Problems on ages - Profit and Loss - Simple and Compound Interest - Time - Speed - Distance - Time and Work - Permutation and Combination - Alligation or Mixture - Probability - Clocks - Calendars.

Unit II VERBAL AND NON VERBAL REASONING

7

Analytical Reasoning – Circular and Linear arrangement – Direction problems – Blood relations – Analogy – Odd Man Out – Venn Diagrams - Data Sufficiency – Data interpretation — Syllogism - Coding – Decoding.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Select an appropriate technique to solve the quantitative problems within the	Apply
CO.1	stipulated time.	
CO.2	Apply Verbal and Non Verbal Reasoning skills to solve the problems based on	Apply
60.2	the logical and analytical reasoning.	
CO.3	Analyse the direction to solve equations involving one are more unknowns.	Analyse

21UEC607	PRODUCTDEVELOPMENTPROJECT	L	Т	Р	С
2102001	T KODOT DE VELOT MENTI KODEOT	0	0	8	4

OBJECTIVE:

Todevelopcompetencywithasetoftoolsandmethodsforproductdesign,manufacturingandmarketingfunctions increatinganewproduct.

Project Description:

Product development is the process of delivering a new product or improving and existing product for customers. This course helps students to convert an idea into a product. Eight periods per week will be allotted in the time table and this time shall be utilized by the students to receive directions from the guide, for library reading, laboratory work, computer analysis and field work as assigned by the guide. There shall be periodical seminar presentations about the progress made in the project. The progress of the project is evaluated based on a minimum of three reviews.

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Design and develop sustainable innovative solutions for societal issues with consideration for public health, safety and environment.	Create
CO.2	Analyze the market potential and evolve the product strategy.	Analyze
CO.3	Apply modern engineering and IT tools, algorithms, techniques to provide valid conclusion following the norms of engineering practice.	Apply
CO.4	Test and evaluate the performance of the developed innovative product using appropriate techniques and tools.	Evaluate
CO.5	Organize effectively as a team for executing the project.	Organise
CO.6	Write effective reports and make clear presentations.	Respond

CO.4	Students will be aware of correct usage of English grammar and develop in writingskills, speaking fluently and comprehend properly.	

21UME701

PROJECT MANAGEMENT AND FINANCE(Common to All Branches Except CSBS & AGRI)

L	Т	ТР			
3	0	0	3		

COURSE OBJECTIVE:

- To impart knowledge to find solutions and approaches for various projects.
- To familiarize the utilization of project within time, resource and financial constraints.

UNIT I PROJECT MANAGEMENT CONCEPTS

•

Concept and characteristics of a project, importance of project management, types of project, project organizational structure, project life cycle, Statement of Work, Work Breakdown Structure.

UNIT II PROJECT PLANNING

Ç

Project Planning and Scheduling techniques - developing the project network using CPM/PERT, Limitations of CPM/PERT, Precedence Diagramming Method, constructing diagram and computations using precedence diagramming method, PERT/CPM simulation, reducing project duration.

UNIT III RESOURCE SCHEDULING & CRITICAL CHAIN SCHEDULING

a

Resource Scheduling - Resource allocation method, splitting and multitasking, Multi project resources scheduling - Critical Chain Scheduling - Concept of critical chain scheduling - critical chain scheduling method, application of Critical chain scheduling and limitations.

UNIT IV PROJECT QUALITY MANAGEMENT

ç

Concept of project quality, responsibility for quality in projects, quality management at different stages of project, tools and techniques, Quality Management Systems, TQM in projects - Project Performance Measurement and Control - Monitor and assess project performance, schedule, and cost.Earned Value Management, performance measurement methods to monitor, evaluate and control planned cost and schedule performance - Project Closure/ Termination - Meaning of closure/ termination, project audit process, termination steps, final closure.

UNIT V FINANCIAL ACCOUNTING

9

Balance sheet and related concepts - Profit & Loss Statement and related concepts - Financial Ratio Analysis - Cash flow analysis - Funds flow analysis - Comparative financial statements. Investments - Average rate of return - Payback Period - Net Present Value - Internal rate of return.

Total: 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the concept and characteristics of project management and	Understand
	application of resource scheduling and critical chain scheduling.	
CO.2	Apply the concept of CPM and PERT to develop the project network.	Apply
CO.3	Estimate the suitable resources required for given project work.	Apply
CO.4	Examine the various tools and techniques at different stages of Quality	Analyze
	management.	
CO.5	Construct the balance sheet to identify the fund flow and cash flow	Apply
00.5	statements.	
CO.6	Evaluate the decision related to forecasting,inventory,quality control problems	Evaluate
55.0	for industries.

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Illustrate the concepts of estimation, costing, Tenders, Contracts and Valuation.	Understand
CO.2	Apply the knowledge of estimation and costing to compute the various rates of work, detailed estimate and standard rent in construction projects.	Apply
CO.3	Estimate the construction materials and labour using computer software.	Apply
CO.4	Analyze the construction of projects with estimation, valuation and tendering.	Analyze
CO.5	Evaluate the item of works, material and rate analysis for various construction projects with a detailed reports	Analyze
CO.6	Plot the drawings and estimate the quantities of various items in building structures using computer software.	Analyze

21UCE707 STRUCTURAL DESIGN SOFTWARE LABORATORY	С
	1
 Course Learning Objectives: Enhance the ability to perform modeling, drafting, designing practice and interpretation of results final design for civil engineering infrastructure. To select the suitable software that can perform multi engineering tasks efficiently and satisfy m specific users demands. Facilitate the use of spread-sheets to get well verse in design of structural elements and concrete design. 	ore
design. LIST OF EXPERIMENTS	

I.	Design Software	15
1.	Analysis of Flexure Member	
2.	Analysis of Compression Member	
3.	Analysis of Plane Truss	
4.	Seismic Analysis of Two storied 2D Portal frame	
5.	Seismic Analysis of 3D Portal frame.	
II.	Project Management Software	10
1.	Constructing Project: create WBS, Activities, and tasks and Computation Time using	
	Excel spread sheet and transferring the same to Project management software.	
2.	Constructing Network diagram (AON Diagram) and analyzing for Critical path,	
	Critical activities and other non-Critical paths, Project duration, Floats.	
3.	Basic understanding about Resource Creation and allocation	
4.	Understanding about Splitting the activity, Linking multiple activity, assigning	
	Constrains, Merging Multiple projects, Creating Baseline Project.	
III.	Microsoft Office Software	5
1.	Design of Singly reinforced rectangular beam.	
2.	Design of Doubly reinforced rectangular beam.	
3.	Design of One-way slab.	
4.	Design of Two way slab.	

TOTAL – 30 Periods

COs	CO Statements	BT Levels
CO.1	Use software skills in a professional set up to automate the work and thereby reduce cycle time for completion of the work.	Apply
CO.2	Proficiently use Excel to undertake engineering calculations.	Analyze
CO.3	Select appropriate techniques to solve engineering problems with their limitations.	Evaluate
CO.4	Create the feasibility analysis in Project Management and network analysis tools for cost and time estimation, thereby creating any building project.	Create
CO.5	Analyze the various softwares in construction industries.	Analyze
CO.6	Apply the domain in software areas in quality purpose.	Apply

21UCE735	Internship Training	L	Т	Р	С
21002700	internantp training	0	0	0	1

- Totrainthestudentsinthefieldworksoastohaveafirsthandknowledgeofpracticalproblemsrelated toCivilEngineeringincarryingoutengineeringtasks.
- Todevelop skillsinfacingandsolvingthefield problems..

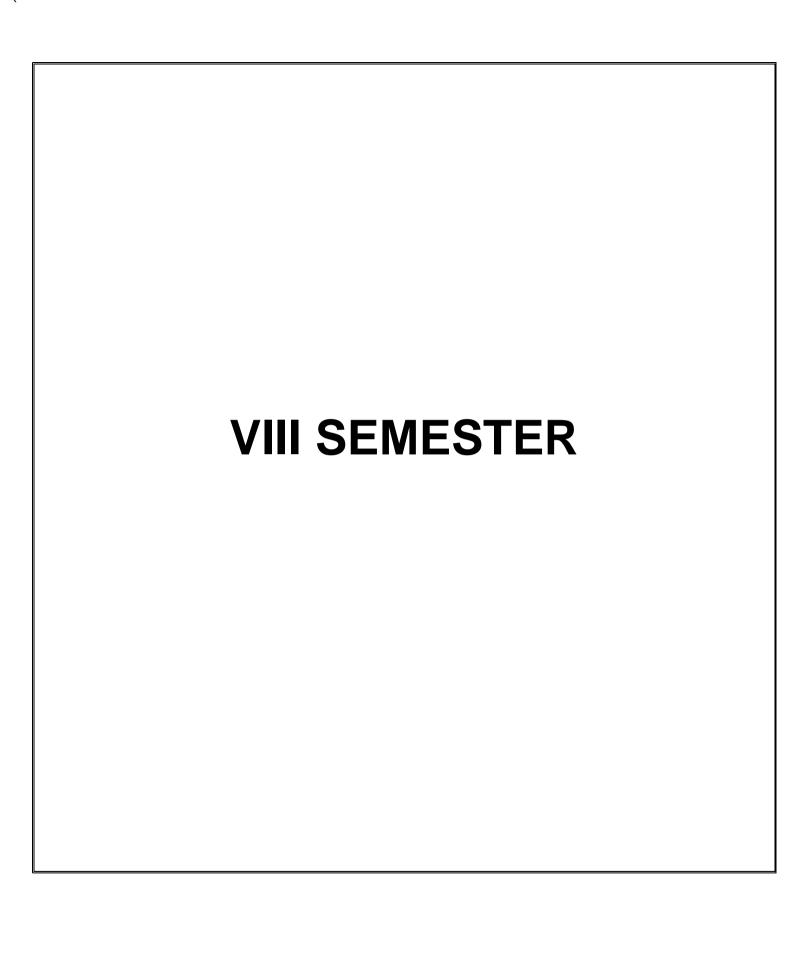

DESCRIPTION

The students individually undertake training in reputed Civil Engineering Companies during the summer vacation for a specified period of four weeks. At the end of training, a detailed report on the work done should be submitted. The students will be evaluated through a viva-voce examination by a team of internal staff.

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Tackle practicalfield/industryorientatedproblem relatedto CivilEngineering	Apply

21UCE801	PROJECT WORK	L	Т	Р	С
		0	0	16	8

- To develop the ability to solve a specific problem right from its identification and literature review till the successful solution of the same.
- To train the students in preparing project reports.
- To prepare the students to face reviews and viva voce examination.

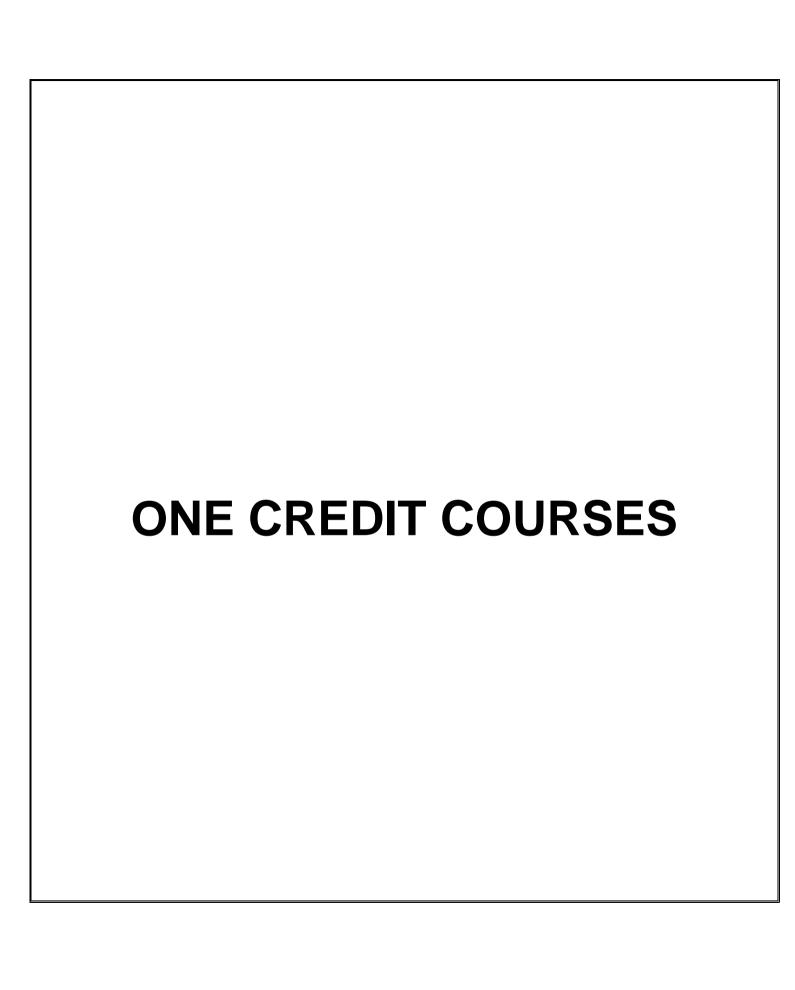

DESCRIPTION

The student works on a topic approved by the head of the department under the guidance of a faculty member and prepares a comprehensive project report after completing the work to the satisfaction of the supervisor. The student will be evaluated based on the report and the viva voce examination by a team of examiners including one external examiner.

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Design/Develop sustainable solutions for societal issues with environmental considerations applying the basic engineering knowledge.	Create
CO.2	Analyze and review research literature to synthesize research methods including design of experiments to provide valid conclusion.	Analyze
CO.3	Utilize the new tools, techniques to provide valid conclusion following the norms of engineering practice.	Apply
CO.4	Test and Evaluate the performance of the developed solution using appropriate techniques and tools.	Evaluate
CO.5	Apply management principles to function effectively in the project team for project execution.	Affective Domain
CO.6	Engage in learning for effective project implementation in the broadest context of technological change with consideration for public health, safety, cultural and societal needs.	Affective Domain
CO.7	Write effective reports and make clear presentation to the engineering community and society.	Psychomotor Domain

21UCE861	GREEN BUILDING CONCEPTS	L	T	Р	С
		1	0	0	1

• To understand the necessity of adopting the basic green building concepts.

Introduction to Global Warming - Sources of global warming - Green buildings: Concepts - Rating - Rating by various agencies - Materials used and their Efficiency - Comparison of conventional & green buildings - Environment friendly and cost effective building technologies - Buildings with cost and energy efficient roofing systems - Building in different climatic regions

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply green building concepts in buildings.	Apply

- 1. Jerry Yudelson,"The green building revolution", Island press,2010.
- 2. Abe Kruger and Carl Seville, "Green building: principles and practices in residential construction", Cengage learning, 2012.

21UCE862	DESIGN OF SCAFFOLDING	L	T	Р	С
		1	0	0	1

• To impart knowledge to plan, prepare and design the scaffolding.

Definition –Requirements and Principles of scaffolding- Types of scaffolding: Standing Scaffolds – Timber Scaffolding –Tube Scaffolding in steel / Aluminium – Scaffolding with Proprietary Equipment –Free standing scaffolds –Suspended Scaffolds - Putlog and Independent scaffold, Single pole scaffolds –Special Scaffolds for tunnel, chimney, open well, oil well, cooling towers, deep foundation, sky scrapper buildings, precast structures, prefabricated structures and composite structure scaffolding – Rigging for Scaffolders - Erection, Alteration and Dismantling – Performance Requirements for Scaffold planks – Design of scaffolding – Maintenance of scaffolding – Formworks.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the types of scaffolding based on requirements	Understand
CO.2	Discuss the various materials used in scaffolding.	Understand
CO.3	Describe the erection process of scaffolding	Remember
CO.4	Describe the concepts of alteration and dismantling of scaffolding	Understand
CO.5	Explain the maintenance of scaffolding	Understand

Textbooks:

- 1. B.T. Batsford, "Temporary structure design", Fb & c Limited 2016.
- 2. Willey. "scaffolding", John villey sons, 2012.

- 1. Jimmy W. Hinze, "Construction Safety", Prentice Hall Inc., 1997.
- 2. Richard J. Coble, Jimmie Hinze and Theo C. Haupt, "Construction Safety and Health Management", Prentice Hall Inc., 2001.
- 3. SP:70, BIS, "Hand Book on Construction Safety Practices", 2001
- Rajput.R.K., "Engineering Materials", S. Chand and Company Ltd., 2008.
 Shetty, M.S, "Concrete Technology, Theory and Practice", Chand Publishing, New Delhi, 2018.

Course Learning Objectives:

• To emphasis the importance of ground water conservation

Need of planned utilization of water resources - economics of water resources utilization Water conservation - water harvesting - rainfall- run off relation - water storage in ponds, lakes, reservoirs and aquifers –Types of Pond - selection of pond site – Seepage control - methods-evaporation control-Recycling of harvested water - conservation forestry-water shed management - groundwater recharge through wells - check dams and storage works –. Renovation of water bodies.(Case Study)

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply appropriate rainwater harvesting techniques.	Apply

- 1. Santhosh Kumar Garg, Hydrology and water resources engineering, Khanna Publishers, New Delhi. 2019.
- 2. G.L.Asawa,Irrigation and Water Resources Engineering ,New Age International (P) Ltd.,Publishers, New Delhi 2008.

Course Learning Objectives:

• The objective of this course is to study various faces of construction safety and cause of major injury.

Safety Management

Construction Safety Management – Role of various parties, duties and responsibilities of topmanagement, site managers, supervisors etc. role of safety officers, responsibilities of general employees, Safety committee, safety training, incentives and monitoring. Writing safety manuals, preparing safety Checklists and inspection reports.

Safety operations AND Safety equipment

Safety in construction operations – Safety of accidents on various construction sites such as buildings,dams, tunnels, bridges, roads, etc. safety at various stages of construction. Prevention of accidents. Safety measures. Safety in use of construction equipment e.g. vehicles, cranes, hoists and lifts etc. safety of scaffolding and working platforms. Safety while using electrical appliances. Explosives used. Various safety equipment and gear used on site. First aid on site, Safety awareness program. Labor laws, legal requirement and cost aspects of accidents on site, Incentive for safety practices. Study of safety policies, methods, equipment, training provided on any ISO approved construction Company, safety in office, working on sites of high rise construction, deep excavation.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the principles of management and safety procedure in construction	Apply

Text Books:

- 1. Construction safety manual published by National Safety Commission of India.
- 2. Safety Management in Construction Industry A manual for project managers. NICMAR Mumbai.

- 1. Construction Safety Handbook Davies V.S.Thomasin K, Thomas Telford, London.
- 2. ISI for safety in Construction Bureau of Indian Standrads.
- 3. Safety managementll -Girimaldi and Simonds, AITBS, New Delhi.

21UCE865	EFFLUENT TREATMENT PLANT	L	T	Р	С
1.00200		1	0	0	1

• To give sound knowledge with understanding of waste water treatment technologies to the students.

Domestic Wastewater Treatment, - Wastewater characteristics; Primary, secondary and tertiary treatment-Physical Unit Processes: Screening; Commutation; Grit Removal; Equalization; Sedimentation - Biological Unit Processes - Aerobic vs. anaerobic processes - Aerobic treatment; Suspended growth aerobic treatment processes; Activated sludge process and its modifications; Attached growth aerobic processes; Tricking filters and Rotating biological contactors - Anaerobic treatment; suspended growth, attached growth, fluidized bed and sludge blanket systems; nitrification, denitrification; Phosphorus removal - Sludge Treatment - Characteristics of sewage sludge- Sludge thickening, sludge digestion, dewatering, drying, Aerobic sludge stabilization- Anaerobic stabilization of sludge and Composting - Water Treatment Plant Characteristics, Plant layout -Operations and maintenance of Treatment plants, Trouble Shooting, - Filtration, Softening of Water, Defluoridation, Removal of Odors -Treated Municipal Wastewater Discharge Systems, Post treatment techniques- - Visit to a municipal wastewater treatment plant and a small plant.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Design and maintain waste water treatment plant based on the characteristics of waste water.	Apply

- 1. Garg, S.K., "Environmental Engineering I & II", Khanna Publishers, New Delhi, 2013.
- 2. Modi, P.N., "Environmental Engineering I & II", Standard Book House, Delhi, 2012.
- 3. Manual on Water Supply and Treatment, CPHEEO, Government of India, New Delhi, 1999.
- 4. Manual on Sewerage and Sewage Treatment, CPHEEO, Government of India, New Delhi, 1993.
- 5. Hand book on Water Supply and Drainage, SP35, B.I.S., New Delhi, 1987.
- 6. Metcalf and Eddy, M.C., "Wastewater Engineering Treatment & Reuse", Tata McGraw-Hill Publications, New Delhi, 2003.

21UCE866	CORROSION OF STEEL IN CONCRETE AND PREVENTIVE	L	T	Р	С
21002000	MEASURES	1	0	0	1

 The course will provide the students with in-depth knowledge of corrosion and corrosion control techniques.

Corrosion of steel in concrete - Causes and mechanisms of corrosion and corrosion damage in concrete - Carbonation - Chloride attack - Corrosion damage - Vertical cracks and horizontal cracks-Preliminary survey - Detailed survey. - Visual inspection - Delamination - Cover - Half cell potential measurements - Carbonated depth measurement - Chloride determination - Resistivity measurement - Corrosion rate measurement-Basic principles of electrochemical techniques - Cathodic protection - design. Control criteria -System installation - Cathodic protection of prestressed concrete - Cathodic protection of epoxy coated reinforcing steel-Cathodic Protection in Concrete Structures - Laboratory and field studies.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply various types of corrosion control techniques in field	Apply

- 1. Corrosion of Steel in Concrete by Broomfield John P. (Taylor & Francis).
- 2. Corrosion of Steel in Concrete Structures (Wood head Publishing Series in Civil and Structural Engineering) Hardcover Import, 15 February 2016).

21UCE867	BUILDING PLANNING AND BYELAWS	L	T P (С	
2133233		1	0	0	1

• To create awareness about building bye laws and development control rules

Objective and principle of planning – Types of building – residential, apartment, commercial, public and industrial – Space standards for buildings – Approval plans and layout preparation and online submission – Field measurement book preparation - General building codes - regulation and Byelaws – Necessity, objects and importance of byelaws – Function of local body authority – Responsibility of building owner – Implementation and applicability of byelaws – Necessity of Setback – Light plane – Plot coverage – Built up area, plinth area, carpet area, Floor space index – Maximum height of buildings and width of street – Off-street parking, Fire protection – Ventilation, lighting, sanitation, rain water harvesting system, STP, compound wall, playground, amenities as per local body authority byelaws – Building Insurance - Real estate Act 2016 - DTCP, CMDA rules.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Prepare the building plans and layouts as per byelaws.	Apply
CO.2	Solve the real estate distributes.	Apply
CO.3	Handle the arbitration issues in buildings.	Evaluate

- 1. Sane Y. S., "Planning and Design of buildings", Malik & May, New Asian Publishers, New Delhi.
- 2. Tamilnadu Combined Development and building rules-2019.
- 3. Development Control Rules, CMDA, 2010.
- 4. Development Control Rules for Chennai Metropolitan Area, CMA, Chennai, 2004.
- 5. "National Housing Policy", Government of India, 1994.
- 6. Shah M G., "Building Planning & Drawing", Tata Mc Graw hill.
- 7. National Building Code of India 2016, Volume 1&2.
- 8. Model building byelaws 2016.

21UCE868	AUTOMATION IN CONSTRUCTION	L	Т	TP	С
2100200		1	0	0	1

To get knowledge about application of automation and use of robots in construction.

Concept and application of Building Management System (BMS) and Automation - art in construction automation- Field sensors actuators, controllers, non-destructive evaluation, data acquisition, examples of sensors in existing automated equipment-Off- site automation in construction Information processing (computer applications), materials processing, case study (concrete batch plant) - Existing and prototype equipment for construction – case study (concrete placement and finishing), final product design session-Automation and robotic technologies for customized component, module and building prefabrication-- Site automation - robotic on site factories.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the application of building management system and automation in on and off site projects.	Understand
CO.2	Solve the construction issues through robotic techniques.	Apply

Textbooks:

- 1. Javad Majrouhi Sardroud, (2011), "Automated Management of Construction Projects" LAP Lambert Academic Publishing.
- 2. Wang Shengwei, (2010), "Intelligent Buildings and Building Automation" Taylor & Francis Group.

- 1. Majrouhi Sardroud Javad, (2014), "Automation in Construction Management" Scholars' Press.
- 2. HongleiXu and Xiangyu Wang, (2014), "Optimization and Control Methods in Industrial Engineering and Construction (Intelligent Systems, Control and Automation: Science and Engineering)" Springer

21UCE869	BUILDING ENERGY AUDIT	L	T	Р	С
		1	0	0	1

 To create awareness among students about the importance of energy conservation and the need of energy audit.

Introduction:

Energy scenario-Role of Energy Managers-Energy Monitoring- Energy Audit - Economics of various energy conservation schemes - Total Energy system.

Case studies: Energy conservation in steam systems-Energy conservation in cooling towers &spray ponds-Energy efficiency in lighting.

Energy Efficient Buildings:

Architecture- Building Science and its significance- Human Comfort- Classification of building materials based on energy intensity- Microclimate - Energy Management of Buildings and Energy Audit of Buildings-Energy Efficient Landscape Design.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Analyze various energy conservation schemes.	Analyze
CO.2	Evaluate various case studies on energy conservation and Prepare model to	Apply
CO.2	solve issue.	Apply

Textbooks:

 Eastop T.D & Croft D.R, Energy Efficiency for Engineers and Technologists, Logman Scientific & Technical, ISBN-0-582-03184, 1990.

- 1. SodhaM., Bansal, N.K., Bansal, P.K., Kumar, A., and Malik, M.A.S., "Solar Passive Buildings", Pergamon Press, 1986.

21UCE870	HEALTH MONITORING OF STRUCTURES	L	T P	С	
		1	0	0	1

 The course will provide the students with in-depth knowledge of technologies in structural health monitoring using smart materials as sensing and actuating elements to interrogate the structures.
 Damage detection techniques such as wave, impedance, and vibration-based damage detection techniques will be discussed and applied to different types of structures.

Introduction and Concepts of SHM- Various Measures-Structural Safety in Alteration- Factors affecting Health of Structures-Causes of Distress-Regular Maintenance-Assessment of Health of Structure-Types of Static Tests-Types of Dynamic Field Test.-piezo-electric materials and other smart materials, electro-mechanical impedance (EMI) technique, adaptations of EMI technique- Damage detection techniques -Applications of structural health monitoring in airspace including sandwich composite structures, civil infrastructures, pipelines, rotating machinery- Case Studies (Site Visits).

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Implement fundamental concepts in structural health monitoring, sensors and	Understand /
60.1	classify various diagnostic methods of structural health monitoring	Remember
CO.2	Analyze damage assessment of existing or failure structures	Analyze
CO.3	Select a viable structural health monitoring methodology for a given	Modern tool
CO.3	application based on available technology	usage
CO.4	Make an effective communication and presentation as a Individual / team in	Communication
00.4	damage assessment problems	Communication

- 1. Structural Health Monitoring, Daniel Balageas, Claus_Peter Fritzen, Alfredo Güemes, John Wiley and Sons, 2006.
- 2. Health Monitoring of Structural Materials and Components_Methods with Applications, Douglas E Adams, John Wiley and Sons, 2007.
- 3. Structural Health Monitoring and Intelligent Infrastructure, Vol1, J. P. Ou, H. Li and Z. D. Duan, Taylor and Francis Group, London, UK, 2006.
- 4. Structural Health Monitoring with Wafer Active Sensors, Victor Giurglutiu, Academic Press Inc,2007.

21UCE871	ARTIFICIAL INTELLIGENCE IN CIVIL ENGINEERING	L	T	Р	С
ZIUCEO/I	ARTIFICIAL INTELLIGENCE IN CIVIL ENGINEERING	1	0	0	1

• To impart the students with Artificial Intelligence concept to solve Civil Engineering problems.

Introduction to Artificial Intelligence-Necessities-Development of Artificial intelligence – Potential application of Artificial Neural Network Intelligent- Optimization methods in civil engineering-Genetic algorithms- Application of Artificial Intelligence- Structural Health Monitoring- durability evaluation –Waste management- Concrete Mix Design –Estimation – Neuromodex, Decision making – Modelling initial Design process using ANN-Planning of construction projects- construction Robots – application of GIS –Tidal forecasting- Earthquake Induced liquefaction-Introduction to fuzzy logic – Advantages.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply AI to solve basic and complex Civil Engineering problems.	Apply

- 1. "Artificial Intelligence A practical approach", Rajiv Chopra, S CHAND & Company Limited, 2012.
- 2. "Optimization and Artificial Intelligence in Civil and Structural Engineering" B.H.V.Topping, Springer Science Business Media.

21UCE872	PRACTICAL ASPECTS OF ARCHITECTURE	L	Т	Р	С
		1	0	0	1

- To give exposure about architectural principles in the design of buildings.
- To impart knowledge in the national traditions and the local regional heritage in architecture, landscape design including the verna cular tradition.
- To demonstrate competency in the technical, practical skills of landscape architecture and their role in investigating complex and innovative ideas.

Orientation and Planning of Buildings - factors affecting orientation – Sun – Wind – Rain – orientation criteria for Indian conditions – Planning– Specifications and standards-planning of buildings –case studies – Interior Design - Decorative materials – Cement bonded boards, water proof cement – paint - industrial glazing and roofing- masonry - Plaster and dry wall- wall surface materials - effect of colour – Home furnishing – Preparation of interior design plans - case studies- Landscape Design - Principles - Site planning - Design – Styles - Elements and materials - Plant characteristics and design - Landscape planning - case studies.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the architectural principles in the design of buildings and interior spaces.	Understand
CO.2	Make plan for the buildings by considering our Indian climatic conditions.	Apply
CO.3	Choose the various building material as per the interior design aspects.	Evaluate
CO.4	Perform landscape architecture according to the environmental conditions.	Analyze

- 1. Francis D.K.Ching, "Architecture: Form, Space and Order", John Wiley & Sons, Inc. 2007.
- 2. Mohmohan, MuthuShoba G, "Principles of Architecture" Oxford University Press, New Delhi, 2009.
- 3. Edward D.Mills, "Planning and Architects Handbook", Butterworth London, 1995.
- 4. Paul Alan Johnson, "The Theory of Architecture: Concepts, Themes & Practices", John Wiley & Sons, Inc.1994.

21UCE873	APPLICATION OF ROBOTICS IN CIVIL ENGINEERING	L	T	Р	С
		1	0	0	1

• To study possible applications of robotics to the various building construction tasks.

Objective and Introduction – Applications-automated systems in construction-Need for robots--ways of Transformations by robotics-Automated technology-Altered workforce-3Dprinting-Demolition-Brick laying-Off-site prefabrication systems, - On-site automated and robotic systems, - Drones and autonomous vehicles-Exoskeletons-Fire proofing spray robot -Steel-beam positioning manipulator-Ceiling-panel-positioning robot Wall-finishing robot -Spray-coating robot- challenges facing automation and robotics in construction.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Apply the general feasibility of robotic application at the present and future state of building	Apply
CO.2	Procedure for detailed planning and evaluation of robotic application	Evaluate
CO.3	Analyze the feasibility of using robots in building construction.	Analyze

- 1. Thomas Bock, Technische Universität München, Thomas Linner, Technische Universität Munchen, Volume 3, Cambridge University Press,2016.
- 2. Robotics and Automation in Construction, Carlos Beleaguer, Mohamed Abderrahim, e book-2008.

21UCE874	DRONE SURVEYING	L	Т	Р	С
		1	0	0	1

This course will give you the knowledge to start performing drone based surveying; Visual images, maps, and models are the most common deliverables. By utilizing different sensors and capture methods, drones are able to provide useful data to a wide range of industries. This course will show you how to do this and more.

Introduction to Drone Mapping-Types of Drone-Sensors and drone innovation – Potentional uses of drones-Photogrammetry ,Digital Photogrammetry Theory-Photography Principles in Photogrammetric Surveys-Controlling a Survey, Photo Capture- Data Processing-Data Extraction-Data Accuracy, Quality Assurance-Equipment, Planning Your Photogrammetry Survey –Drone regulation- Case Studies.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Identify Drone Mapping and Photogrammetry.	Analyze
CO.2	Evaluate Data Extraction and Data Processing.	Evaluate
CO.3	Apply Technical skills on Topographical and Mapping Surveying.	Apply

- 1. Baichtal, "Building Your Own Drones: A Beginners' Guide to Drones, UAVs, and ROVs", Que Publishing, 2016.
- 2. Austin, Unmanned Aircraft Systems: UAVS Design, Development and Deployment. Wiley, 2010.
- 3. Sebbane, Smart Autonomous Aircraft: Flight Control and Planning for UAV. CRC Press, 2015.
- 4. Zavrsnik, Drones and Unmanned Aerial Systems: Legal and Social Implications for Security and Surveillance. Springer, 2015.

21UCE875	RECYCLED CONSTRUCTION MATERIALS	L	Т	Р	С
		1	0	0	1

To provide students an exposure on manufacturing of concrete paver blocks.

Introduction – Types of Recycled Materials – Recycled Aggregates – Ceramic Waste Materials – Rubber Materials – Industrial Waste Materials – Fly ash Materials – E waste Materials – Recycled Plastic Materials – Light Weight Building Materials – Recycled Unfired Clay Bricks materials – Recycled glass Materials – Construction and demolition waste materials – Recycled Concrete Materials – Physical and Chemical Properties of Recycled construction Materials – Salient Features of Materials – Applications of Recycled Materials – Merits and Demerits – Case Studies.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Choose suitable sustainable waste materials used in concrete constructions	Apply
60.1	for the application in field.	
CO.2	Investigate the recycled material characteristics for the real world	Evaluate
60.2	constructions.	

- 1. Muller, Recycling Building Materials, Springer Publishing Pvt Ltd, 2021.
- 2. Ravindra K.Dhir, Sustainable Construction Materials Recycled Aggregates, Woodhead publishing Pvt Ltd. 2019.
- 3. Alan Richardson, Reuse Materials and Byproducts in Construction, Kindle Edition, Springer Publishing Pvt Ltd, 2013.

21UCE876	PRACTICAL BUILDING INFORMATION MODELING	L	T	Р	С
1.0020.0		1	0	0	1

• To impart knowledge about BIM concept, standards, tools and techniques in the construction industry.

BIM Introduction – BIM uses – BIM dimensions – Understanding an Organization requirement for BIM – Preparing a BIM briefing document to organization – Understanding client requirement – BIM documents for initial stage of the project – Develop an Employer's Information requirement(EIR).

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand a BIM briefing document for client, developing an EIR based on	Understand
00.1	client requirement.	
CO.2	Preparing a Pre and Post contract BIM Execution Plan.	Apply
CO.3	Preparing a Post-Handover report.	Apply
CO.4	Quantity extraction from BIM model using iTWOcostX.	Analyze
CO.5	Detailed Estimate preparation for a BIM model.	Apply

- 1. BIM and Construction management Brad Hardin.
- 2. Understanding BIM Jonathan Ingram.
- 3. iTWOcostX manual INFINITY PMC SOLUTIONS PVT LTD.

21UCE877	BUILDING SAFETY	L	T	Р	С
		1	0	0	1

- To understand the operational safety.
- To understand the safety management.

Fire triangle-principles of fire extinguishing- various classes of fires- A, B, C, D types of fire extinguishers- Industrial fire protection systems. Sprinklers- Fire hydrants- Alarm and detection systems- other suppression systems- CO2 system, foam system and DCP system. Incident Recall Technique (IRT), disaster control, Job safety Analysis, Safety survey, safety inspection. Safety training programs, seminars, conferences, competitions- method of promoting safe practice motivation-creating awareness, awards, celebrations, safety posters, safety displays, safety incentive scheme- domestic safety and training.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Prepare the fire prevention and protection.	Apply
CO.2	Summarize the safety management techniques.	Analyze

TEXT BOOKS:

- 1. John V. Grimaldi and Rollin H. Simonds, "Safety Management", All India Travellers Book Seller, New Delhi. 2019.
- 2. Derek, James, "Fire Prevention Hand Book", Butter Worths and Company, London, 2016.

- 1. Dan Peterson, "Techniques of Safety Management", McGraw Hill Company, Tokyo, 2016
- 2. "Accident Prevention Manual for Industrial Operations", N.S.C. Chicago, 2015.

21UCE878	BAR BENDING AND DUCTILE DETAILING	L	T	Р	С
1.002070		1	0	0	1

• To provide adequate toughness and ductility to resist severe earthquake shocks without collapse.

Bar bending:

Introduction, Code of practice for ductile detailing of reinforced concrete structures subjected to seismic forces (IS 13920: 2003), web reinforcement, vertical stirrups and lap splices, ties and hoops, transverse reinforcement for rectangular and circular column, Ductile detailing for flexural members and compression members.

Ductile Detailing:

Introduction, Code of practice for ductile detailing of reinforced concrete structures subjected to seismic forces (IS 13920: 2003), web reinforcement, vertical stirrups and lap splices, ties and hoops, transverse reinforcement for rectangular and circular column, Ductile detailing for flexural members and compression members.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

C	COs	CO Statements	BT Levels
C	CO.1	Read/Understand routine drawings/sketches and bar bending schedule.	Understand

- 1. Bar bending schedules of structural members in civil engineering structures Benjamin N Wobu.
- 2. IS13920: Ductile Detailing of RC Structures subjected to Seismic Forces.

21UCE879	GLOBAL CLIMATE CHANGE AND VULNERABILITY ASSESSMENT	L	Т	P C 0 1	С
_,		1	0	0	1 1

- To explain the basic concepts of climate change science.
- To import outline key elements of a vulnerability assessment.

Introduction - the basics of climate change science - climate, weather and the greenhouse gas effect- important greenhouse gases- impacts of climate change on surface temperature, precipitation, ocean pH, sea-level and Arctic sea-ice extent- policy framework to address climate change - highlights ways to measure vulnerability-framework for assessing climate vulnerability. - The political context to greenhouse gas emission-Integrate mitigation-Economic sectors for mitigation actions- elements of national planning for climate finance.

TOTAL - 15 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the fundamentals of climate change science.	Understand
CO.2	Analyze different climate change scenarios and their implications.	Analyze
CO.3	Evaluate the key elements of a vulnerability assessment.	Evaluate
CO.4	Analyze main elements of national planning for climate finance.	Analyze

- 1. Edmond A. Mathez and Jason E. Smerdon , Climate Change: The Science of Global Warming anOur Energy Future, 2018.
- 2. Andreas Schmittner, Oregan State University,Introduction to Climate Science, https://open.oregonstate.education/climatechange/,2017.

21UCE880	21UCE880 PAVER BLOCK MANUFACTURING AS PER IS CODE	L	T	Р	С
		1	0	0	1

To provide students an exposure on manufacturing of concrete paver blocks.

Introduction – Terminologies – Specifications and types of concrete paving blocks – Mix design for concrete blocks pavements – Ingredients of paver blocks – Dimensions – Physical requirements – Mixing Process, Dry and Wet mix process – Making of concrete paver blocks – Curing process - Method of Testing as per IS code – Correction Factor.

TOTAL - 15 Periods

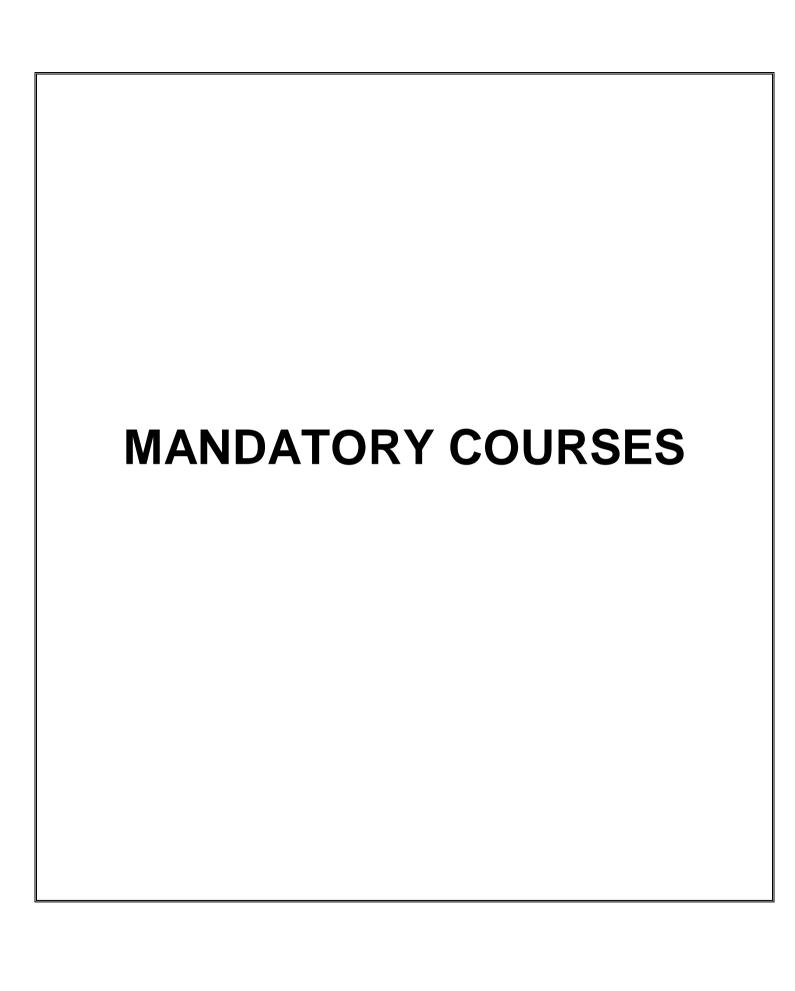

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Choose suitable environmental friendly materials for making concrete paver	Analyze
00.1	blocks.	
CO.2	Design and develop the effective concrete paver blocks as per IS standards.	Apply
CO.3	Investigate the strength and durability parameters of paver blocks for the	Evaluation
CO.3	application in Civil Engineering.	

TEXT BOOKS:

- 1. Wasantha Mampearachchi , Handbook on Concrete Block Paving, Springer in nature Singapore Pvt Ltd, 2019.
- 2. Handbook on advantages of interlocking paver block, Columbia machine Engineering Pvt Ltd, 2019.
- 3. IS 15658 (2006): Precast concrete blocks for paving [CED5: Flooring, Wall Finishing and Roofing].
- 4. M.S.Shetty., "Concrete Technology, Theory & Practice", S.Chand and Co, New Delhi, 2004.
- 5. Varghese.P.C, Building Materials, second edition of Prentice Hall India Learning Pvt.Ltd, (2015).

21UGM2	ENVIRONMENTAL SCIENCE	L	Т	Р	С
--------	-----------------------	---	---	---	---

 Course Learning Objectives: To understand the concepts of Environment and ecosystem. To acquire knowledge about the impact of environmental pollution. To understand the importance of environmental issues in the society. To gain knowledge about the impact of environment related to human health. 	3	0	0	P/F
 To understand the concepts of Environment and ecosystem. To acquire knowledge about the impact of environmental pollution. To understand the importance of environmental issues in the society. To gain knowledge about the impact of environment related to human health. 				
 To acquire knowledge about the impact of environmental pollution. To understand the importance of environmental issues in the society. To gain knowledge about the impact of environment related to human health. 				
 To understand the importance of environmental issues in the society. To gain knowledge about the impact of environment related to human health. 				
To gain knowledge about the impact of environment related to human health.				
 To gain knowledge in alternative energies. 				
Unit I ENVIRONMENTAND ECOSYSTEMS				9
Definition, scope and importance of environment – Need for public awareness – C	once	ptofe	cosy	stem-
Structureandfunctionofecosystem-Producers,consumersand decomposers-Food chains	, fo	od '	webs	and
ecological pyramids – Introduction, types, characteristic features, structure and function	n of	the	(a) I	-orest
ecosystem (b) Aquatic ecosystems (c) Grassland ecosystem.				
Unit II ENVIRONMENTALPOLLUTION				9
Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution	(c) S	Soil p	olluti	on (d)
Marine pollution (e) Noise pollution (f) Thermal pollution- pollution case studies - Role	of a	an ir	divid	ual in
prevention of pollution –Disaster management: floods, earthquake, cyclone and landslides.				
Unit III SOCIAL ISSUES AND THE ENVIRONMENT				9
Water conservation, rain water harvesting, watershed management – Climate change, o	globa	l war	ming	, acid
rain, ozone layer depletion, nuclear accidents and holocaust, case studies. Environmental l	aws//	Acts,	(EPA	١).
Unit IV HUMAN POPULATION ANDTHEENVIRONMENT				9
Population growth, variation among nations – Population explosion – Human rights	s –	Fam	ily w	elfare
programme - Environment and Human Health - Human Rights-Value education - HIV /	AIDS	5 – V	/ome	n and
child welfare – Role of information technology in environment and human health.				
Unit V FUTURE POLICYAND ALTERNATIVES				9
Introduction to future policy and alternatives-fossil fuels-nuclear energy-solar ene	ergy-\	wind	ene	rgy -
hydroelectric energy-geothermal energy - tidal energy – sustainability - green power-nanote	echno	ology		
-	TOT	AL –3	30 Pe	eriods
Course Outcomes:				

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the basic concept of structure and function of ecosystem	Understand
CO.2	Apply the knowledge of various pollution types to prevent the ecosystem and Environment	Apply
CO.3	Analyze the environmental problem to report the social issues and the environment.	Analyze
CO.4	Compare the suitable methods for conservation and sustainable development of natural resources	Analyze
CO.5	Apply the principles of value education with respect to human population to preserve environment	Apply
CO.6	Analyze the current energy crisis and suggest suitable sustainable alternatives that promotes social health and environmental prospects.	Analyze

தமிழர் மரபு

அலகு 1 தொல்லியல் வழியாக அறியப்படும் தமிழர்களின் மரபும் நாகரீகமும்

அறிமுகம் – தொல்லியலின் அடிப்படைக் கூறுகள் – வரலாற்று தரவுகள் – கீழடி தொல்லியல் அகழ்வராய்ச்சி – கீழடி அகழ்வராய்ச்சியின் கண்டுபிடிப்புகள் – மயிலாடும்பாறை அருகே நடந்த அகழ்வராய்ச்சி - சிவகங்கை அருகே நடந்த அகழ்வராய்ச்சி - தமிழ்நாட்டில் நடைபெற்ற அகழ்வராய்ச்சிகளின் பகுப்பாய்வு

அலகு 2 சங்க கால தமிழர் மரபு

அறிமுகம் – சங்க இலக்கியங்கள் – சங்க கால அரசியல் வரலாறு – சங்க கால அரசியலும் அரசு நிர்வாகமும் – சங்க கால சமூகம் – சங்க கால சமூகத்தில் மகளிரின் நிலை – சங்க கால பொருளாதாரம்

அலகு 3 பண்டைய தமிழர் மரபு மற்றும் வரலாற்றின் ஆதாரங்கள்

கிரேக்க மற்றும் ரோமானிய இலக்கியங்களில் தமிழ்நாடு பற்றிய சான்றுகள் -தொல்லியல் ஆதாரங்கள் – தமிழ் இலக்கிய ஆதாரங்கள் – தமிழர் வரலாறு பற்றி பிறமொழி இலக்கியங்களில் உள்ள சான்றுகள் - கல்வெட்டு ஆதாரங்கள் – குகை ஓவியங்கள், சிற்பங்களில் உள்ள ஆதாரங்கள் – பண்டைய மண்பாண்ட பொருட்களின் சான்றுகள் – நாணயவியல் ஆதாரங்கள்

அலகு 4 பண்டைய தமிழர் இலக்கியம் மற்றும் மரபின் தொன்மைக்கான ஆதாரங்கள்

தமிழ் இலக்கியங்கள் – இந்தியாவின் மிக ஆரம்பகால எழுத்து வடிவம் – (தமிழ் பிராமி எழுத்து வடிவம்) – பண்டைய தமிழகத்தின் இலக்கியப் பணிகள் – தொல்காப்பியம் – திருக்குறள் மற்றும் நாலடியார் – தொன்மை தமிழ் இலக்கியங்களை தடமறிந்து கண்டடைந்த உவே சாமிநாத ஐயர் – தமிழ் – ஒரு உயர்தனிச் செம்மொழி

Course Learning Objectives:

• To introduce basic concepts relating to gender and to provide logical understanding of gender roles.

Unit I GENDER SENSITIZATION

10

Definition of gender, Perspectives-Gender sensitive approach- Gender and sex- Social construction of gender and gender roles- Socialisation- institutions of socialization- changing content and context of gender-need for re-socialization. Gender Stereotyping and Gender Discrimination.

Unit II GENDER EQUALITY AND CONSTITUTION

10

Indian constitution related to equality - Fundamental rights - Directive principles of state policy - right to equality - rights against exploitation - cultural and educational rights - the right to constitutional remedy - University Declaration of Human Rights - Enforcement of Human Rights for Women and Children - Role of Cells and CounsellingCentres- Internal Complaints Committee - Legal AID cells, Help line, State and National level Commission.

Unit III GENDER ROLES & EQUALITY

10

Gender & Morality – Structural and functionalist views of Gender- Gender in the Classroom- Beyond access for girls and boys- Gender equality in schools- Gender equality and adult basic education- Developing capacity to achieve gender equality in education- Individuality and removal of gender stereotypes- Respect for each other's-Promote equal Opportunity.

TOTAL: 30 PERIODS

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the social construction of gender and sexuality and their influence in social context.	Understand
CO.2	Analyze how the concepts of gender equality are created, maintained, and/or challenged.	Analyze
CO.3	Apply concepts of gender roles and equality in classroom, school, disciplinary or interdisciplinary creative, scholarly, and/or activist project.	Apply

COURSEOBJECTIVE:

- Thestudentswillbeexposedtofundamentalrights&dutiesinIndian Constitution.
- Thestudentswillbegivenknowledgeonthecomponentsoftheparliamentarysystem to prepare for the process of their career development.
- The student will have knowledge on powers and functions of Local bodies and Indian polity to appear for various competitive exams such as UPSC, TNPSC and RRB...
- Thestudentwillknowaboutthe functionsofjudiciaryandelectoralprocessfollowedinthe country.

Unit I INTRODUCTIONONINDIANCONSTITUTION

Preamble - Salient features of the Constitution of India. Fundamental Rights - its restriction and limitations in different Complex Situations. Directive Principles of State Policy (DPSP) - Fundamental Duties: its Scope and significance in Nation building - Constitution components: schedule, parts and articlesofconstitution-importantAmendmentsofconstitution.

Unit II PARLIAMENTARYSYSTEM

Parliamentary System —parliamentary system of other countries - Indian parliamentary system- Federal System —LS and RS,Centre-State Relations-Election of member of parliaments- Union Executive-President,PrimeMinister,UnionCabinet.StateLegislature -StateExecutives—election ofMLA-Governor,ChiefMinister,StateCabinet.

Unit III JUDICIARYANDELECTIONCOMMISSION

Supreme Court of India: Structure, Power and Functions of Supreme Court-- Judicial Reviews - Judicial Activism. High Court and Subordinate Courts: Structure, Power and Functions. — Lokadhalats.Elections-ElectoralProcess-ElectionCommissionofIndia-ElectionLaws —

EmergencyProvisions-typesofEmergenciesanditsconsequences.

Unit IV LOCALADMINISTRATION

LocalAdministration:PowersandfunctionsofMunicipalitiesandPanchayatsSystem-Panchayat Raj- Co-operative Societies and Constitutional and Non-constitutional Bodies.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the ethical responsibilities of municipalities, panchayats and co-	Understand
00.1	operative societies.	
CO.2	Manage complex societal issues in society with the knowledge of judiciary	Analyze
00.2	and local administration.	
	Interpret the societal, health, safety, legal and cultural issueswith	Evaluate
CO.3	understanding ofparliamentary system and electoral process through self-	
	learning skills.	
CO.4	Applyknowledgeofthefundamentalrightsanddutiesprescribedbylndian	Apply
CO.4	Constitution to prepare for various competitive examinations.	
CO.5	Analyzethefunctioningoftheparliamentarysystemfollowedin various countries.	Analyze
CO.6	Applyknowledgeofthefundamentalrightsanddutiesprescribedbylndian	Apply
CO.6	Constitution to prepare for various competitive examinations.

- 6. World Community Service Centre, 'Value Education', Vethathiri publications, Erode, 2011.

Course Learning Objectives:

- To acquire hands on experience in design and preparation of structural drawings for concrete structures.
- To give an exposure on the behaviour, analysis and design of R.C. structures.
- To teach the design & detailing aspects of RC structures using software.
- To encountered in Civil Engineering practice using Computer Software Staad Pro, E-Tabs and any Structural design and analysis Software.

Unit I INTRODUCTION AND CODES

9

Geometric Parameters, Grade of concrete and steel for different elements, Exposure and cover requirements, Fire rating, Load Combinations, Serviceability Requirements, Analysis tools. Indian & International Codes for Reinforced concrete Design, Design loads, National Building Code 2016, Practical building example, drawing sizes and scale.

Unit II LOADS ACTING ON STRUCTURES

9

Introduction, Dead, Live loads, Wind loading and Calculations of - force coefficients, Wind pressure, storey forces and base shears. Earthquake loading and Calculations of - acceleration coefficient, Time period, Base shear. Scheme Design, Concrete floor systems, Sizing and design of various slab systems, Beams, Reinforced Concrete Columns - Location and Shape, Design Axial Load, sizing, Lateral Load Systems, IS 1893- Requirements.

Unit III MODELLING OF BASIC STRUCTURAL ELEMENTS

Q

Introduction to Analysis & Modelling, Modelling of Cantilever, Portal Frame, three bay Portal Frame, 3D structural models - Geometry, gravity loads, defining earthquake loads, defining wind loads, Modelling Shear walls, Practical Structural Model of building, Structural models of Floor System, Estimation of deflections.

Unit IV DESIGN OF STRUCTURAL ELEMENTS

q

Design of Beams- flexural reinforcement, shear reinforcement, Design of flat slabs- Flexural Reinforcement, shear reinforcement, Design of 2-way continuous slabs. Design of Reinforcements in Columns, Post processing, Design and arrangement of vertical reinforcement, horizontal reinforcement in the design of buildings. Design of shear walls - Sizing of elements based on Constructability aspects like formwork, concrete placement and compaction, rebar arrangement to satisfy economy and optimum utilization.

Unit V DETAILING OF STRUCTURAL ELEMENTS

Development of Reinforcement, Typical details of- flat slabs, two-way continuous slabs, beams, columns and shear wall, detailing and documentation. Case Studies: Structural analysis and design of a multi-storey building with load calculation (dead, live, wind and seismic) as per Indian standard codes using any Structural design and analysis Software.

Total: 45periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the basic design fundamentals of RC structures and its components.	Understand
CO.2	Apply the engineering knowledge to compute the geometric parameters for various concrete structures.	Apply
CO.3	Apply the basic concept to determine the loads using IS codes and various computational tools.	Apply
CO.4	Analyse the structure for various loads and load combination according to the relevant IS codes.	Analyze
CO.5	Design and Analysis of structures using computer software/tools.	Design
CO.6	Prepare the complete structural drawings using computer software.	Apply/Modern tool Usage

Text Books:

- 3. Punmia.B.C., Ashok Kumar Jain, Arun Kumar Jain, "Limit State Design of Reinforced Concrete", Laxmi Publication Pvt. Ltd., New Delhi, 2007.

IS Codes: (If necessary for your course)

- 1. IS:456-2000 Indian Standard Code of Practice for Plain and Reinforced Concrete.
- 2. SP16-Design Aid for RC to IS 456-1978.
- 3. IS:13920-1993 Ductile detailing of reinforced concrete structures subjected to seismic

R21CEV102 MASONRY STRUCTURES L T P C 3 0 0 3 Course Learning Objectives: To provide knowledge on various materials used in the masonry structures. To provide knowledge on behavior of masonry in compression and effect of masonry unit height on

- compressive strength.
 To develop an understanding on the basic concepts in the behavior and design of masonry structures
- To explain the basic concepts in the design of load bearing masonry structures.
- To explain the behavior of masonry structures during earthquakes.

Unit I INTRODUCTION 9

Introduction, Masonry units, materials and types: History of masonry, Characteristics of Brick, stone, clay block, concrete block, stabilized mud block masonry units. Strength, modulus of elasticity and water absorption. Masonry materials – Classification, properties of mortars & Selection of mortars.

Unit II STRENGTH OF MASONRY IN CONSTRUCTION

under flexural and shear strength.

9

Behavior of Masonry under compression, strength and elastic properties, influence of masonry unit and mortar characteristics, effect of masonry unit height on compressive strength, influence of masonry bonding patterns on strength, prediction of strength of masonry in Indian context, failure theories of masonry under compression. Effects of slenderness and eccentricity, effect of rate of absorption, effect of curing, effect of ageing, workmanship on compressive strength.

Unit III FLEXURAL AND SHEAR BOND

flexural strength and shear strength: Bond between masonry unit and mortar, tests for determining flexural and shear bond strengths, factors affecting bond strength, effect of bond strength on compressive strength, orthotropic strength properties of masonry in flexure, shear strength of masonry, test procedures for evaluating flexural and shear strength. Permissible stresses: Permissible compressive stress, stress reduction and shape reduction factors, increase in permissible stresses for eccentric vertical and lateral loads, permissible tensile and shear stresses.

Unit IV DESIGN OF LOAD BEARING MASONRY BUILDINGS

9

Permissible compressive stress, stress reduction and shape reduction factors, increase in permissible stresses for eccentric vertical and lateral loads, permissible tensile and shear stresses, Effective height of walls and columns, opening in walls, effective length, effective thickness, slenderness ratio, eccentricity, load dispersion, arching action, lintels; Wall carrying axial load, eccentric load with different eccentricity ratios, wall with openings, freestanding wall.

Unit V | EARTHQUAKE RESISTANT MASONRY BUILDINGS

9

Behavior of masonry during earthquakes, concepts and design procedure for earthquake resistant masonry, BIS codal provisions, Masonry arches, domes and vaults: Components and classification of masonry arches,

domes and vaults, historical buildings, construction procedure

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the flexural and shear strength of the masonry walls.	Understand
CO.2	Analyze the behavior of masonry in compression and failure theories in masonry walls.	Analyze
CO.3	Design a masonry wall subjected to various loading and boundary conditions as per codal provisions.	Evaluate
CO.4	Identify and solve masonry structural system subjected to gravity, wind and seismic loadings.	Evaluate
CO.5	Analyze the behavior of masonry in compression and failure theories in masonry walls.	Analyze
CO.6	Application models for the behaviour of structural elements	Apply

21CEV	103	PREFABRICATED STRUCTURES	L	T	Р	С
21027	.00	THE TENSOR IS STREET STREET	3	0	0	3
Course L	earnin	g Objectives:				
• T	o unde	rstand the basic principles of prefabrication.				
• T	o be th	orough with the calculation of handling and erection stresses.				
• T	o know	about dimensioning and detailing of joint.				
• T	o acqui	re knowledge on erection of structures.				
• T	o get fa	amiliar with the design principles of prefabricated units.				
Unit I	INTRO	DUCTION				9
Modular	co-ordi	nation – Standardization - Components - Prefabrication systems and s	tructu	ral s	cher	nes -
Types of	founda	ation - Design considerations - Economy of prefabrication - Prefabricat	ion of	loa	d-ca	rrying
members	- Disur	niting of structures - Structural Behaviour of precast structures.				
Unit II	HAND	LING STRESSES AND ERECTION STRESSES				9
Handling	stresse	es and erection stresses - Application of pre stressing of roof members - F	-loor :	syste	ms ·	- Two
way load	bearing	slabs - Wall panels - Shear walls.				
Unit III	DIME	SIONING AND DETAILING OF JOINTS				9
Dimensio	ning ar	nd detailing of joints for different structural connections - Construction jo	oints a	and e	expa	nsion
joints - Al	lowanc	e for joint deformation.				
Unit IV	EREC	TION OF STRUCTURES				9
Production	n - Tra	ansportation and Erection - Organizing of production - Storing -and e	rection	n eq	uipm	ent -
Shuttering	g and r	nould design - Dimensional tolerances, Erection of R.C. structures -Tota	l Fully	/ pre	fabri	cated
buildings.	•					
Unit V	DESIG	ON OF PRE FABRICATED UNITS				9
Design c	onsider	ations - Code provisions -Progressive collapse - Prefabricated units for I	ndust	rial s	struct	tures,

Multi-storied buildings and Water tanks etc., Application of pre stressed concrete in prefabrication..

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Attain the knowledge about the process of manufacturing, transportation and erection of the prefabricated components.	Understand
CO.2	Implement the applications of various components of prefabricated structures.	Apply
CO.3	Analyse various components of the prefabricated structure to ensure the limitations.	Analyze
CO.4	Diagnose the problems occur while designing the prefabricated components.	Analyze
CO.5	Estimate the load calculations and dimensions of the prefabricated members while designing.	Evaluate
CO.6	Assemble the individually made members to form a complete prefabricated structure.	Create

21CEV	1104	PRESTRESSED CONCRETE STRUCTURES	L	Т	Р	С
ZICLV	104	FRESTRESSED CONCRETE STRUCTURES	3	0	0	3
Course I	_earnin	g Objectives:				
• T	o unde	rstand the methods and types of prestressing and to enable the students to	desig	gn		
р	restres	sed concrete structural elements and systems.				
Unit I	INTRO	DDUCTION – THEORY AND BEHAVIOUR				9
Basic pri	nciples	of prestressing - Classification and types - Advantages over ordinary re	inforc	ed c	oncr	ete –
Materials	– High	strength concrete and high tensile steel - Methods of prestressing - Frey	ssinet	, Ma	ngle,	Lee-
McCall a	nd Giff	ord Udall anchorage systems - Analysis of sections of stresses by stres	s cor	ncept	, stre	ength
concept a	and load	d balancing concept – Losses of prestress in post -tensioned and pre-tension	ned r	neml	oers.	
Unit II	DESIG	ON FOR FLEXURE AND SHEAR				9
Basic as	sumptio	ons of flexural design - Permissible stresses in steel and concrete as p	er I.S	.134	3 Cc	de –
Different	Types	of sections - Design of sections of Type I and Type II post-tensioned and p	re-ter	nsion	ed be	eams
- Check	for flex	ural capacity based on I.S. 1343 Code - Influence of Layout of cables in po	st-ter	nsion	ed be	eams
Locatio	n of wir	es in pre-tensioned beams – Design for shear based on I.S. 1343 Code.				
Unit III	DEFL	ECTION AND DESIGN OF ANCHORAGE ZONE				9
Factors	influenc	ing deflections – Short-term deflections of uncracked members – Pre-	diction	n of	long	-term
deflection	ns due t	o creep and shrinkage – Check for serviceability limit states. Determination	of a	ncho	rage	zone
stresses	in pos	t-tensioned beams by Magnel's method, Guyon's method and I.S. 1343	3 cod	e –	desi	gn of
anchorag	je zone	reinforcement - Check for transfer bond length in pre-tensioned beams- of	desigr	n of a	ancho	orage
zone rein	forcem	ent – Check for transfer bond length in pre-tensioned beams.				
Unit IV	COMP	POSITE BEAMS AND CONTINUOUS BEAMS				9
Analysis	and de	esign of composite beams – Shrinkage strain and its importance – Diff	erenti	al sh	rinka	age -
Methods	of achi	eving continuity in continuous beams - Analysis for secondary moments	– Coi	ncord	lant (cable
and linea	r transf	ormation – Calculation of stresses – Principles of design.				
Unit V	MISC	ELANEOUS STRUCTURES				9

TOTAL - 45 Periods

Role of prestressing in members subjected to Tensile forces and compressive forces – Design of Tension members and Compression members - Design of Tanks, Pipes, Sleepers and Poles – Partial prestressing –

methods of achieving partial prestressing, merits and demerits of partial prestressing.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Specify and characterize the materials required for prestressed concrete structures.	Understand
CO.2	Calculate losses and deflection in various prestressed members.	Apply
CO.3	Design end block reinforcement, concrete tanks and pipe for PSC members.	Apply
CO.4	Analyze the stresses encountered in PSC element during transfer and at working.	Analyze
CO.5	Analyze prestressed concrete members for flexure and their flexural strength.	Analyze
CO.6	Justify how the end blocks of prestressed concrete beams are strengthened against bursting tension.	Evaluate

21CEV	/105	REPAIR AND REHABILITATION OF STRUCTURES	L	Т	Р	С
21021	103	RELAIN AND REHADIENTATION OF CHROOTORES	3	0	0	3
Course I	_earnin	g Objectives:				
• T	o impa	rt knowledge about sustainable construction and to understand the concept	s of s	ustai	nable)
n	naterial	s, energy calculations, green buildings and environmental effects.				
Unit I	MAINT	ENANCE AND REPAIR STRATIGES				9
Maintena	nce, R	epair and Rehabilitation - Facets of Maintenance - Importance of Mai	ntena	nce	- Va	rious
aspects of	of Inspe	ction - Assessment procedure for evaluating a damaged structure - causes	of de	terio	ration	1
Unit II	STRE	NGTH AND DURABILITY OF CONCRETE				9
Quality a	ssuran	ce for concrete – Strength and Durability of concrete - Cracks, different ty	pes,	caus	es-E	fects
due to cli	mate, te	emperature, Sustained elevated Temperature, Corrosion.				
Unit III	SPEC	AL CONCRETES				9
Polymer	concre	e - Sulphur infiltrated concrete - Fibre reinforced concrete - High strer	ngth d	concr	ete-	High
performa	nce co	ncrete - Self compacting concrete - Geopolymer concrete - Concrete r	nade	with	indu	strial
wastes.						
Unit IV	TESTI	NG TECHNIQUES AND PROTECTION METHODS				9
Non-dest	ructive	Testing Techniques, Epoxy injection, Shoring, Underpinning, Corrosion pro	tectio	n tec	hniqı	ıes –
Corrosio	n inhibit	ors, Corrosion resistant steels, Coatings to reinforcement, cathodic protection	on.			
Unit V	STRE	NGTHENING, REPAIR, REHABILITATION AND RESTORATION OF				9
	STRU	CTURES				

Strengthening of Structural elements, Repair of structures distressed due to corrosion, fire, leakage and earthquake - Restoration of Heritage structures- Case studies on Maintenance and rehabilitation of steel structures, pavements, and masonry structures.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Know the importance of inspection and maintenance.	Understand
CO.2	Analyze the various Impacts of cracks, corrosion and climate on structures.	Analyze
CO.3	Analyze the various special concretes in construction.	Analyze
CO.4	Interpret the various testing techniques and various protection measures.	Apply
CO.5	Know the Repair of structures and Restoration of Heritage structures.	Apply
CO.6	Identify the various repair techniques due to corrosion.	Apply

21CEV106 STRUCTURAL DYNAMICS AND EARTHQUAKE ENGINEERING 3 0 3 **Course Learning Objectives:** To understand the behaviour of structures under dynamic, earthquake loading and design the structures as earthquake resistant as per codal provisions. Unit I INTRODUCTION TO DYNAMICS Dynamics - Degree of freedom - Free and forced vibration - Idealization of structure as Single Degree of Freedom (SDOF) and Multi degree of freedom (MDOF) system - D'Alemberts Principles - Formulation of equation of motion for SDOF system and MDOF system -- Evaluation of natural frequencies and modes -Effect of damping. **SEISMOLOGY** Unit II 9 Elements of Engineering Seismology - Seismic hazard - Earthquake phenomenon - Seismotectonics Seismic Instrumentation – Characteristics of Strong Earthquake motion – Estimation of Earthquake Parameters Soil Structure Interaction – Liquefaction of soil - Seismic zone map – Response spectra. Unit III **EARTHQUAKE EFFECTS ON STRUCTURES** Inertia force on structures - load transfer path - Effect of architectural features on behavior of structures -Hysteretic Behaviour of RCC, steel and prestressed concrete - Pinching Effect - Bouchinger Effects - Energy dissipation - P-delta effect - storey drift - Behavior of brick masonry, stone masonry and reinforced concrete structures under past earthquakes - typical failures - Causes of damage -- Lessons learnt from past earthquakes. **EARTHQUAKE LOAD ANALYSIS Unit IV** 9 Design spectra - Codal provision - Different methods of earthquake analysis -- Analysis of structure by Equivalent static method – Analysis of structure by Response spectrum method – Introduction to time-history method of analysis. Unit V **EARTHQUAKE RESISTANT DESIGN** 9

TOTAL - 45 Periods

Philosophy of earthquake resistant design - Planning considerations and Architectural concepts - Design and detailing as per codal provisions - Design and detailing of typical flexural member and column member, Ductile detailing of beam-column joints and footing — Concept and principle of shear wall - Introduction to performance

based seismic design - Seismic isolation principles and methods.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe the basic principles of the Degree of Freedom system and develop the equation of motion for the MDOF system and earthquake parameters.	Understand
CO.2	Calculate the free and forced vibration characteristics of SDOF systems.	Apply
CO.3	Apply BIS codes for earthquake resistant design and detailing of R.C.C. and masonry buildings.	Apply
CO.4	Evaluate seismic response of simple structures using response spectra method.	Evaluate
CO.5	Design earthquake resistant building structures.	Apply
CO.6	Create a model of seismic structures using mathematical and engineering sciences.	Apply

21CEV10	8 AI FOR CIVIL ENGINEERING AND MACHINE LEARNING	L	Т	Р	С
	(Common to ALL Branches)	3	0	0	3
Course Lea	rning Objectives:				<u> </u>
Т		:	سماك	!	
• 10 g	ain proficiency in collecting, processing, and analyzing large datasets related	(O CI	vii en	iginee	ring
proje	ects, using AI and ML tools to extract meaningful insights and inform decision-ma	akinç) .		
• To a	apply principles and techniques of AI and ML, including supervised and unsu	.per	/ised	learn	ing,
neur	al networks, and natural language processing in civil engineering contexts.				
• To	Develop the ability to apply AI and ML algorithms to solve complex civil eng	inee	rina r	oroble	ms.
			0.		
sucr	as structural health monitoring, predictive maintenance, and construction optim	ızatıc	on.		
Unit I	INTRODUCTION TO ARTIFICIAL INTELLIGENCE AND MACHINE				9
	LEARNING IN CIVIL ENGINEERING				
Overview o	f Artificial Intelligence (AI) and Machine Learning (ML) - Applications of A	l ar	d MI	L in (Civil
Engineering	- Basic concepts of AI and ML: supervised learning, unsupervised learn	ing,	reinf	orcen	nent
learning - C	ase studies of AI and ML applications in Civil Engineering				
Unit II	DATA PRE-PROCESSING AND FEATURE ENGINEERING				9
Data sallasi		<u> </u>	1 -	-0	
	ion and pre-processing techniques specific to Civil Engineering datasets - Fea				
	echniques - Handling missing data and outliers - Data normalization and	sta	ndar	dizatio	n -
	lity reduction techniques				
Unit III	SUPERVISED LEARNING TECHNIQUES FOR CIVIL ENGINEERING				9
Regression	analysis for predicting continuous variables in Civil Engineering (e.g., construct	tion	costs	, mate	erial
properties)	- Classification algorithms for tasks such as structural health monitoring, risk	ass	sessn	nent,	and
quality con	trol - Model evaluation and validation techniques - Artificial Intelligence	-Ass	isted	Buil	ding
Information					
Unit IV	UNSUPERVISED LEARNING AND CLUSTERING IN CIVIL ENGINEERING				9

Introduction to unsupervised learning algorithms (e.g., k-means clustering, hierarchical clustering) - Applications of clustering in Civil Engineering, such as pattern recognition in sensor data, traffic flow analysis, and urban planning - Evaluation metrics for clustering algorithms.

Unit V ADVANCED TOPICS IN AI AND ML FOR CIVIL ENGINEERING

Deep learning techniques for Civil Engineering applications - Convolutional Neural Networks (CNNs) for image-based tasks like crack detection, infrastructure monitoring - Recurrent Neural Networks (RNNs) for time-series data analysis in Civil Engineering (e.g., traffic prediction, structural health monitoring) - Transfer

learning and domain adaptation for leveraging pre-trained models in Civil Engineering contexts.

TOTAL = 45 PERIODS

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
	Understand the feature selection and extraction techniques to identify and	Understand
CO.1	utilize the most informative features from civil engineering datasets,	
	enhancing model performance and interpretability.	
CO.2	Apply data normalization and standardization techniques to ensure that civil	Apply
	engineering data is appropriately scaled and comparable, which is crucial for	
	the performance of many machine learning algorithms.	
CO.3	Acquire expertise in employing classification algorithms to address diverse	Apply
	tasks in civil engineering, including structural health monitoring, risk	
	assessment, and quality control.	
CO.4	Learn to integrate artificial intelligence techniques with Building Information	Apply
	Modeling (BIM) to improve the efficiency, accuracy, and automation of	
	construction project management and design processes.	
CO.5	Analyze recent advancements in AI and ML, and applying these cutting-edge	Analyze
	techniques to practical civil engineering problems.	
CO.6	Applydeep learning techniques to address diverse challenges in civil	Apply
	engineering, leveraging the power of neural networks to extract complex	
	patterns and insights from large datasets.

		3	0	0	3

Course Learning Objectives:

- To train the students in field of digitalization of construction. Students can be trained in the latest
- softwares relevant to construction industry.

List of experiments:

To implement the digital knowledge in construction (use relevant softwares)

- 1. Introduction and understanding of Primavera project planner for construction
- 2. Using Primavera project planner, update the schedule of the project of a construction project.
- 3. Introduction and understanding of MS Project for a construction project
- 4. Using MS project, schedule the construction project planning
- 5. Introduction to BIM in construction projects
- a. Development of BIM for small construction project
- 6. Progress the work flows in construction project using BIM
- 7. Development of bid management for a small firm construction industry using software.

TOTAL - 90 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the importance of latest softwares in a construction industry.	Understand
CO.2	Plan a construction project using Computer software.	Apply
CO.3	Plan a construction project using Computer software.	Apply
CO.4	Develope a BIM information model.	Apply
CO.5	Analyse the bid management and its effectiveness using bid management software.	Analyze
CO.6	Apply the importance of latest softwares in a construction industry.	Apply

21CEV2	206	ADVANCED CONSTRUCTION TECHNIQUES	L	T 0	P 0	C
Course L	earnin	g Objectives:				
 To study and understand the latest construction techniques applied to engineering construction for sub structure, super structure, special structures, rehabilitation and strengthening techniques and demolition techniques. 						
Unit I	SUB S	TRUCTURE CONSTRUCTION				9
Construct	ion Me	thodology - Box jacking - Pipe jacking - Under water construction of	diaphi	agm	wal	sand
basement	: - Tun	neling techniques - Piling techniques - Driving well and caisson - sinkin	g coff	erda	m -	cable
anchoring	and g	routing - Driving diaphragm walls, Sheet piles - Laying operationsfor built ι	ıp offs	shore	e sys	tem -
Shoring f	or dee	p cutting - Large reservoir construction - well points -Dewatering for	unde	ergro	und	open
excavation				J		•
Unit II	SUPE	R STRUCTURE CONSTRUCTION FOR BUILDINGS				9
Vacuum d	ewateri	ng of concrete flooring - Concrete paving technology - Techniques of constr	uction	for	conti	nuous
concreting	operation	on in tall buildings of various shapes and varying sections – Erection techniques o	f tall s	tructi	ures,	Large
span struc	tures –	launching techniques for heavy decks - in-situ prestressing in high rise structure	es, Po	st te	nsion	ing of
slab- aeria	l transpo	orting – Handling and erecting lightweight components on tall structures.				
Unit III	CONS	TRUCTION OF SPECIAL STRUCTURES				9
Erection of	of lattic	e towers - Rigging of transmission line structures - Construction sequen	ce in	cooli	ngto	wers,
Silos, chir	nney, s	sky scrapers - Bow string bridges, Cable stayed bridges – Launching andp	ushin	g of l	box o	decks
Constru	ction o	f jetties and break water structures - Construction sequenceand methods	in do	mes	– Su	pport
structure f	for hea	vy equipment and machinery in heavy industries- Erection of articulated s	tructu	ires a	and s	pace
decks.						
Unit IV	REHA	ABILITATION AND STRENGTHENING TECHNIQUES				9
Seismic re	etrofitting	g - Strengthening of beams - Strengthening of columns - Strengthening of s	lab -S	Streng	theni	ng of
masonry wall, Protection methods of structures, Mud jacking and grouting forfoundation - Micro piling and underpinning					nning	
for strength	for strengthening floor and shallow profile - Sub gradewater proofing, Soil Stabilization techniques.					
Unit V	DEMC	LITION				9
Demolition	Techn	iques, Demolition by Machines, Demolition by Explosives, Advanced techn	iques	usir	ng Ro	obotic

Machines, Demolition Sequence, Dismantling Techniques, Safety precaution in Demolition and Dismantling.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the modern construction techniques used in the sub structure construction.	Understand
CO.2	Apply the principles and concepts relevant to super structure construction for buildings.	Apply
CO.3	Apply the concepts used in the construction of special structures.	Apply
CO.4	Apply Knowledge on Various strengthening and repair methods for different cases.	Apply
CO.5	Identify the suitable demolition technique for demolishing a building.	Evaluate
CO.6	Analyze the sustainable construction techniques and their suitability for a specific project.	Analyze

21CEV207	ENERGY EFFICIENT BUILDINGS	L	T	Р	C
		3	0	0	3

Course Learning Objectives:

 To provide an understanding of the concept of energy consumption in buildings and design an energy efficient building.

Unit I INTRODUCTION

9

Climate adapted and climate rejecting buildings – Heat Transfer – Measuring Conduction – Thermal Storage – Measurement of Radiation – The Greenhouse Effect – Convection – Measuring latent and sensible heat – Psychrometry Chart – Thermal Comfort – Microclimate, Site Planning and Development – Temperature – Humidity – Wind – Optimum Site Locations – Sun Path Diagrams – Sun Protection – Types of Shading Devices – Design responses to energy conservation strategies.

Unit II PASSIVE SOLAR HEATING AND COOLING

9

General Principles of passive Solar Heating – Key Design Elements – Sunspace – Direct gain – Trombe Walls, Water Walls – Convective Air loops – Concepts – Case Studies – General Principles of Passive Cooling – Ventilation – Principles – Case studies – Courtyards – Roof Ponds– Cool Pools – Predicting ventilation in buildings – Window Ventilation Calculations – Room Organization Strategies for Cross and Stack Ventilation – Radiation – Evaporation and dehumidification – Wind Catchers – Mass Effect – Zoning – Load Control – Air Filtration and odor removal.

Unit III DAYLIGHTING AND ELECTRICAL LIGHTING

9

Materials, components and details – Insulation – Optical materials – Radiant Barriers – Glazing materials – Glazing Spectral Response – Day lighting – Sources and concepts –Building Design Strategies – Case Studies – Daylight apertures – Light Shelves – Codal requirements – Day lighting design – Electric Lighting – Light Distribution – Electric Lighting control for day lighted buildings – Switching controls – Coefficient of utilization – Electric Task Lighting – Electric Light Zones – Power Adjustment Factors.

Unit IV HEAT CONTROL AND VENTILATION

ć

Hourly Solar radiation – Heat insulation – Terminology – Requirements – Heat transmission through building sections – Thermal performance of Building sections – Orientation of buildings – Building characteristics for various climates – Thermal Design of buildings – Influence of Design Parameters – Mechanical controls – Examples. Ventilation – Requirements – Minimum standards for ventilation – Ventilation Design – Energy Conservation in Ventilating systems – Design for Natural Ventilation – Calculation of probable indoor wind speed.

Unit V DESIGN FOR CLIMATIC ZONES

design - Energy Audit - Certification.

9

Energy efficiency – An Overview of Design Concepts and Architectural Interventions – Embodied Energy – Low Embodied Energy Materials – Passive Downdraft Evaporative Cooling – Design of Energy Efficient Buildings for Various Zones – Cold and cloudy – Cold and sunny – Composite – Hot and dry – Moderate – Warm and humid – Case studies of residences, office buildings and other buildings in each zones – Commonly used software packages in energy efficient building analysis and

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
	Understand the basics of Climate Responsive Design Considerations and	
	Site Responsive Design Considerations in planning and design of buildings in	
CO.1	terms of building materials, building construction & technology, building	Understand
	science, building services to provide energy efficiency.	
	Explain environmental energy supplieson buildings.	
CO.2	Apply passive solar heating and cooling principles in planning and design of	Apply
CO.2	energy efficient buildings.	Дрріу
CO.3	Apply concepts of day lighting and electrical lighting in planning and design of	Apply
00.5	energy efficient buildings.	Дрріу
	Analyse the various principles of heat control and ventilation in terms of	
CO.4	building materials and building physics to promote indoor and outdoor thermal	Analyze
	comfort.	
CO.5	Evaluate the performance of buildings with traditional architecture and	Evaluate
50.5	vernacular architecture in terms of energy efficiency in buildings.	Lvaluate
CO.6	Create the ability to design a buildings with low energy consumption with	Create
30.0	case study visits as tool.	Oreate

21CEV301	GEO-ENVIRONMENTAL ENGINEERING	L	T	Р	С
		3	0	0	3
Course Learn	ing Objectives:		•		
	tudent acquires the knowledge on the Geotechnical engineering problems a mination,	assoc	ated	with	soil
	port knowledge on safe disposal of waste and remediate the contaminate ques thereby protecting environment	d soil	s by	diffe	erent
-	port knowledge on stabilization of waste				
	ovide fundamental knowledge on landfill monitoring, sources & characterization	on of	wast	е	
Unit I SOI	L – WASTE INTERACTION				9
Role of Geo-	environmental Engineering – sources, generation and classification of w	astes	- c	ause	sand
consequences	of soil pollution - case studies in soil failure -factors influencing soilp	olluta	ntinte	eracti	on –
modification of	index, chemical and engineering properties – physical and physiochemicalM	echar	nisms	S.	
Unit II COI	NTAMINANT TRANSPORT AND SITE CHARACTERISATION				9
Transport of	contaminant in subsurface – advection, diffusion, dispersion – chemical	proce	ess -	-biol	ogical
process, sorp	tion, desorption, precipitation, dissolution, oxidation, complexation, ionexcl	nange	, Vo	olatiz	ation,
biodegradation	n – characterization of contaminated sites – soil and rock data– Hydrological	and c	hemi	cal d	ata –
analysis and e	valuation.				
Unit III WA	STE CONTAINMENT AND REMEDIATION OF CONTAMINATED SITES				9
In-situ contair	nment – vertical and horizontal barrier – surface cover – ground water	pump	oing	syst	emon
subsurface dr	ain – soil remediation – Soil Vapour extraction, soil waste stabilization, s	solidif	icatio	onof	soils,
electrokinetic	remediation, soil heating, vitrification, bio remediation, Phyto-remediat	ion –	-grou	ınd	water
remediation –	pump and treat , In-situ flushing, permeable reacting barrier, In-situ airspargir	ıg.			
Unit IV LA	NDFILLS AND SURFACE IMPOUNDMENTS				9
system – Sou	rce and characteristics of waste - site selection for landfills – components o	f land	fills -	-line	r soil,
geomembrane	e, geosynthetic clay, geo-composite liner system – leachate collection –	finalc	over	des	ign –
monitoring landfill - Environmental laws and regulations.					
Unit V ST	ABILISATION OF WASTE	T			9
Evaluation of w	aste materials – flyash, municipal sludge, plastics, scrap tire, blast furnace slag,con	structi	on w	aste,	wood
	ir physical, chemical and biological characteristics – potentialReuse – utilization				
	•				

TOTAL - 45 Periods

stabilization

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the various causes and consequences of waste interaction with soil and theirmodification.	Understand
CO.2	Interpret the various mechanism of transport of contaminants into the subsurface and characterization of contaminated sites and their risk analysis.	Apply
CO.3	Explain how to decontaminate the site so as to reuse the site for human settlement.	Apply
CO.4	Illustrate safe disposal of waste through different containment process.	Apply
CO.5	Assess conversion of waste into a resource material through soil waste stabilization techniques with or without chemical stabilization.	Analyze
CO.6	Evaluate the soil failure and utilization of waste and soil stabilization through a case study	Evaluate

Text Books:

21CEV302 **GROUND IMPROVEMENT TECHNIQUES** 3 0 3 **Course Learning Objectives:** Students will be exposed to various problems associated with soil deposits and methods to evaluate them The physical, chemical and hydraulic modification methods and its applications for strengthen the soil. The applications of modern methods in civil construction alteration works, short creating, soil reinforcement, soil nailing, bolting involved in inclusion and confinement process The different techniques will be taught to them to improve the characteristics of difficult soils as well as design techniques required to implement various ground improvement Students will be exposed to various problems associated with soil deposits and methods to evaluate them Unit I **HYDRAULIC MODIFICATIONS** 9 Scope and necessity of ground improvement in Geotechnical engineering basic concepts. Drainage - Ground Water lowering by well points, deep wells, vacuum and electro-osmotic methods. Stabilization by thermal and freezing techniques - Applications. Unit II **MECHANICAL MODIFICATIONS** 9 Insitu compaction of granular and cohesive soils, Shallow and Deep compaction methods - Sand piles -Concept, design, factors influencing compaction. Blasting and dynamic consolidation design and relative merits of various methods - Soil liquefaction mitigation methods Unit III PHYSICAL MODIFICATION Preloading with sand drains, fabric drains, wick drains - theories of sand drain - Stone column with and without encased, lime stone - functions - methods of installation - design, estimation of load carrying capacity and settlement. Root piles and soil nailing - methods of installation - Design and Applications. Unit IV MODIFICATION BY INCLUSIONS 9 Reinforcement – Principles and basic mechanism of reinforced earth, simple design: Synthetic and natural fiber based Geotextiles and their applications. Filtration, drainage, separation, erosion control. **CHEMICAL MODIFICATION** Unit V 9 Grouting – Types of grout – Suspension and solution grouts – Basic requirements of grout. Grouting equipment - injection methods - jet grouting - grout monitoring - Electro - Chemical stabilization - Stabilization with cement, lime - Stabilization of expansive clays. **TOTAL - 45 Periods**

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Identify and evaluate the deficiencies in the deposits of the given project area	Understand
00.1	and improve its characteristics by hydraulic modifications	
CO.2	Improve the ground characteristics by mechanical modifications using various	Apply
60.2	method and design the system	
CO.3	Improve the ground characteristics by physical modifications using various	Apply
00.5	method and design the system	
CO.4	Improve the characteristics of soils by various reinforcement techniques and	Apply
60.4	design	
CO.5	Analyze the ground and decide the suitable chemical method for improving its	Analyze
00.5	characteristics	
CO.6	Analyse the various grouting techniques and its applications for improving	Analyze
00.0	load bearing of beneath soil	Allalyze

Text Books:

21CEV303 SOIL DYNAMICS AND MACHINE FOUNDATIONS 3 0 3 **Course Learning Objectives:** To design different types of machine foundations based on the dynamic properties of soils To give an exposure on vibration isolation techniques. To understand the wave propagation in soils, determine dynamic properties of soil for analyzing and designing foundations subjected to vibratory loading. THEORY OF VIBRATION Unit I 9 Introduction - Nature of dynamic loads - Basic definitions - Simple harmonic motion - Fundamentals of vibration - Single degree and multi degree of freedom systems - Free vibrations of spring - Mass systems -Forced vibrations - Resonance - Viscous damping - Principles of vibrations measuring systems - Effect of transient and pulsating loads. Unit II **DYNAMIC SOIL PROPERTIES** 9 Dynamic stress-strain characteristics – Principles of measuring dynamic properties – Laboratory techniques – Field tests - Block vibration test - Factors affecting dynamic properties - Typical values. Mechanism of liquefaction – Influencing actors – Evaluation of liquefaction potential – Analysis from SPT test – Dynamic bearing capacity – Dynamic earth pressure. MACHINE FOUNDATIONS Unit III Introduction - Types of machine foundations - General requirements for design of machine foundations Design approach for machine foundation - Vibration analysis - Elastic Half-Space theory - Mass-springdashpot model – Permissible amplitudes – Permissible bearing pressures **DESIGN OF MACHINE FOUNDATION Unit IV** 9 Evaluation of design parameters - Types of Machines and foundations - General requirements - their importance – Analysis and design of block type and framed type machine foundations – Modes of vibration of a rigid foundation - Foundations for reciprocating machines, impact machines, Two - Cylinder vertical compressor, Double-acting steam hammer –Codal recommendations - Emprical approach – Barken's method – Bulb of pressure concept – Pauw's analogy – Vibration table studies.

Unit V VIBRATION ISOLATION

9

Vibration isolation – Types of isolation – Transmissibility – Passive and active isolation – Methods of isolation – Use of springs and damping materials – Properties of isolating materials – Vibration control of existing machine foundation.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Explain the basic design fundamentals of RC structures and its components.	Understand
CO.2	Acquire knowledge to apply theories of vibration to solve dynamic soil problems.	Apply
CO.3	Apply the basic concepts about machine foundations and design various types of machine foundation.	Apply
CO.4	Analyse the various load acting on machine foundation and suggest suitable design methods for machine foundation.	Analyze
CO.5	Analyse the dynamic properties of soil using laboratory and field tests.	Analyze
CO.6	Investigate the safe bearing capacity of dynamic soil based on both lab and field tests.	Evaluate

21CEV:	304	ROCK MECHANICS	L	Т	Р	С	
21021	30 4	NOOK MEGNANIOS	3 0		0	3	
Course Learning Objectives:							
• TI	ne obje	ective of the course is to provide the student with the concept and the tools	that c	an b	e use	ed to	
in	corpor	ate in the field of geotechnical engineering					
• fa	ilure c	riteria and influence of in-situ stress in the stability of various structu	res				
• S	tudents	s are expected to classify, understand stress-strain characteristics					
• V8	arious t	echnique to improve the in-situ strength of rocks.					
Unit I	CLAS	SIFICATION OF ROCKS				9	
Types of	Rocks -	- Index properties and classification of rock masses, competent and incomp	etent	rock	- va	ue of	
RMR and	ratings	s in field estimations					
Unit II	STRE	NGTH CRITERIA OF ROCKS				9	
Behaviou	r of ro	ck under hydrostatic compression and deviatric loading - Modes of ro	ck fai	lure	plan	es of	
weakness	and jo	int characteristics - joint testing, Mohr - Coulomb failure criterion and tensi	on cu	t-off.	Hoel	< and	
Brown Str	ength (criteria for rocks with discontinuity sets.					
Unit III	INSIT	U STRESSES IN ROCKS				9	
In-situ stre	esses a	and their measurements, Hydraulic fracturing, flat jack, over coring and unc	der co	ring ı	meth	ods -	
stress aro	und un	derground excavations – Design aspects of openings in rocks.					
Unit IV	SLO	PE STABILITY AND BEARING CAPACITY OF ROCKS				9	
Rock slop	es - ro	le of discontinuities in slop failure, slope analysis and factor of safety - rel	media	I me	asure	s for	
critical slopes – Bearing capacity of foundations on rocks.							
Unit V	ROCI	K STABILIZATION				9	
Stabilization of rocks-rock support and rock reinforcement-active and passive supports-ground response curve-							
support re	eaction	curve-reinforcement of fractured and joined rocks-Shotcreting-bolting-a	nchoi	ing-i	nstal	ation	
l							

TOTAL - 45 Periods

methods.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
	Classify the Rock mass and rate the quality of rock for tunnelling and	Understand
CO.1	foundations works and suggest the safer length of tunnelling and stand-up	
	time.	
CO.2	Apply the knowledge of engineering and understand the stress – strain	Apply
CO.2	characteristics and failure criteria of rock	
	Apply them to arrive at the shear strength parameters of rocks to be used for	Apply
CO.3	the design of structures resting on rock and also for the design of	
	underground excavation in rocks.	
CO.4	Design the foundations resting on rocks. Able to carry-out suitable foundation	Apply
00.4	for the structure resting on rock.	
CO.5	Improve the in-situ strength of rocks by various methods such as rock	Understand
60.3	reinforcement and rock support	
	Apply the knowledge on rock mechanics and analyze the stability of rock	Apply
CO.6	slopes and arrive at the bearing capacity of shallow and deep foundations	
	resting on rocks considering the presence of joints

		<u> </u>	Т	Р	С
21CEV3	05 EARTH RETAINING STRUCTURES				
		3	0	0	3
Course Le	earning Objectives:				
	To import Knowledge on Earth pressure (Active & Passive pressure)				
	• To analyse and design rigid, flexible earth retaining structures, slurry supp	orted	tren	ches	and
	deep cuts.				
	 To explore onstability analysis and design of anchor systems 				
	To gain knowledge on Analysis and design of cantilever and anchored sheet	t pile	walls	3	
Unit I	EARTH PRESSURE THEORIES				9
Onit i	EARTH PRESSURE THEORIES				<u> </u>
Introduction	n - State of stress in retained soil mass - Earth pressure theories - Clas	sical	and	grap	hical
techniques	(Culmann's method) – Active and passive cases – Earth pressure due to externa	al load	ds.		
Unit II	COMPACTION, DRAINAGE AND STABILITY OF RETAINING				9
:	STRUCTURES				
Retaining	structure – Selection of soil parameters - Lateral pressure due to compaction, s	train	softe	ning	, wall
flexibility, o	drainage arrangements and its influence Stability analysis of retaining struct	ure b	oth f	or re	gular
and earthq	uake forces.				
Unit III	SHEET PILE WALLS				9
Types of s	sheet piles - Analysis and design of cantilever and anchored sheet pile walls -	- free	ear	h su	pport
method – f	ixed earth support method. Design of anchor systems - isolated and continuous				
Unit IV	SUPPORTED EXCAVATIONS				9
Lateral pre	ssure on sheeting in braced excavation, stability against piping and bottom heav	/ing. l	Earth	pre	ssure
around tun	nel lining, shaft and silos – Soil anchors – Soil pinning –Basic design concepts.				
Unit V	SLURRY SUPPORTED EXACAVATION				9
Slurry supp	oorted trenches-basic principles-slurry characteristics-specifications-diaphragm w	allsbo	ored	pile v	valls-

contiguous pile wall-secant piles-stability analysis.

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	To understand the role of slurry in supporting excavations and to perform stability analysis by considering the actual shape of slurry support	Understand
CO.2	Interpret the earth pressure to analyse and design rigid retaining structures considering effect of compaction, wall flexibility, pore water pressure and earth quake forces.	Apply
CO.3	Interpret earth pressure to analyse and design flexible earth retaining walls and also acquire the knowledge of design of anchors	Apply
CO.4	Apply the knowledge on lateral earth pressure behind and around excavation to analyse and design braced excavations, slurry supported excavations and underground utilities.	Apply
CO.5	Analyse the earth pressure acting on retaining structures by applying classical theories considering all influencing parameters and suggest the earth pressure to be considered for the design of retaining structures	Analyze
CO.6	Assess stability Analysis for pile walls and retaining structures.	Evaluate

21CEV306 PILE FOUNDATION	L	T	Р	С		
21021000	. ILL I GONDANION	3	0	0	3	
Course Learnin	ng Objectives:		<u> </u>			
The study	dent will be exposed to the design of piles					
 pile grou 	ups and caissons with respect to vertical and lateral loads for various field co	onditio	ns.			
to selec	tgeotechnical design parameters and type of pile foundations					
Unit I PILE	CLASSIFICATIONS AND LOAD TRANSFER PRINCIPLE				9	
Necessity of pile	e foundation - classification of piles - Factors governing choice of type of	pile -	- Loa	d tra	nsfer	
mechanism – p	ling equipments and methods - effect of pile installation on soil condition	– pile	raft	syst	em –	
basic interactive	analysis - criteria for pile socketing Start Contents here					
Unit II AXIA	L LOAD CAPACITY OF PILES AND PILE GROUPS				9	
Allowable load	of piles and pile groups – Static and dynamic methods – for cohesive and	cohe	sionl	ess	soil –	
negative skin fi	riction – group efficiency – pile driving formulae - limitation – Wave eq	uation	арр	licati	on –	
evaluation of ax	ial load capacity from field test results - Settlement of piles and pile group.					
Unit III LATE	RAL AND UPLIFT LOAD CAPACITIES OF PILES				9	
Piles under Late	eral loads – Broms method, elastic, p-y curve analyses – Batter piles – res	spons	e to i	mom	ent –	
piles under uplif	t loads – under reamed piles – Drilled shaft – Lateral and pull out capacity for	om lo	ad te	est.		
Unit IV STR	UCTURAL DESIGN OF PILE AND PILE GROUPS				9	
Structural desig	n of pile – structural capacity – pile and pile cap connection – pile cap des	sign –	sha	pe, d	epth,	
assessment and	I amount of steel – truss and bending theory- Reinforcement details of pile	and pi	le ca	ps –	- pile	
subjected to vib	ration.					
Unit V CAIS	SONS				9	
Necessity of ca	Necessity of caisson – type and shape - Stability of caissons – principles of analysis and design – tilting of					
caisson – const	ruction - seismic influences.					
	٦	ГОТА	L - 4	5 Pei	riods	

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
	Explain the importance of pile foundation and various functions and	Understand
CO.1	responsibilities of geotechnical engineer and contractor, in addition to the	
	piling equipments	
	Determine the vertical load carrying capacity of pile and pile group- keeping	Apply
CO.2	the settlement of pile as an important criteria based on field practices and	
	codal provisions	
	Apart from vertically loaded piles, the structures are exposed to the peculiar	Apply
CO.3	pile subjected to lateral and uplift load with reference to codal provision and	
	case studies	
CO.4	Understand the design of pile and pile caps, considering the wind and seismic	Understand

21CEV	401	MODERN SURVEYING	L		Р	С
			3	0	0	3
Course L	earnin	g Objectives:				
• T	o study	the basic principles and methods of hydrographic surveying.				
• T	o get in	stroduced to the concept of astronomy in locating a celestial body.				
• T	o impa	rt knowledge on the basics of aerial photogrammetry.				
• T	o learn	on the principles of Electronic distance measurements, Total station and G	PS.			
• T	o give	exposure to advanced surveying techniques involved such as remote sensi-	ng, G	IS,et	C.	
Unit I	HYDR	OGRAPHIC SURVEYING				9
Shore line	e surve	y - River survey- Sounding-Gauges & Equipment - Sounding Rods and Le	ad Li	nes-	Soui	nding
Chain ar	nd lead	l- Sounding Machine, Fathometers, Signals, Sextants- Methods of sou	unding	g- Lo	ocatio	on of
sounding	s- Plotti	ing of sounding-The Three point problem-Mechanical, Graphical& Analytica	l meth	nods.		
Unit II	ASTR	ONOMICAL SURVEYING				9
Celestial	sphere	e - astronomical terms and definitions - motion of sun and stars - ap	parer	t alt	itude	and
correction	ns - cel	estial co-ordinate systems - spherical trigonometry - latitude and longitude	de of	a pla	ace -	field
observati	ons and	d calculations for azimuth- Nautical almanac.				
Unit III	AERI	AL PHOTOGRAMMETRY				9
Photogra	mmetry	r- types and geometry of aerial photograph- Photographic scale- Flying h	eight	s and	d alti	tude-
Relief and	d tilt dis	placement – corrections – Flight Planning-Layout of Photography				
Unit IV	EDM	, TOTAL STATION,GPS SURVEYING				9
Electroma	agnetic	distance measurement (EDM) - principle - types - Total station- wor	king	orinc	iple,	GPS
Basics -	system	overview – working principle of GPS – Satellite ranging – Calculating po	sition-	- GP	S Su	rvey-
types-Kinematic and static survey techniques.						
Unit V	BASI	CS OF REMOTE SENSING&GIS				9
Introduction – Historical Background - Electromagnetic Radiation (EMR) - Electromagnetic Spectrum						
Airborne Platforms-Sensors -Types-optical Remote Sensing, Microwave remote sensing-Applications of Remote						mote
sensing-l	$sensing-LIDAR, GIS-History\ of\ Development\ -\ Components\ of\ GIS-\ Data\ models\ -\ Raster\ and\ Vector\ data$					
structures	s- – Adv	vanced applications of GIS.				

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels		
CO.1	Understand the Hydrographical survey, Astronomical, Aerial Photogrammetry, Advance survey equipment			
CO.2	Apply the location identification through software	Apply		
CO.3	Locate a celestial body using different co-ordinate systems in astronomical surveying.	Evaluate		
CO.4	Evaluate Interpret and scale aerial photographs.	Evaluate		
CO.5	Apply total station and EDM in distance measurement and traversing.	Apply		
CO.6	Adopt advanced surveying techniques over conventional methods in the field of civil engineering	Evaluate

21CEV402 APPLICATION OF REMOTE SENSING 3 0 3 COURSE OBJECTIVES: To introduce the concepts of remote sensing processes and its components. To expose the various remote sensing platforms and sensors and to introduce the elements of data interpretation REMOTE SENSING AND ELECTROMAGNETIC RADIATION Unit I 9 Definition – components of RS – History of Remote Sensing – Merits and demerits of data collation between conventional and remote sensing methods - Electromagnetic Spectrum - Radiation principles - Wave theory, Planck's law, Wien's Displacement Law, Stefan's Boltzmann law, Kirchoff's law - Radiation sources: active & passive - Radiation Quantities Unit II **EMR INTERACTION WITH ATMOSPHERE AND EARTH MATERIAL** 9 Standard atmospheric profile - main atmospheric regions and its characteristics - interaction of radiation with atmosphere - Scattering, absorption and refraction - Atmospheric windows - Energy balance equation -Specular and diffuse reflectors - Spectral reflectance & emittance - Spectroradiometer - Spectral Signature concepts - Typical spectral reflectance curves for vegetation, soil and water - solid surface scattering in microwave region. Unit III **ORBITS AND PLATFORMS** 9 Motions of planets and satellites - Newton's law of gravitation - Gravitational field and potential - Escape velocity - Kepler's law of planetary motion - Orbit elements and types - Orbital perturbations and maneuvers -Types of remote sensing platforms - Ground based, Airborne platforms and Space borne platforms – Classification of satellites – Sun synchronous and Geosynchronous satellites – Legrange Orbit. Unit IV **SENSING TECHNIQUES** 9 Classification of remote sensors – Resolution concept: spatial, spectral, radiometric and temporal resolutions Scanners - Along and across track scanners - Optical-infrared sensors - Thermal sensors - microwave sensors - Calibration of sensors - High Resolution Sensors - LIDAR, UAV Orbital and sensor characteristics of live Indian earth observation satellites DATA PRODUCTS AND INTERPRETATION Unit V Photographic and digital products - Types, levels and open source satellite data products -- selection and

TOTAL - 45 Periods

procurement of data- Visual interpretation: basic elements and interpretation keys

-Digital interpretation – Concepts of Image rectification, Image enhancement and Image classification

On completion of the course, the student is expected to be able to

COs	CO Statements	BT Levels
CO.1	Understand the concepts and laws related to remote sensing	Understand
CO.2	Apply the interaction of electromagnetic radiation with atmosphere and earth material	Apply
CO.3	Acquire knowledge about satellite orbits and different of satellites	Evaluate
CO.4	Evaluate the different types of remote sensors	Evaluate
CO.5	Create the interpretation of satellite imagery	Create
CO.6	Apply data analysis process in field requirement	Apply

21CEV	404	CARTOGRAPHY AND GIS	L	Т	Р	С	
			3	3			
Course I	Course Learning Objectives:						
• T	o introd	duce concepts of Cartography and GIS					
• T	o expo	se the process of map making and production					
• T	o introd	duce GIS data structures, data input and data presentation					
Unit I	ELEN	IENTS OF CARTOGRAPHY				9	
Start Co	nteDefir	nition of Cartography – Maps – Functions – Uses and Types of Maps	– Ma	ap S	cales	and	
Contents	– Мар	Projections - Shape, Distance, Area and Direction Properties - Perspective	e and	l mat	hema	atical	
Projection	ns – In	dian Maps and Projections - Map Co-ordinate System - UTM and UPS	S Ref	eren	ces.	Start	
Contents	herents	s here					
Unit II	MAP	DESIGN AND PRODUCTION				9	
Elements	of a M		onve	ntion	al Sig	 ns –	
		raded Symbols – Color Theory – Colours and Patterns in Symbolization – N			•		
	_	p Printing – Colours and Visualization – Map Reproduction – Map Genera	•		•	•	
		Bilinear and Affine Transformation					
Unit III	FUND	AMENTALS OF GIS				9	
Introduct	ion to G	IS – Definitions – History of GIS – Components of a GIS – Hardware, Soft	ware,	Data	a, Pe	ople,	
Methods	– Intro	oduction to data quality – Types of data – Spatial, Attribute data – ty	pes (of at	tribut	es -	
scales/le	vels of	measurements – spatial data models – Raster Data Structures – Raster D	oata (Comp	ress	ion –	
Vector Da	ata Stru	ctures – Raster Vs Vector Models – TIN and GRID data models.					
Unit IV	DAT	A INPUT AND TOPOLOGY				9	
Scanner	- Rast	er Data Input – Raster Data File Formats – Georeferencing– Vector Dat	a Inp	ut –	Digit	izer–	
Datum P	rojectio	n and Reprojection - Coordinate Transformation - Topology - Adjacenc	y, Co	nne	ctivity	and	
containment – Topological Consistency – Non topological file formats – Attribute Data Linking – Linking					nking		
External Databases – GPS Data Integration – Raster to Vector and Vector to Raster Conversion.							
Unit V	DATA	QUALITY AND OUTPUT				9	
Assessment of Data Quality - Basic Aspects - Completeness, Logical Consistency, Positional Accuracy,							
Tempora	Temporal Accuracy, Thematic Accuracy and Lineage – Metadata – GIS Standards – Interoperability – OGC -						
Spatial D	ata Infr	astructure – Data Output – Map Compilation – Chart / Graphs.					

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the basic concepts and components of GIS, the techniques used	Understand
CO.1	for storage of spatial data and data compression	
CO.2	Be familiar with co-ordinate and Datum transformations	Evaluate
	Be familiar with appropriate map projection and co-ordinate system for	Design
CO.3	production of Maps and shall able to compile and design maps for their	
	required purpose.	
CO.4	Apply the concepts of spatial data quality and data standard	Apply
CO.5	Evaluate the concept of spatial data inputs	Evaluate
CO.6	Apply the concept of topology and attribute data	Apply

21CEV406

AIRBORNE AND TERRESTRIAL LASER MAPPING

L	T	Р	С
3	0	0	3

Course Learning Objectives:

 To introduce the concepts of Space Borne, Air Borne, Terrestrial and Bathymetric LASER Scanners for Topographic and Bathymetric Mapping

Unit I SPACE BORNE RADAR AND LIDAR ALTIMETER

9

Principle and Properties of LASER- Production of Laser – Components of LASER – LiDAR – Types of LiDAR:Range Finder, DIAL and Doppler LiDAR - Platforms: Terrestrial, Airborne and Space borne LiDAR – Space Borne LiDAR Missions – Space Borne Radar Altimeter for mapping Sea Surface Topography , Moon Topography - Merits of ALS in comparison to Levelling, echo sounding, GPS leveling, Photogrammetry and Interferometry Start Contents here

Unit II AIRBORNE LASER SCANNERS

9

Airborne Topographic Laser Scanner – Ranging Principle – Pulse Laser and Continuous Wave Laser –First Return and Last Return – Ellipsoidal and Geoidal Height - Typical parameters of Airborne Laser Scanner (ALS) – Specifications of Commercial ALS –- Components of ALS - GPS, IMU, LASER Scanner, Imaging Device, Hardware and Software - Various Scanning Mechanisms: Oscillating Mirror, Rotating Polygon, Nutating Mirror, Fibre Optic

Unit III DATA ACQUISITION AND PRE-PROCESSING

9

Laser Classification – Class I to Class IV Laser – Eye Safety - Synchronization of GPS, IMU and ALS Data - Reflectivity of terrain objects –- Flight Planning – Determination of various data acquisition parameters – Swath Width, Point Density, No. of Strips, Area Covered, Point Spacing - Data Processing – Determination of optimal flight trajectory- Quality Assurance

Unit IV POST PROCESSING of LiDAR Data

9

Post Processing – Geo location of Laser Foot Prints – Various Co-ordinate Transformations involved Filtering - Ground Point filtering – Digital Surface Model and Digital Elevation Model - LIDAR data file formats – LAS File format and other proprietary file formats – Post Processing Software: Open Source and COTS Software – Quality Control Measures – Error Budget - Overview of LIDAR Applications in various domains - 3D city models – Corridor Mapping Applications – Forestry Applications.

Unit V TERRESTRIAL LASER SCANNERS

,

Terrestrial Laser Scanners (TLS) – Working Principle – Static TLS – Dynamic TLS – Commercial TLS Specifications – Mobile Mapping Lasers: Vehicle Mounted TLS, Back Pack Wearable Laser Scanners – Asset Management Studies – Highways and Railway Asset Management – Indoor Mapping: Laser Scanning of interior of buildings/monuments – Immersive Applications - BIM Model – Applications in Tunnel Surveying, Forest Inventory, Open Cast Mine Surveying

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the components of laser and various platforms of laser scanning	Understand
CO.2	Summarize the components of Airborne Laser Scanner and concept of ranging principles	Evaluate
CO.3	Analyze the flight planning parameters and pre-processing of acquired data	Analyze
CO.4	Evaluate post process the data to derive DSM and DEM and its applications	Evaluate
CO.5	Apply the components of TLS and its applications	Apply
CO.6	Create the BIM Model, application of Tunnel survey	Create

21CEV4	107	HYDROGRAPHIC SURVEYING	3	T	Р	С
210214	.07	TITEROGRAFING CORVETING		0	0	3
Course L	earning	g Objectives:				
• To	provio	le the necessary knowledge and practical instrument operational and data	proce	ssin	g skill	s
ne	eded f	or them to confidently accomplish a bathymetric survey in the real world				
• To	devel	op students' critical and creative thinking, as well as cooperative attitudes &	& beh	aviou	ır of	
W	orking \	with others.				
Unit I	INTRO	DDUCTION, TIDES AND DATUMS				9
Overview	of hyd	drographic surveying concepts- bathymetric and nautical charts- Bas	ic tic	al th	neory	-tidal
observation	ns and	predictions - common types of recording tide gauges - different vertical da	atums	- Ind	dian t	ides.
Start Cont	ents he	ere				
Unit II	SOUN	DINGS				9
Overview	of dept	th data types- Working principle of echo sounders - characteristics and n	ature	of u	nder	vater
acoustic s	ignals -	- transducers - error sources and calibrations- Advanced instrumentation.				
Unit III	NAVIO	GATION AND POSITION FIXING				9
Horizontal	positio	oning methods and requirements - concept of line and surface of position	on - p	ositi	oning	and
navigation	using	satellite positioning systems - differential GPS and Real-time kinematic (R	ΓK)			
Unit IV	PLAN	INING AND DATA PROCESSING				9
General c	onside	rations for planning of an inshore hydrographic survey - ground and trac	k cor	ntrol	- pra	ctical
soundings	in ins	hore and coastal surveys - data processing and chart compilation - hy	drogra	aphic	soft	ware
packages	for data	a collection - processing and plotting.				
Unit V	MARI	NE ENVIRONMENTAL MEASUREMENTS				9
Methods of	of meas	suring and recording of currents - composition of the sea bed - and solids in	n susp	ensi	on -	Case
Studies (T	he role	of the hydrographic surveyor on different marine projects)				
		7	ГОТА	L - 4	5 Pei	iods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the fundamentals of hydrographic surveying	Understand
CO.2	Evaluate the appropriate techniques for different types of survey	Evaluate
CO.3	Analyze the various options available during the Navigation	Analyze
CO.4	Analyze the data collected from a survey and assess its quality against the project requirements	Analyze
CO.5	Discuss the different roles for a hydrographic surveyor on marine projects	Evaluate
CO.6	Apply the GPS and Real-time kinematic (RTK)	Apply

21CEV501 RAILWAY AIRPORT AND HARBOUR ENGINEERING

L	Т	Р	С
3	0	0	3

Course Learning Objectives:

- To Introduce component of railway tracks, track resistance, crossing, signaling.
- To deal with the characteristics of aircrafts related to airport design; runway and taxiway design, runway orientation, length, grading and drainage.
- To explain the classes of harbors, features, planning and design of port facilities.

Unit I RAILWAY PLANNING

9

Development of railways in India - Comparison of roadways and railways - Components of a permanent way and its functions - Rails, Gauges, Sleepers, Ballast, Formation, Rail fittings and fastenings - Coning of wheels - Defects in rails: creep in rails, Track Stress - Gradient and Grade compensation on curves - Super elevation and Negative super elevation - Maximum Permissible speed on curve (Problems included) - Widening of gauge on curves.

Unit II RAILWAY CONSTRUCTION AND MAINTENANCE

9

Track construction - Calculation of Materials required for track laying - Track maintenance - Track drainage - Types of stations: Way side, Junction, Terminal - Types of station yards: Passenger, Goods, Marshalling and Locomotive - Introduction to Modern Developments in Railways

Unit III Points & Crossings, Signalling & Interlocking

9

Types of Points / Switch: Stub, Split switch - Types of crossing: acute angle, Obtuse angle, Square – Design calculation of Turnout - Various types of Track junctions - Signaling and Interlocking - Different types of signals, their working and location - Control systems of signals - Mechanical method of interlocking systems - Track circuiting.

9

Introduction - classification of airports - Factors influencing the selection of new airport site and ICAO stipulations - layout characteristics, socio-economic characteristics of the Catchment area - components of Airport Runway Orientation: Wind Rose Diagram - Problem on Basic and Actual runway length - Aircraft Parking system - Drainage - Airport Zoning - Runway and Taxiway Markings and lighting - Design standards and planning of Airport as per Indian condition.

Unit V HARBOUR ENGINEERING

Water Transportation- Types of water transportation -Ports and Harbours –requirements, classification. Harbour works: breakwaters, jetties, fenders, piers, wharves, dolphins, etc., Navigational aids: types, requirements, light house, beacon lights, buoys, Port facilities: general layout, development, planning, facilities, terminals. Docks and repair facilities: design, dry docks, wet docks, slipways, Locks and lock gates: materials, size, Dredging: classification, dredgers, uses of dredged materials.

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Demonstrate standards and norms of national and International organizations which are framed for efficient functioning of existing transport systems	.Understand
CO.2	Interpret the functioning of various components of transportation system	Apply
CO.3	Recommend the basic design of Railway, Airport, Harbour layout.	Apply
CO.4	Compare different transportation systems and their importance and their role in development.	Analyze
CO.5	Analyze the various signal system, Visual Aids and Markings help in safe working of transportation system.	Analyze
CO.6	Evaluate the new technologies used and trends used and trends adopted in present transport scenario.	Evaluate

21CEV502	TRAFFIC ENGINEERING AND MANAGEMENT	L	Т	Р	С
		3	0	0	3

Course Learning Objectives:

- To give an overview of Traffic engineering, various surveys to be conducted, traffic Regulation, management and traffic safety
- To infer the basic concepts of traffic engineering and its fundamentals which includes road dimensions and norms.
- To discuss the traffic management and safety systems being followed and its implications in road network planning.

Unit I TRAFFIC SURVEYS AND ANALYSES

Ć

Traffic characteristics: Human, vehicular, and Pavement Characteristics, Problems- presentation of traffic volume data, Annual Average Daily Traffic, Average Daily Traffic, Design hourly traffic volume; Speed- spot speed, presentation of spot speed data, speed and delay studies, methods of conducting spot-speed studies and Speed and Delay studies; Problems Origin and Destination – methods of conducting the survey and presentation of data; parking surveys, presentation of data and analyses, determination of parking demand; Accident studies and analyses; Different problems.

Unit II TRAFFIC FLOW AND ROADWAY CAPACITY

9

Traffic Flow Characteristics – Basic traffic manoeuvres, Traffic stream flow characteristics, Speed- Flow-Density Relations; Passenger Car Units – Mixed traffic flow and related issues – Concept of PCU value-Factors affecting PCU values- Recommended PCU values for different conditions; Capacity and Level of Service – Factors affecting practical capacity – Design Service Volumes

Unit III COST – EFFECTIVE TRAFFIC MANAGEMENT TECHNIQUES

C

Traffic System Management: Regulatory Techniques- one way street, Reversible Street, Reversible lane, Turning moment restrictions, closing streets; Traffic Control Devices – Traffic Signs – Road Markings, Traffic Signals, Miscellaneous traffic control devices; Traffic Segregation – Vehicle segregation, Pedestrian segregation, Traffic signals design; Bus Priority Techniques – Priority manoeuvres – With-flow bus lane and contra-flow bus lane; Self- Enforcing Techniques- Demand Management Techniques (TDM)

Unit IV DESIGN OF ROAD INTERSECTIONS

Importance and Classification; Intersections at-grade – uncontrolled, channelised; Rotary intersections (problems)- Signalised intersections (problems)- Grade Separated Intersections – merits and demerits, types, pattern of intersections with different types of interchanges- Capacity, Concept diagrams.

Unit V DESIGN OF PARKING AND PEDESTRIAN FACILITIES AND CYCLE TRACKS

Parking: Need for parking studies and its ill effects- Parking Standards for different land uses, different types of parking - Conceptual plans for different types of parking; **Pedestrians:** Importance, Barriers, Behaviour, Pedestrian facilities – Principles of planning, Level of Service (LoS), Design standards.;

Cycle Tracks: Principles of design, Design criteria, Design standards for Rural Expressways.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the principles of traffic flow characteristics and their relationships	Understand
CO.2	Analyze various traffic management measures in addressing the demand Pricing and ITS applications.	Analyze
CO.3	Apply the knowledge of science and engineering fundamentals in conducting traffic surveys, analyze the problems and relating it with standards	Apply
CO.4	Designing various types of control and regulatory measures to meet an efficient traffic network.	Create
CO.5	Analyze the facilities and plan for Non Motorised Transport	Analyze
CO.6	Apply the intersections and the junctions in the road network with respect to standards and norms	Apply

21CEV503 **URBAN PLANNING AND DEVELOPMENT** 3 0 3 **Course Learning Objectives:** To study town planning concepts and theories. To perceive the concept of urbanization and various growth patterns. To study norms and aspects of land use planning policies and survey techniques. To study the concepts for different area planning. To study the concepts related to planning surveys Unit I **Evolution of Town Planning** Definition of Human settlement, Urban area, Town, City, Metropolitan City, Megalopolis, Urbanisation, Urbanism, Suburbanisation, Urban sprawl, Peri-urban areas, Central Business District (CBD), Urban Agglomeration, Census definition of urban settlements, Classification of urban areas -Positive and negative impacts of urbanisation, - Atal Mission for Rejuvenation and Urban Transformation (AMRUT) **PLANNING PROCESS AND THEORIES** Unit II 9 Principles of Planning -Stages in Planning Process - Goals, Objectives, Delineation of Planning Areas, Draft Plans, Evaluation, Final Plan. Planning Theories - Garden City Concept, Geddesian Triad by Patrick Geddes, Modernism Concept by Le-Corbusier, Radbun Concept, Neighbourhoods, Theories of Ekistics, Bid-rent Theory by William Alonso, Green Belt Concept Unit III **DEVELOPMENT PLANS, PLAN FORMULATION AND EVALUATION** 9 Types of plans - Regional Plan, Master Plan, Structure Plan, Detailed Development Plan, New Town/ Satellite town- Development Plan, urban nodes, Smart City Plan -Scope and Content of Regional Plan (RP), Master Plan (MP), and the Detailed Development Plan (DDP), Methodologies for the preparation of the RP, MP, and the DDP - Case Studies. Unit IV PLAN IMPLEMENTATION Objectives and Principles of Urban planning- Different Land use planning norms- Environmental aspects of land use planning,- DTCP guidelines in Town planning - Land use- demand and supply of land relationship-Government policies of urban development - Role of Professional bodies. URBAN AND REGIONAL PLANNING LEGISLATIONS, REGULATIONS AND Unit V 9 **DESIGNS** Town and Country Planning, Local Bodies and Land Acquisition Acts, Development and Building Rules, Site analyses, Layouts and Buildings Design

TOTAL - 45 Periods

\

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Comprehend the planning standards, evaluate the constraints and the financial mechanism	Understand
CO.2	Analyze the impact of urbanization on socio economic levels of cities.	Analyze
CO.3	Analyze the characteristics of Urban Environment using the demand and supply of land.	Analyze
CO.4	Apply the urban planning theories in developing urban centers & layouts.	Apply
CO.5	Apply the planning parameters recommended by DTCP in Land use planing.	Apply
CO.6	Apply the concept of urban planning process during programme planning	Apply

21CEV50	4 SMART CITY TECHNOLOGIES	3	0	P 0	С 3
Course Lea	 Irning Objectives:				
	make the students understand the core challenges relating to the foundation of	f sust	ainal	ble s	mart
citie	· · ·				
 To 	impart knowledge on understanding, and critical thinking related to smart,	susta	ainab	ole u	rban
dev	elopment.				
• To	explore issues relating to the development and deployment of new and emergin	g tech	nolo	gies,	that
will	create a thorough understanding of smart processes and systems of the presen	t and	futur	e.	
• To	gain in- depth knowledge to implement smart wastewater management system i	n sma	rt cit	ies.	
• To	apply the concept of Internet of Things in real world scenario.				
Unit I	NTRODUCTION				9
bench mar developme	ing – Dimensions – Feasibility Analysis, Global experience, Global standards a ks, Practice codes. India 100 smart cities policy and mission, Smart city at, financing smart cities development, Governance of smart cities.	-			
Unit II	REEN BUILDING CONCEPTS AND SUSTAINABLE DEVELOPMENT				9
	ects in smart cities, sustainability – green building – Rating system – Energy eff ng systems.	icient	build	ding -	-
Unit III S	MART URBAN TRANSPORT & EMERGENCY RESPONSE SYSTEM				9
Surveillance process –T	 Intelligent Public Transport – Parking - Traffic Control Systems- Applie systems- Emergency response – Incident management systems. Urban trafficansport, environment and safety issues. Principles and approaches of Trafficansport ystem Management. 	nspor	t pla	nnin	g
Unit IV	SMART WATER, SEWERAGE AND WASTE MANAGEMENT				9
	-Water Supply -Sewerage & Waste management - Smart Water and Sewerage aste Collection and Transportation Monitoring system – IoT and Sensors - Case	•	_	emen	it
Unit V	E- GOVERNANCE AND IOT				9
Governmen Governmen	t of management, concept of e-management & e-business, e-Government Print to e-governance, e-governance and developing countries, Designing and it Strategy, E-governance: Issues in implementation. IOT fundamentals, protocout, data analytics and supporting services, case studies.	mplen	nenti	ng e	-
	7	ΓΟΤΑ	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the fundamental concepts of smart cities and green building with technology advancement.	Understand
CO.2	Apply knowledge of engineering, energy, and information technology for smart city architecture.	Apply
CO.3	Design and develop responsive smart cities with green buildings, intelligent transport system, smart water and drainage networks.	Apply
CO.4	Outline the application of smart technologies in water supply, sewerage waste management transportation sector.	Apply
CO.5	Recognize the role of modern ICT and data analytics in addressing the urban challenges and key issues.	Apply
CO.6	Analyze the importance and role of government, urban planners, city developers, universities and stakeholders for smart city development.	Analyze

21CFV506	1CEV506 PAVEMENT ENGINEERING		Т	Р	С	
2.02.000		3	0	0	3	
Course Learning Objectives:						
 Stude 	nt gains knowledge on various IRC guidelines for designing rigid and flexible p	aven	nents	S.		
• Furthe	r, the student will be in a position to assess quality and serviceability condition	ns of	roads	S.		
Unit I PA	/EMENT MATERIALS AND SUBGRADE ANALYSIS				9	
Introduction –	Pavement as layered structure - Pavement types -rigid and flexible-Subgra	de a	nalys	is- S	tress	
and deflection	s in pavements- Pavement Materials and Testing- Modified Binders.					
Unit II DE	SIGN OF FLEXIBLE PAVEMENTS				9	
Flexible paver	nent design – Advantages and disadvantages -Factors influencing design of	fflexi	ble p	oavei	nent,	
Empirical – M	echanistic empirical and theoretical methods – Design procedure as per IRC	guide	lines	- D	esign	
and specificati	on of rural roads.					
Unit III DE	SIGN OF RIGID PAVEMENTS				9	
Cement concr	ete pavements Factors influencing CC pavements – Modified Westergaard	appr	oach	– D	esign	
procedure as	per IRC guidelines – Concrete roads and their scope in India.					
Unit IV PA	VEMENT CONSTRUCTION, EVALUATION AND MAINTENANCE				9	
Construction 7	echniques practice of flexible and concrete pavement Pavement Evaluation -	- Cau	ses (of dis	tress	
in rigid and fle	xible pavements - Evaluation based on Surface Appearance, Cracks, Patc	hes a	and F	Pot H	loles,	
Undulations,	Raveling, Roughness, Skid Resistance. Structural Evaluation by Deflectio	n Me	easui	reme	nts -	
Pavement Ser	viceability index, - Pavement maintenance (IRC Recommendations only).					
Unit V ST	ABILIZATION OF PAVEMENTS				9	
Stabilization w	ith special reference to highway pavements - Choice of stabilizers - Testing	g and	d field	d cor	itrol -	
Stabilization for	r rural roads in India – Use of Geosynthetics in roads.					
	Т	ОТА	L - 4	5 Pe	riods	

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Get knowledge about types of rigid and flexible pavements.	Understand
CO.2	Design a pavement system using design of rigid pavements	Apply
CO.3	Design a pavement system using design of flexible pavements	Apply
CO.4	Apply different pavement design methods to a complex pavement project.	Apply
CO.5	Determine the causes of distress in rigid and flexible pavements.	Analyze
CO.6	Analyze the effectiveness of different maintenance strategies for pavement	Analyze
00.0	systems.

TOTAL - 45 Periods

Housing Units(Problems), Rents & Recovery Pattern (Problems).

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Interpret the various housing programme using sustainability concept.	Understand.
CO.2	Plan the housing projects as per NUHHP & Building regulations.	Apply.
CO.3	Analyze the housing project based on area of plot and cost of projects.	Analyze.
CO.4	Design the Slum housing projects using GIS & MIS Design.	
CO.5	Evaluate the cost-effective construction materials & techniques for mass housing.	Evaluate
CO.6	Present the Performance of economic analysis-based project appraisal of housing projects. Communication.	Evaluate

21CEV60	1 CLIMATE CHANGE ADAPTATION AND MITIGATION	L	Т	Р	C
2102100	. CLIMATE GHANGE ABAI TATION AND IMPROVIDEN	3 0 0			3
Course Lea	rning Objectives:				
• To i	mpart knowledge on the global warming, the impact of climate change on societ	y and	I the		
ada	ptation and mitigation measures to the students				
Unit I	TRODUCTION				9
Atmosphere	- weather and Climate - climate parameters - Temperature, Rainfall, Humi	dity,	Winc	l – G	loba
ocean circul	ation – El Nino and its effect - Carbon cycle				
Unit II E	LEMENTS RELATED TO CLIMATE CHANGE				7
Greenhouse	e gases - Total carbon dioxide emissions by energy sector – industrial, comme	rcial,	trans	sport	ation,
residential -	- Impacts – air quality, hydrology, green space - Causes of global and region	al clir	nate	char	ıge -
Changes in	patterns of temperature, precipitation and sea level rise – Greenhouse effect				
Unit III II	MPACTS OF CLIMATE CHANGE				10
Effects of C	Climate Changes on living things – health effects, malnutrition, human migra	tion,	socio	ecor	omic
impacts- to	urism, industry and business, vulnerability assessment- infrastructure, popu	lation	and	sec	tor –
Agriculture,	forestry, human health, coastal areas				
Unit IV	MITIGATING CLIMATE CHANGE				9
IPCC Techr	nical Guidelines for Assessing Climate Change Impact and Adaptation -Identifyi	ng a	daptio	on op	tions
 designing 	and implementing adaption measures – surface albedo environment-ref	lectiv	e ro	ofing	and
reflective pa	iving - enhancement of evapotranspiration - tree planting programme - green	roofi	ng st	rateg	ies -
energy cons	servation in buildings – energy efficiencies – carbon sequestration.				
Unit V	ALTERNATE FUELS AND RENEWABLE ENERGY				9
Energy sour	ce – coal, natural gas – wind energy, hydropower, solar energy, nuclear energy	, geo	thern	nal ei	nergy
– biofuels –	Energy policies for a cool future - Energy Audit				
	7	ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understanding on the growing scientific consensus established through the IPCC as well as the complexities and uncertainties	Understand
CO.2	An insight into carbon cycle, physical basis of the natural greenhouse effect	Analyze
CO.3	Evaluate to plan climate change mitigation and adaptation projects including the use of alternate fuels and renewable energy	Evaluate
CO.4	Evaluate to gain in-depth knowledge on climate models	Evaluate
CO.5	Post process the model outputs for climate impact assessment, know about adaptation strategies	Apply
CO.6	Analyze the meaning of the term radioactive forcing, climate change, global warming	Analyze
CO.6	and measures to adapt and to mitigate the impacts of climate change

`					
21CEV6	02 AIR AND NOISE POLLUTION CONTROL ENGINEERING	L	T	Р	С
210210	JAIN AND NOISE I SEESTION SONTHOLE ENGINEERING	3	0	0	3
Course Lo	earning Objectives:				
• To	impart knowledge on the sources, effects and control techniques of air pollutants	and	noise	9	
pc	llution				
Unit I	GENERAL				9
Atmosphe	re as a place of disposal of pollutants – Air Pollution – Definition - Air Pollution a	nd G	lobal	Clim	nate -
Units of m	easurements of pollutants - Air quality criteria - emission standards - National	amb	ient	air q	uality
standards	- Air pollution indices - Air quality management in India.				
Unit II	SOURCES, CLASSIFICATION AND EFFECTS				9
Sources a	nd classification of air pollutants - Man made - Natural sources - Type of air pollu	tants	- Po	llution	n due
to automo	oiles - Analysis of air pollutants - Chemical, Instrumental and biological methods	Air p	olluti	on a	nd its
effects on	human beings, plants and animals - Economic effects of air pollution - Effect	t of a	ir po	ollutio	n on
meteorolo	gical conditions - Changes on the Meso scale, Micro scale and Macro scale				
Unit III	SAMPLING, METEOROLOGY AND AIR QUALITY MODELLING				9
Sampling	and measurement of particulate and gaseous pollutants - Ambient air sampling	g - S	tack	sam	pling.
Environme	ntal factors - Meteorology - temperature lapse rate and stability – Adiabatic lapse	rate	- W	ind R	ose -
Inversion -	- Wind velocity and turbulence - Plume behavior - Dispersion of air pollutants- Air	Quali	ty M	odeli	ng
Unit IV	AIR POLLUTION CONTROL MEASURES				9
Control -	Source correction methods - Control equipments - Particulate control methods	- Baç	g ho	use f	ilter -
Settling ch	namber - cyclone separators - inertial devices - Electrostatic precipitator - scr	ubbei	s -	Cont	rol of
gaseous e	missions - Absorption - Absorption equipments - adsorption and combustion d	evice	s (Tl	heory	/ and
working of	equipments only).				
Unit V	NOISE POLLUTION AND ITS CONTROL				9
Sources of	f noise - Units and Measurements of Noise - Characterization of Noise from C	onstr	uctio	n, M	ining,
Transporta	tion and Industrial Activities, Airport Noise – General Control Measures – Effects	of no	oise	pollut	tion –
auditory e	fects, non-auditory effects. Noise Menace- Prevention and Control of Noise Po	ollutio	n –	Cont	rol of
noise at s	ource, control of transmission, protection of exposed person - Control of other ty	pes o	f No	ise S	ound

TOTAL - 45 Periods

Absorbent

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand various types and sources of air pollution and its effects	Understand
CO.2	Analyze the dispersion of air pollutants and their modeling	Analyze
CO.3	Analyze about the principles and design of control of particulate pollutants	Analyze
CO.4	Design of control of gaseous pollutant	Design
CO.5	Analyze the sources, effects and control of vehicular, indoor air and noise pollution	Analyze
CO.6	Apply the noise pollution and air pollution in the field	Apply

21CEV604	INDUSTRIAL WASTEWATER MANAGEMENT	Г		Р	С			
		3	0	0	3			
Course Learning Objectives:								
 To impart knowledge on the concept and application of Industrial pollution prevention, cleaner 								
technol	ogies, industrial wastewater treatment and residue management.							
Unders	 Understand principles of various processes applicable to industrial wastewater treatment. 							
Identify	the best applicable technologies for wastewater treatment from the pe	erspe	ctive	of y	/ield			
product	ion							
Unit I INTR	ODUCTION				8			
Industrial scena	ario in India- Industrial activity and Environment - Uses of Water by indus	stry -	- Soi	urces	and			
types of indust	rial wastewater - Nature and Origin of Pollutants - Industrial wastewater	and	envi	ronm	ental			
impacts – Regu	latory requirements for treatment of industrial wastewater – Industrial waste	surv	ey –	Indu	strial			
wastewater mo	nitoring and sampling – generation rates, characterization and variables –	Гохісі	ty of	indu	strial			
effluents and Bi	oassay tests – Major issues on water quality management							
Unit II INDU	ISTRIAL POLLUTION PREVENTION &WASTE MINIMISATION				8			
Prevention vis	a vis Control of Industrial Pollution – Benefits and Barriers – Waste mana	geme	nt H	ierar	chy -			
Source reduction	n techniques - Periodic Waste Minimisation Assessments - Evaluation of F	Pollut	ion F	reve	ntion			
Options - Cost	benefit analysis - Pay-back period - Implementing & Promoting Pollution P	reven	tion	Prog	rams			
in Industries								
Unit III INDU	STRIAL WASTEWATER TREATMENT				10			
Flow and Load	Equalisation – Solids Separation – Removal of Fats, Oil & Grease- Neutral	isatio	n- R	emov	al of			
Inorganic Cons	tituents – Precipitation, Heavy metal removal, Nitrogen & Phosphorousremo	oval,	lon e	excha	ange,			
Adsorption, Mei	mbrane Filtration, Electro dialysis & Evaporation –Removal of Organic Cons	tituer	ıts –	Biolo	gical			
treatment Proce	esses, Chemical OxidationProcesses, Advanced Oxidation processes – Trea	tabilit	y Stu	ıdies				
Unit IV WAS	STEWATER REUSE AND RESIDUAL MANAGEMENT				9			
Individual and	Common Effluent Treatment Plants – Joint treatment of industrial and don	nestic	was	stewa	ater -			
Zero effluent di	scharge systems - Quality requirements for Wastewater reuse Industrial reu	ıse ,	Pres	ent s	tatus			
and issues - Di	and issues - Disposal on water and land - Residuals of industrialwastewater treatment - Quantification and							

characteristics of Sludge - Thickening, digestion, conditioning, dewatering and disposal of sludge -

Management of ROreject

Unit V	CASE STUDIES
--------	--------------

9

Industrial manufacturing process description, wastewater characteristics, source reduction options and waste treatment flow sheet for Textiles – Tanneries – Pulp and paper – metal finishing – Sugar and Distilleries

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the source and types of industrial wastewater and	Understand
CO.2	Identify industrial wastewater pollution and implement pollution prevention, waste minimization in industries	Analyze
CO.3	Apply knowledge and skills to design industrial wastewater treatment schemes	Apply
CO.4	Analyze environmental performance of industries to internal, external client, regulatory bodies and design water reuse management techniques	Analyze
CO.5	Conduct research to develop effective management systems for industrial wastewater that are technically sound, economically feasible and socially acceptable	Create
CO.6	Environmental impacts and choose the regulatory laws pertaining to environmental protection	Evaluate

Text Books:

- 1. "Industrial wastewater management, T reatment & disposal, Water Environment" Federation Alexandria Virginia, Third Edition, 2008.
- 2. Lawrance K. Wang, Yung Tse Hung, Howard H.Lo and Constantine Yapijakis "handlook of Industrial and Hazardous waste Treatment", Second Edition, 2004.
- 3. Metcalf & Eddy, Inc., George Tchobanoglous, Franklin L. Burton and H. David Stensel, Wastewater engineering, treatment and reuse, Fourth Edition, McGraw-Hill, 2017

- 3. Paul L. Bishop, Pollution Prevention: Fundamentals and Practice", Mc-Graw Hill International, Boston, 2000.
- 4. Waste water Treatment for pollution control and reuse by Soli. J. Arceivala, Shyam. R. Asolekar, Tata McGraw Hill, 2007

`						
21CEV605	MUNICIPAL SOLID WASTE MANAGEMENT	L	T	Р	С	
		3	0	0	3	
Course Learning Objectives:						
 To imp 	• To impart the knowledge and skills to identify and assess the waste storage, collection, transfer,					
handlir	g and disposal measures.					
To prov	vide the knowledge on issues of solid waste management.					
 To give 	an overview of legislation and regulations of solid waste management					
Unit I INT	RODUCTION TO SOLID WASTE MANAGEMENT				9	
Need and obj	ectives – waste management hierarchy – Functional elements – Enviro	nme	ntal	impa	ct of	
mismanageme	nt – solid waste: Sources, types, composition, quantities, physical, chem	nical	and	biolo	gical	
properties						
Unit II STO	RAGE, COLLECTION & TRANSFER				9	
General consid	derations for waste storage at source - factors affecting storage and co	llection	on -	colle	ection	
services - coll	ection system, equipments, time and frequency of collection - labour requ	ireme	ent -	colle	ection	
routes – prepa	ration of master schedules - Need for transfer operation transfer station	s – t	ypes	: Tra	nsfer	
stations – selec	ction of location, types & design requirements, operation & maintenance					
Unit III PRO	CESSING & DISPOSAL OF MUNICIPAL SOLID WASTE				9	
Processing ted	hnologies: composting, incineration and pyrolysis. Energy recovery from	solid	was	ste –	Bio-	
methanation. [Disposal: Landfill and its introduction – Essential components – site sele	ction	– L	and	filling	
methods - Lea	chate analysis and landfill gas management - treatment and disposal. Mo	unicip	al s	olid v	vaste	
management re	ules 2016.					
Unit IV BIC	MEDICAL WASTE MANAGEMET & HEALTH ASPECTS				9	
Biomedical wa	ste: sources and generation - classification of biomedical waste - manage	men	tec	hnolo	gies.	
Health Aspect	Health Aspects: handling, processing, segregation, recovery, recycling and reuse of solid waste. Public					
involvement and participation in solid waste management practices. Biomedical waste management rules 2016						
Unit IV IND	USTRIAL & E-WASTE MANAGEMENT				9	
Industrial waste	e: sources - types - collection and disposal - control measures - recycling. I	E-wa	ste:	sour	ces –	
types – recyclir	ng – disposal. Dangers of E-waste. E – Waste management Rules 2016					

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the waste management hierarchy and identify opportunities to minimize solid waste production.	Understand
CO.2	Analyze the suitable site for landfill and processing facility.	Analyze
CO.3	Evaluate physical and chemical analysis of municipal solid wastes and	Evaluate
CO.4	Integrate technical solid waste management options and imposed environmental legislation to develop legal and safe solutions.	Evaluate
CO.5	Prepare a route optimization for a solid waste collection and transport system.	Apply
CO.6	Apply them for a management system that will be set up.	Apply

Text Books:

- 1. Cherry P M, Solid and Hazardous Waste Management, CBS publishers and distributors Pvt Ltd, 2018.

21CEV606	ENVIRONMENTAL LAWS AND POLICIES	ITAL LAWS AND POLICIES	T	Р	С
,,		3	0	0	3

Course Learning Objectives:

- To impart knowledge on the policies, legislations, institutional frame work and enforcement mechanisms for environmental management in India.
- To equip the students with the skills needed for interpreting laws, policies and judicial decisions.
- To explore issues relating to the development and deployment of new and emerging technologies, that will create a thorough understanding of smart processes and systems of the present and future

Unit I INTRODUCTION 9

Indian Constitution and Environmental Protection – National Environmental policies – Precautionary Principle and Polluter Pays Principle – Concept of absolute liability – multilateral environmental agreements and Protocols – Montreal Protocol, Kyoto agreement, Rio declaration – Environmental Protection Act, Water (P&CP) Act, Air (P&CP) Act – Institutional framework (SPCB/CPCB/MOEF)

Unit II WATER (P & CP) ACT, 1974

8

Power & functions of regulatory agencies - responsibilities of Occupier, Provision relating to prevention and control, Scheme of Consent to establish, Consent to operate – Conditions of the consents – Outlet – Legal sampling procedures, State Water Laboratory – Appellate Authority – Penalties for violation of consent conditions etc. Provisions for closure/directions in apprehended pollution situation.

Unit III AIR (P & CP) ACT, 1981

8

Power & functions of regulatory agencies - responsibilities of Occupier, Provision relating to prevention and control, Scheme of Consent to establish, Consent to operate - Conditions of the consents - Outlet - Legal sampling procedures, State Air Laboratory - Appellate Authority - Penalties for violation of consent conditions etc. Provisions for closure/directions in apprehended pollution situation.

Unit IV | ENVIRONMENT (PROTECTION) ACT, 1986

12

Genesis of the Act – delegation of powers – Role of Central Government - EIA Notification – Sitting of Industries – Coastal Zone Regulation - Responsibilities of local bodies mitigation scheme etc., for Municipal Solid Waste Management - Responsibilities of Pollution Control Boards under Hazardous Waste rules and that of occupier, authorization – Biomedical waste rules – responsibilities of generators and role of Pollution Control Boards.

Unit V OTHER TOPICS & ISO 14000 SERIES

8

Relevant Provisions of Indian Forest Act, Background and development of ISO 14000 series Public Liability Insurance Act, CrPC, IPC -Public Interest Litigation - Writ petitions - Supreme Court Judgments in Landmark cases. Environmental law in India: Environmental policy and laws.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the key principles of, and actors within, environmental laws.	Understand
CO.2	Analyze environmental laws within various contexts	Analyze
CO.3	Evaluate laws against procedural and substantive criteria.	Evaluate
CO.4	Analyze legal knowledge and the Legal system operating in India and will be in a position	Analyze
CO.5	Evaluate compliance reports for getting environmental clearance	Evaluate
CO.6	To know the origins and sources of environmental laws, and understand how and by whom environmental laws are made and interpreted.	Apply

Text Books:

- 1. Shyam Divan and Armin Roseneranz "Environmental law and policy in India" Oxford University Press, New Delhi, 2001.
- 2. Dr Nishtha Jaswal Dr. P S Jaswal "Environmental Law" Allahabad Law Agency, 2017.

- 1. 1 CPCB, "Pollution Control acts, Rules and Notifications issued there under "Pollution Control Series PCL/2/1992, Central Pollution Control Board, Delhi, 1997.
- 2. Greger I. Megregor, "Environmental law and enforcement", Lewis Publishers, London1994.
- 3. Constitution of India [Referred articles from part-III, part-IV and part-IV A]
- 4. Pares Distn. Environmental Laws in India (Deep, Latest edition.)
- 5. Handbook of environmental management and technology: Gwendolyn Holmes, Ben Ramnarine Singh, Louis Theodore.
- 6. The ISO 14000 Handbook: Joseph Cascio.

- 7. ISO 14004: Environmental management systems: General guidelines on principles, systems and supporting techniques (ISO 14004:1996 (E)).
- 8. ISO 14001: Environmental management systems: Specification with guidance for use (ISO 14001:1996b(E)).

21CEV6	507	ENVIRONMENTAL HEALTH AND SAFETY	L	T	Р	С		
210240	,,,,	LIVINGINIERIAL HEALIH AND GALLII	3 0 0					
Course Learning Objectives:								
• To	educ	ate overview of EHS in industries and related Indian regulations, types	of He	alth	haza	ards,		
eff	fect, as	ssessment and control methods and EHS Management System						
Unit I	INTRO	DDUCTION				9		
Need for d	develop	ping Environment, Health and Safety systems in work places- International	initia	tives	s, Nat	ional		
Policy and	d Legis	slations on EHS in India - Regulations and Codes of Practice - Role of	trad	e un	ion s	afety		
representa	atives -	- Ergonomics						
Unit II	occi	JPATIONAL HEALTH AND HYGIENE				10		
Definition	of occi	upational health and hygiene - Categories of health hazards – Exposure pa	athwa	ys a	nd hu	ıman		
responses	–Ехро	sure Assessment-occupational exposure limits - Hierarchy of control m	neasu	ıres	- Ro	le of		
personal p	rotecti	ve equipment and the selection criteria						
Unit III	WORI	KPLACE SAFETY AND SAFETY SYSTEMS				11		
Features	of Sat	tisfactory and Safe design of work premises – good housekeeping -	lighti	ng a	and o	color,		
Ventilation	and F	leat Control, Noise, Chemical and Radiation Safety – Electrical Safety – Fir	e Saf	ety -	- Safe	ety at		
Constructi	on site	s, ETP – Machine guarding – Process Safety, Working at different levels						
Unit IV	HAZ	ARDS AND RISK MANAGEMENT				8		
Safety app	oraisal	 Job Safety Analysis-Control techniques – plant safety inspection – Acc 	ident	inve	stiga	tion -		
Analysis a	and Re	porting – Hazard and Risk Management Techniques –Onsite and Offsite	eme	erger	ncy P	lans.		
Employee	Partic	ipation- Education and Training- Case Studies						
Unit V	ENVI	RONMENTAL HEALTH AND SAFETY MANAGEMENT				7		
Concept of	of Envi	ronmental Health and Safety Management - Elements of Environmental	Hea	lth a	nd S	afety		
Managem	ent Po	licy and implementation and review – ISO 45001-Strucure and Clauses-Cas	se Sti	udies	;			
		Т	ОТА	L - 4	5 Pei	riods		

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the need for EHS in industries and related Indian regulations	Understand
CO.2	Analyze various types of Health hazards, effect	Analyze
CO.3	Analyze various types of Health assessment and control methods	Analyze
CO.4	Evaluate the methodology for preparation of Emergency Plans and Accident investigation	Evaluate
CO.5	Apply the EHS Management System and its elements	Apply
CO.6	Apply the safety measurements	Apply

Text Books:

- 2.Environmental and Health and Safety Management by Nicholas P.Cheremisinoff and Madelyn L. Graffia, William Andrew Inc. NY, 1995

21CEV701	WATER RESOURCES MANAGEMENT	L	T	Р	С
		3	0	0	3
Course Learn	ng Objectives:				
 To ena 	ble the students to understand the regional and global experiences of particip	atory	ided	ology	in
irrigatio	n water management				
 To help 	students acquire knowledge on paradigms shifts and reorientations with reg	ard to	stal	keho	lder
particip	ation in water management in general and in irrigation management in partic	ular.			
Unit I FUN	DAMENTALS OF SOCIOLOGY AND PARTICIPATORY APPROACH				6
Basic Sociolog	ical concepts and Definitions - Objectives - Perspectives- Social stratifica	ation	– Sc	ociolo	ogical
understanding	- Irrigation as a Sociotechnical Process - paradigm shift and Participatory app	oroac	h		
Unit II UND	ERSTANDING FARMERS PARTICIPATION				12
Need of farmer	s participation –Benefits of farmers participation – Comparisons of cost and b	enefi	t		
Water User As	ssociation Membership - Kinds of participation - National and Internati	onal	Ехре	erien	ces -
Activities on W	ater towards Organization and Structure - Context of participation-factors in the	ne en	viron	men	t.
Unit III ROL	E OF STAKEHOLDERS AND THE UNDERLYING ISSUES				12
Multiple use of	water - Issues in sectoral Water Allocation - Domestic, Irrigation, Industrial	secto	rs - V	Vom	an as
a water user	-Constraints and Opportunities. Role of Community Organisers - Constr	aints	in C	Orgar	nising
farmers Organi	sation				
Unit IV IMF	PROVING AGENCY RELATIONS AND INSTITUTIONAL REFORMS				10
Supporting far	mer organization and participation -Decision Making- Leadership and	res	pons	ibiliti	es -
Development s	trategy – Channels for implementation — Equity and Equality- Agency Incen	tives	- Tec	hnic	al co-
operation - Sp	ecial roles – Agency Roles- Institutional Reforms				
Unit V POI	ICY CONSIDERATIONS AND EMERGING CHALLENGES				5
Water Policy-Ir	rigation Governance-Building from Below-Non-political Associations-Bureaud	cratic	Reo	rienta	ation-
Policy options	and Alternatives and Sustainability				
	Т	ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understanding of recommendation for improved irrigation management with a vision to transform the existing governance and	Understand
CO.2	Acquire a clear insight into the subject matter of participatory ideology with its rudiments under the light of both national and international illustrative cases.	Evaluate
CO.3	Comprehend the roles of different players as stakeholders with the ground reality of the underlying issues in farm community.	Analyze
CO.4	Articulate as how reforms can help build up institutional and irrigation agencies with the support obtained from the existing farm network in irrigation Management	Apply
CO.5	Analyze policies with the novel approach of sustainability	Analyze
CO.6	Capture to fundamental concepts and terms which are to be applied and understood all through the study.	Apply

21CEV	702	GROUNDWATER ENGINEERING	3	0	0	3
Course L	earnin	g Objectives:				
		luce the student to the principles of Groundwater governing Equations and	l Cha	racte	eristio	s of
		aquifers,	. 0		3110111	,,,
		rstand the techniques of development and management of groundwater				
		art knowledge on Well hydraulics & assess the quality of water as a	oer I	Envir	onme	ental
	-	pry requirements				
	•	knowledge on water conservation & treatment				
Unit I	HYDR	OGEOLOGICAL PARAMETERS				9
Introduction	on – W	ا ater bearing Properties of Rock – Type of aquifers - Aquifer properties – p	erme	abilit	y, sp	ecific
yield, tran	smissiv	vity and storage coefficient – Methods of Estimation – GECnorms - Steady	state	flow	Da	arcy's
Law - Gro	undwa	ter Velocity Dupuit Forchheimer assumption - Steady Radial Flow into a	Well			-
Unit II	WELL	HYDRAULICS				9
Unsteady	state f	low - Theis method - Jacob method - Chow's method - Law of Times -	- The	is R	ecov	ery –
Bailer me	thod –	Slug method - tests - Image well theory $-$ Partial penetrations of wells $-$ We	ell los	sses	– Sp	ecific
Capacity a	and Sa	fe yield - Collector well and Infiltration gallery				
Unit III	GROU	INDWATER MANAGEMENT				9
Need for	Manag	gement Model – Database for Groundwater Management – Groundwate	er ba	lance	e stu	idy –
Introduction	on to M	lathematical model – Model Conceptualization – Initial and Boundary Cond	ition	– Ca	librat	ion –
Validation	– Futu	re Prediction – Sensitivity Analysis – Uncertainty – Development of a mode	I			
Unit IV	GRO	UNDWATER QUALITY				9
Ground w	ater ch	emistry - Origin, movement and quality - Water quality standards – Drinkin	g wa	ter –	Indu	ıstrial
water – Irr	rigation	water - Ground water Pollution and legislation - Environmental Regulatory	requi	reme	ents	
Unit V	GRO	JNDWATER CONSERVATION				9
Artificial r	echarg	e techniques – Reclaimed wastewater recharge – Soil aquifer treatme	nt (S	AT)	- A	quifer
Storage a	and Re	covery (ASR)Seawater Intrusion and Remediation - Ground water Basir	n ma	nage	men	and
Conjunctiv	ve use	 Protection zone delineation, Contamination source inventory and remedia 	tion	schei	mes	
		т	ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the importance of artificial recharge and groundwater quality	Understand
00.1	concepts	
CO.2	Develop a model for groundwater management.	Apply
CO.3	Assess various methods in well hydraulics	Analyze
CO.4	Interpret the measures for prevention of sea water intrusion.	Analyze
CO.5	Apply knowledge of ground water conservation to recharge ground water.	Apply
CO.6	Evaluate the quantity and quality of ground water by Conduct ground water	Evaluate
00.0	survey work.

21CEV	705 INTEGRATED WATER RESOURCES MANAGEMENT	L L	Т	Р	С
		3	0	0	3
Course L	earning Objectives:				
• S	tudents will be introduced to the concepts and principles of IWRM, which is inclusi	ve of	the		
е	conomics, public-private partnership, water & health, water & food security and leg	jal & r	egul	atory	
S	ettings.				
Unit I	CONTEXT FOR IWRM				9
Water as	a global issue: Key challenges – Definition of IWRM within the broader context of	deve	lopm	ent -	- Key
elements	of IWRM - Principles – Paradigm shift in water management - Complexity of the	WRM	l prod	cess	– UN
World Wa	ter Assessment - SDGs.				
Unit II	WATER ECONOMICS	T			9
Economic	view of water issues: Economic characteristics of water good and services - N	on-ma	arket	mon	etary
valuation	- Water economic instruments - Private sector involvement in water resources	man	agen	nent:	PPP
objectives	s, PPP models, PPP processes, PPP experiences through case studies.				
Unit III	LEGAL ANDREGULATORYSETTINGS				9
Basic no	ion of law and governance: Principles of International and National law in	the	area	of v	water
managem	ent - Understanding UN law on non-navigable uses of International water course	s - In	terna	ationa	al law
for ground	dwater management – World Water Forums – Global Water Partnerships - Deve	lopme	ent o	f IWF	₹M in
line with l	egal and regulatory framework: Case Studies.				
Unit IV	WATER AND HEALTH WITHIN THE IWRMCONTEXT	T			9
Links bet	ween water and health: Options to include water management interventions	for h	ealth	- F	lealth
protection	and promotion in the context of IWRM - Global burden of Diseases - Health in	npact	asse	ssme	ent of
water res	ources development projects – Case studies				
Unit V	AGRICULTURE IN THE CONCEPT OF IWRM				9
Water for	food production: 'blue' versus 'green' water debate - Water foot print - Vir	tual v	vater	trad	e for
achieving	global water and food security - Climate Smart Agriculture - Current water prici	ng pc	licy–	Sco	pe to
relook pri	cing				

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the context and principles of IWRM;	Understand
CO.2	Evaluate the best economic option among the alternatives; illustrate the pros and cons of PPP through case studies	Evaluate
CO.3	Analyze the conventional and integrated ways of water management.	Analyze
CO.4	Analyze the linkages between water-health; develop a HIA framework	Analyze
CO.5	Apply the virtual water concept pave way to alternate policy options	Apply
CO.6	Apply law and governance in the context of IWRM	Apply

21CEV706	URBAN WATER INFRASTRUCTURE	L	T	Р	С
21024700	CABAN WATER IN MACINGOTORE	3	0	0	3
Course Lea	ning Objectives:				
• To in	npart knowledge and skills relevant to water management in the context of urba	nizati	ion a	nd re	late
engineering principles to water supply, storm water and wastewater management, along with related					
regu	ations and best management practices from around the world.				
Unit I UI	RBAN ECOSYSTEM				9
Cities as Ec	ological system – hybrid ecosystem – Resilience in urban ecosystem. Hun	nan d	omp	oner	its of
Ecosystem -	Urban pattern and Ecosystem function. Population and Community dynamics	, func	tions	s of l	Jrban
Ecosystem					
Unit II UI	RBANHYDROLOGY				9
The urban I	ydrological cycle – Function – Human induced changes in urban watersl	ned -	- Ну	drolo	gical
calculation -	Runoff – Infiltration – hydrograph.				
Unit III UI	RBAN STORM WATERMANAGEMENT				9
Design of D	ainage System – Roadway Drainage Analysis – Types of inlet – inlet design	– D	esigr	of s	storm
drain - Storm	water management regulations - structural storm management systems - Ne	wer t	rend	s in s	storm
water manag	ement (Green infrastructure) – installation – operation and maintenance				
Unit IV V	ATER CONSERVATION AND REUSE				9
Trends in s	ipply and demand - indoor conservation - outdoor conservation - water	reuse	e –	Rain	water
harvesting -	public education				
Unit V W	ATER GOVERNANCE				9
Challenges i	n water sector - Institutional setting, Supply Management, Demand Manage	ment	, Wa	ste	water
managemen	- Private sector participation, urban service delivery, customer satisfaction	, fina	ncial	reso	ource
managemen	- case studies of best practices in cities across the world				
	Т	ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand various functional elements of urban ecosystem	Understand
CO.2	Evaluate urban runoff, compute supply and demand of water, draw hydrograph	Evaluate
CO.3	Analyze advantages of Newer techniques of green infrastructure and illustrate benefits	Analyze
CO.4	Evaluate the Operation and Maintenance needs of urban water systems	Evaluate
CO.5	Evaluate the best management practices for Indian context	Evaluate
CO.6	Applyurban service delivery, customer satisfaction, financial resource management	Apply

21CEV7	07 WATER QUALITY AND MANAGEMENT	L	Т	Р	С
ZIGEVI	WATER QUALITY AND MANAGEMENT	3	0	0	3
Course Le	earning Objectives:				
 To 	understand the fundamentals of mathematical models and their importance in wa	ater q	uality	/	
	odelling, and to impart the skills to use water quality modelling software for surface alitymodelling.	e and	grou	ındw	ater
Unit I	MODELLING INSIGHTS				9
Engineers	and Mathematical models-Water quality models - historical development - difference	ent ty	pes o	of mo	dels-
- steps in	model development - importance of model building calibration and verification	on of	mod	dels-	finite
element, fi	nite difference and finite volume methods				
Unit II	POLLUTION TRANSPORT				9
Transport	phenomena - advection, diffusion, dispersion- contamination transport in surfa	ace a	nd s	ubsu	rface
water - Sir	mple transport models -steady state and time variable solutions- conservation o	f ma	ss, n	nome	ntum
and energy	y balance, governing equation for contaminant fate and transport				
Unit III	SURFACE WATER QUALITY MODELLING				9
Water qua	lity modeling of streams, lakes and estuaries - water quality- model sensitivity	– as	sess	ing r	nodel
performan	ce; Models for dissolved oxygen, pathogens and COD, BOD-Streeter Phelp's r	node	l for	poin	t and
distributed	sources – modified streeter Phelp's equations				
Unit IV	GROUNDWATER QUALITY MODELLING				9
Groundwa	ter flow and mass transport of solutes – groundwater quality modelling using no	umeri	cal r	netho	ods –
Parameter	s, Input-output stresses, Initial and Boundary conditions- degradation of orga	anic	com	ooun	ds in
subsurface	e - Model calibration : steady state and unsteady state - sensitivity analysis -	Mod	lel va	alidat	ion –
seawater i	ntrusion – basic concepts and modeling				
Unit V	WATER QUALITY MANAGEMENT MODELS				9
Exposure	to surface water and groundwater quality modelling software's – MIKE 21, W	ASP,	QU	AL2E	and
MODFLOV	V - demonstration - case studies - Modeling multilayer groundwater flow system	– Art	ificia	l rech	narge
feasibility t	hrough modeling – Groundwater contamination, restoration and management				
	Т	ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the pollutant transport phenomena in surface and groundwater	Understand
CO.2	Evaluate the principles of water quality modeling	Evaluate
CO.3	Analyze the water quality of rivers, lakes and estuary.	Analyze
CO.4	Analyze the groundwater contamination transport	Analyze
CO.5	Apply water quality of surface and sub-surface water using numerical solution	Apply
CO.6	Apply the knowledge of surface water quality modeling	Apply

Start C Ba	asic eq	uations – Conservation of mass, moment and Energy - Continuity Equatio	n, Eu	ıler's	Equ	ation,		
Newtoniar	n Fluid	s, Navier-Stokes Equation.ontents here						
Unit II	WAVE	THEORIES				9		
Linear wa	ve the	ory: Governing Equation, Boundary Conditions and solutions, Dispersion	relati	on, C	Cons	tancy		
of wave pe	eriod. I	ntroduction to non-linear wave theories - Stokes, Cnoidal and Solitary wave	theo	ry.				
Unit III	WAVE	KINEMATICS				9		
Wave cel	erity, \	water particle velocities, accelerations, displacements and pressures. Int	egra	l pro	perti	es of		
waves: Ma	ass flu	x, Energy and energy flux, Group speed, Momentum and momentum flux.						
Unit IV	WAV	E TRANSFORMATIONS				9		
Shoaling,	botton	n friction and damping, refraction, reflection and diffraction. Wave Breaking	: Тур	e of	brea	ıking,		
Surf simila	arity p	arameter. Keulegan-Carpenter number, Ursell Parameter, Scattering pa	arame	eter,	Rey	nolds		
Number								
Unit V	WAV	E ANALYSIS				9		
Short terr	Short term wave analysis- Short term wave Height Distribution – Wave period Distribution - Time and							
Frequency	Frequency domain Analysis of Wave Records - Long term wave analysis - Gumbel Distribution - Weibull							
Distributio	Distribution - Statistics analysis of grouped wave data.							
	TOTAL - 45 Periods							

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the wave forces on fixed and floating structures	Understand
CO.2	Evaluate the relative balance of potential and kinetic energies for each of the five fundamental types of oceanic waves in a flat-bottomed ocean	Evaluate
CO.3	Analyze relation between atmosphere and sea states, and wave modeling and spectra.	Analyze
CO.4	Analyze the linear and nonlinear wave theories including the Stokes theory, solitary and cnoidal wave theories.	Analyze
CO.5	Analyze the properties of ocean waves in deep and coastal waters, and mechanisms of wave generation.	Analyze
CO.6	Apply the model for long term and short term waves.	Apply

21CEV8	02	MARINE GEOTECHNICAL ENGINEERING	L	Т	Р	С
ZICEVO	02	WARINE GEOTECHNICAL ENGINEERING	3	0	0	3
Course Le	arnin	g Objectives:				
• Stu	udents	s mainly focused in understanding the physical and engineering properties of	f mai	ine s	oil	
dej	posits	and select suitable marine foundation as per project requirements.				
Unit I	MARI	NE SOIL DEPOSITS				9
Start Marin	ne env	vironment, Physical and engineering properties of marine soils - Specific	probl	ems	relat	ed to
marine soil	l depo	sits.Contents here				
Unit II	SITE	INVESTIGATION IN THE CASE OF MARINE SOIL DEPOSITS				9
Challenges	s of s	site investigation in marine environment, Different site investigation ted	chniq	ues,	sam	pling
techniques	, Geo	physical methods, Recent advancements in site investigation and sampli	ng us	sed f	or m	arine
soil deposit	ts.					
Unit III	BEHA	VIOR OF SOILS SUBJECTED TO REPEATED LOADING				9
Effect of w	ave lo	pading on foundations of marine structures, Behavior of marine deposits u	nder	cycli	c loa	ding,
Cyclic beha	avior o	of soils based on fundamental theory of mechanics, Approximate engineering	g me	thod	s	
Unit IV	FOU	NDATIONS IN MARINE SOIL DEPOSITS				9
Different o	ffshor	e and nearshore foundations, Gravity platforms, Jack-up rigs, pile fou	ndati	ons.	cass	ions,
spudcans.						
Unit V	MARI	NE FOUNDATIONS SUBJECTED TO WAVE LOADING				9
Cyclic behavior of soils, empirical models, elastic-plastic models, FEM analysis of marine foundations subjected						ected
to wave loading.						
	TOTAL - 45 Periods					

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the physical and engineering properties of marine soil deposits	Understand
CO.2	Evaluate the effect of wave loading on physical and engineering properties of marine soil deposits	Evaluate
CO.3	Analyze program for marine soil deposits	Analyze
CO.4	Evaluate suitable marine foundation as per project requirement	Evaluate
CO.5	Apply the Geotechnical problems related to offshore oil exploration and production	Apply
CO.6	Evaluate and make use of a standard report of marine site investigations	Evaluate

21CEV80	03 COASTAL ENGINEERING	L	Т	Р	С		
		3	0	0	3		
Course Le	earning Objectives:						
• To	provide the students the knowledge of coastal environment and to determine the	char	acter	istics	of		
wa	ves.						
 To provide the students the knowledge of wave transformation, sediment transport, coastal protection 					ion		
me	easures and coastal structure design.						
Unit I	COASTAL ENVIRONMENT				9		
Start Conte	ents here Beaches - Coastal features - Coastal Zonation - EEZ -Inshore and Off	shore	Are	as - I	Mean		
Sea level -	Basics of Tides and Waves - Coastal Morphology.						
Unit II	WAVES DYNAMICS				9		
Basics of v	waves - Classification - Wave Theory - Physical Characteristics of different type	s of v	wave	s - L	inear		
Wave Theo	ory - Wave celerity - Velocities -Accelerations - Displacements - Wave dynamics	in sha	allow	and	deep		
water cond	litions.						
Unit III I	NEARSHORE WAVE TRANSFORMATION				9		
Shoaling, re	efraction, diffraction and breaking- Interaction currents and waves- near shore c	urren	ts-wa	ave ru	ın-up		
and overtor	pping						
Unit IV	SEDIMENT DYNAMICS AND TRANSPORT				9		
Introduction	n to sediments, Sediment Analysis, types and sizes of sediments, sedime	entation	on p	roce	sses,		
sediment S	Supply & movement - Cross-shore sediment transport - Long shore sediment t	ransp	ort -	Sho	reline		
Changes -	Shoreline Evolution - Erosion & Accretion.						
Unit V	SHORE PROTECTION				9		
Design of shore defense structures; Hard Engineering measures - Sea walls, Revetments, Bulkheads, Dikes,							
Groynes, Breakwaters; Soft Engineering measures - Artificial Reefs, Beach nourishment, Dune regeneration,							
Salt marsh	Creation, Bioshields - Case studies						
	TOTAL - 45 Periods						

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the basic concepts of coastal environment.	Understand
CO.2	Evaluate sea state parameters (wave height, wave period, water levels) in shallow and deep water conditions.	Evaluate
CO.3	Apply near-shore wave transformation.	Apply
CO.4	Analysis the sediment and its transport processes.	Analyze
CO.5	Evaluate measures to protect beaches from erosion due to waves and currents.	Evaluate
CO.6	Design of shore defense structures model	Create

21CEV8	OFF SHORE STRUCTURES	L	T	Р	С
210240	ST SHOKE STREET SKES	3	0	0	3
Course Le	earning Objectives:				
• To	understand the offshore environment, types, suitability, and design concepts of o	ffsho	re str	uctu	res
as	per the appropriate requirements.				
• St	udents will get familiar with Offshore structures				
• St	udents are familiar with equipments and operation for dredding.				
Unit I	INTRODUCTION TO OFFSHORE ENVIRONMENT				9
Start Co C	Ocean winds-characterization of wind regime-wind velocity profile, Ocean waves	s-wav	e pa	rame	ters
Introductio	on to Airy's wave theory and its applications-brief about time and frequency do	main	anal	ysis,	brie
introductio	n about ocean currents-tides, seaquakes, Ice environment, Ice-sea interactions.nt	ents	here		
Unit II	TYPES OF OFFSHORE STRUCTURES				g
Offshore S	Structures-need for offshore structures. Types of Offshore Structures -component	ts - n	nater	ials ı	used-
design pa	rameters-suitable environment conditions -construction practices - drawbacks	- El	A for	Offs	shore
structures.					
Unit III	FORCES ON OFFSHORE STRUCTURES				9
Introductio	n-Permanent loads-operating loads. Environmental forces-wind force-wave	orce-	curre	ent f	orce-
seaquake	force-Ice force. Force due to tides - Marine growth - Use of API RP 2A guidelines				
Unit IV	SUBMARINE PIPELINES AND RISERS				Ç
Pipeline el	lements-types of pipelines-laying method-materials. Pipe wall thickness verification	n. Pij	pelin	e sta	bility
Design usi	ing DNV 81 code.				
Unit V	ACCIDENTAL LOADS AND CORROSION				9
Fire, Blast	and Collision- Behaviour of steel at elevated temperature- Fire rating for Hyd	rocar	bon	fire,	Blas
Mitigation-	Blast walls- Collision of boats and energy absorption - Corrosion- Corrosion me	echar	ism-	Тур	es o
corrosion-	Offshore structure corrosion zones- Biological corrosion- Preventive measures	of cor	rosic	n- C	nline
corrosion i	monitoring- Corrosion fatigue				

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the offshore environment and technical terms associated with it.	Understand
CO.2	Evaluate suitable offshore structures according to environmental conditions	Evaluate
CO.3	Investigate various types of forces acting on the offshore structures	Analyze
CO.4	Adapt appropriate codes to design the submarine pipelines	Apply
CO.5	Discuss about the accidental loads and corrosion on offshore structures	Evaluate
CO.6	Designof key elements of offshore structure, assessment and integrity	Create
00.0	management. Embrace the thinking of life-cycle structural engineering

21CEV805	PORT AND HARBOUR ENGINEERING	L	LT		С
21024003	TONT AND HANDOON ENGINEERING	3	0	0	3
Course Leari	ning Objectives:				
To ha	ve an overall knowledge of the design and construction of airport, docks, harbo	ours a	and p	orts	as a
whole	o.				
• To un	derstand the function of different components of airports, docks and harbours.				
Unit I INT	RODUCTION				9
Ports and har	bors: Classification of ports & harbours – Port and harbor planning and layou	ut — N	/lete	orolo	gical,
hydrographic	and oceanographic data requirements and measurements for port and harbor	desig	n.		
Unit II PO	RT AND HARBOURLAYOUT OPERATIONS				9
Port and harb	our layout for vessels navigation and cargo handling- port buildings, navigation	on ch	anne	els –:	shore
infrastructure	and utilities, land reclamation – Dredging -equipment, navigation improven	nent.	pipe	elines	and
cables		,	P.P.S		
1	SIGN OF PORT				9
• •	assification of ports and harbours in India, Natural ports and manmade ports,	-	-		
ports; Design	of port infrastructures with regards to cargo handling, cargo storage and inte	egrate	ed tra	ansp	ort of
goods.					
Unit IV DI	ESIGN OF HARBOUR				9
Design harbo	ur Infrastructures - design of break water - shore attached and offshore br	eakw	aters	s des	ign -
harbour basir	n design, approach channel design, turning basin design, with regards to ca	rgo a	and p	asse	nger
terminals					
Unit V CC	DNSTRUCTION ASPECTS AND SMART PORT				9
Planning and	construction, expansion of existing jetties and renovation of port -Inland F	ort l	nfras	struct	ure -
Smart Port :	Levels of transformation into a smart port, Artificial Intelligence and Machin	ne Le	arnii	ng, S	Smart
application for	r ports.				
		ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the classification of port and harbor and study about the data requirement and measurements for port and harbour structures.	Understand
CO.2	Evaluate layout operations for vessel navigation and cargo handling.	Evaluate
CO.3	Demonstrate the basic design of port layout	Analyze
CO.4	Design, plan and integrate port and harbour infrastructure.	Create
CO.5	Evaluate the construction, maintenance and renovation aspects of ports and understand the concept of Smart Port and Smart application for ports	Evaluate
CO.6	Apply the fundamental principles of wave hydrodynamics and port cargo handling	Apply

21CEV807 COASTAL ZONE MANAGEMENT AND REMOTE SENSING		L	Т	Р	С		
ZICEV	007	COASTAL ZONE MANAGEMENT AND REMOTE SENSING	3 0 0			3	
Course L	Course Learning Objectives:						
 To be able to "see" the features and components of the coastal zone. 							
 To assess the various living and non-living resources 							
• T	o unde	rstand the need for coastal zone management and to develop an ICM plan.					
• T	o provi	de the coastal and oceanographic applications of satellite remote sensing.					
Unit I	COAS	STAL ZONE				9	
SCoastal	Zone -	- Beach Profile - Surf Zone - Off Shore - Coastal Waters - Coastal sed	iment	:s - E	Estua	ries-	
Wetlands	and La	agoons – Coastal dunes – Coastal Geomorphology. tart Contents here					
Unit II	COAS	STAL RESOURCES				9	
Types and functions of coastal and marine resources - Renewable and Non-Renewable resources - Living							
marine re	source	s and Nonliving marine resources – Marine minerals-Placer deposits – Hyd	rocarl	bon (depo	sits –	
Polymeta	llic nod	ules.					
Unit III	COAS	STAL ECOSYSTEM				9	
Marine ed	cosyste	em: Mangroves – Seagrass – Seaweeds - Coral reef – Large marine ed	cosys	tem	- Cli	mate	
effects or	n living	marine resources- Biological monitoring of marine ecosystem- Human	impa	cts o	on m	arine	
ecosyster	m.						
Unit IV	COA	STAL REGULATIONS				9	
Introduction- What is ICM- Developing an ICM framework- Principles-Goals-defining boundaries – Coastal							
Regulatio	n Zone	s (CRZ) for main land and Islands –Environmental Law and policy.					
Unit V	REM	OTE SENSING IN COASTAL ZONE MANAGEMENT				9	
Sensors and Platforms used for coastal application -Mapping of Coral Reefs, Macroalgae, Mangrove and							
Wetlands	– Coas	stal Landuse / Land Cover Mapping – Coastal Regulation Zone Mapping – C	Case	studi	es.		

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the science and basic of Coastal zone.	Understand
CO.2	Assess the living marine resources and non-living marine resources.	Analyze
CO.3	Evaluate importance of different ecosystem available in coastal and marine environment.	Evaluate
CO.4	Analyze the coastal regulations for mainland and islands.	Analyze
CO.5	Apply acquire knowledge about various satellites	Apply
CO.6	Apply the sensors used for marine and coastal environment model.	Apply

Text Books:

21CEVG51	SUSTAINABLE INFRASTRUCTURE DEVELOPMENT	L	Т	Р	С
		3	0	0	3

Course Learning Objectives:

- To impart knowledge about sustainable Infrastructure development goals, practices and to understand the concepts of sustainable planning, design, construction, maintenance and decommissioning of infrastructure projects.
- To develop an understanding of tangible ways to improve the economic, social, and environmental performance of urban infrastructure across the design, construction.
- To discuss how sustainability outcomes can be improved in particular forms of infrastructure that align to specific global and national best practice principles.

Unit I SUSTAINABLE DEVELOPMENT GOALS

9

Definitions, principles and history of Sustainable Development - Sustainable development goals (SDG): global and Indian – Infrastructure Demand and Supply - Environment and Development linkages - societal and cultural demands – Sustainability indicators - Performance indicators of sustainability and Assessment mechanism - Policy frameworks and practices: global and Indian – Infrastructure Project finance – Infrastructure project life cycle - Constraints and barriers for sustainable development - future directions.

Unit II SUSTAINABLE INFRASTRUCTURE PLANNING

9

Overview of Infrastructure projects: Housing sector, Power sector, Water supply, road, rail and port transportation sector, rural and urban infrastructure. Environmental Impact Assessment (EIA), Land acquisition -Legal aspects, Resettlement &Rehabilitation and Development - Cost effectiveness Analysis - Risk Management Framework for Infrastructure Projects, Economic, demand, political, socio-environmental and cultural risks. Shaping the Planning Phase of Infrastructure Projects to mitigate risks, Designing Sustainable Contracts, Negotiating with multiple Stakeholders on Infrastructure Projects. Use of ICT tools in planning – Integrated planning - Clash detection in construction - BIM (Building Information Modelling).

Unit III SUSTAINABLE CONSTRUCTION PRACTICES AND TECHNIQUES

9

Sustainability through lean construction approach - Enabling lean through information technology – Lean in planning and design - IPD (Integrated Project Delivery) - Location Based Management System - Geospatial Technologies for machine control, site management, precision control and real time progress monitoring - Role of logistics in achieving sustainable construction – Data management for integrated supply chains in construction - Resource efficiency benefits of effective logistics - Sustainability in geotechnical practice – Design considerations, Design Parameters and Procedures – Quality control and Assurance - Use of sustainable construction techniques: Precast concrete technology, Pre-engineered buildings.

Unit IV SUSTAINABLE CONSTRUCTION MATERIALS

9

Construction materials: Concrete, steel, glass, aluminium, timber and FRP - No/Low cement concrete - Recycled and manufactured aggregate - Role of QC and durability - Sustainable consumption - Eco-efficiency - green consumerism - product stewardship and green engineering - Extended producer responsibility - Design for Environment Strategies, Practices, Guidelines, Methods, And Tools. Eco-design strategies - Design for Disassembly - Dematerialization, rematerialization, transmaterialization - Green procurement and green distribution - Analysis framework for reuse and recycling - Typical.constraints on reuse and recycling - Communication of Life Cycle Information - Indian Eco mark scheme - Environmental product declarations - Environmental marketing- Life cycle Analysis (LCA), Advances in LCA: Hybrid LCA, Thermodynamic LCA - Extending LCA - economic dimension, social dimension - Life cycle costing (LCC) - Combining LCA and LCC - Case studies.

Unit V | SUSTAINABLE MAINTENANCE OF INFRASTRUCTURE PROJECTS

9

Case Studies - Sustainable projects in developed countries and developing nations - An Integrated Framework for Successful Infrastructure Planning and Management - Information Technology and Systems for Successful Infrastructure Management, - Structural Health Monitoring for Infrastructure projects - Innovative Design and Maintenance of Infrastructure Facilities - Capacity Building and Improving the Governments Role in Infrastructure Implementation, Infrastructure Management Systems and Future Directions. – Use of Emerging Technologies – IoT, Big Data Analytics and Cloud Computing, Artificial Intelligences, Machine and Deep Learning, Fifth Generation (5G) Network services for maintenance.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the environment sustainability goals at global and Indian	Understand
CO.1	scenario.	
CO.2	Evaluate risks in development of projects and suggest mitigation measures.	Evaluate
CO.3	Analyze a range of factors that drive good outcomes in infrastructure	Analyze
CO.3	sustainability with a focus on responding to climate change.	
CO.4	Evaluate Life Cycle Analysis and life cycle cost of construction materials.	Evaluate
CO.5	Evaluate the new technologies for maintenance of infrastructure projects.	Evaluate
CO.6	Apply lean techniques, LBMS and new construction techniques to achieve	Apply
CO.0	sustainability in infrastructure construction projects.	

Text Books:

`					
21CEVG5	SUSTAINABLE AGRICULTURE AND ENVIRONMENTAL	L	Т	Р	С
2102403	MANAGEMENT	3	0	0	3
Course Learning Objectives:					
• To e	ducate the students about the issues of sustainability in agroecosystems, introd	luce t	he		
cond	cepts and principles of agroecology as applied to the design and management o	f sus	taina	ble	
• agrid	cultural systems for a changing world.				
Unit I A	GROECOLOGY, AGROECOSYSTEM AND SUSTAINABLE AGRICULTURE				9
С	ONCEPTS				
Ecosystem of	definition - Biotic Vs. abiotic factors in an ecosystem - Ecosystem processes -	Ecol	ogica	al ser	vices
and agricult	ure - Problems associated with industrial agriculture/food systems - Defir	ning	susta	inab	ility -
Characterist	ics of sustainable agriculture - Difference between regenerative and sus	tainal	ole a	agric	ulture
systems.					
Unit II S	OIL HEALTH, NUTRIENT AND PEST MANAGEMENT				9
Soil health of	definition - Factors to consider (physical, chemical and biological) - Compositi	on o	heal	thy s	oils -
Soil erosion	and possible control measures - Techniques to build healthy soil -Manage	emen	t pra	actice	s for
improving so	oil nutrient - Ecologically sustainable strategies for pest anddisease control.				
Unit III W	ATER MANAGEMENT				9
Soil water s	storage and availability - Plant yield response to water - Reducing evapora	tion i	n ag	ricult	ure -
Earthworks	and tanks for rainwater harvesting - Options for improving the productivity of	f wat	er -	Loca	alized
irrigation -	rrigation scheduling - Fertigation - Advanced irrigation systems and agriculation	ultura	l pra	ctice	s for
sustainable	water use.				
Unit IV E	ENERGY AND WASTE MANAGEMENT				9
Types and s	sources of agricultural wastes - Composition of agricultural wastes – Sustainal	ble te	chno	ologie	es for
the manage	ment of agricultural wastes - Useful and high value materials produced using	diffe	ent	oroce	esses
from agricultural wastes - Renewable energy for sustainable agriculture.					
Unit V E	VALUATING SUSTAINABILITY IN AGROECOSYSTEMS				9
Indicators of	f sustainability in agriculture - On-farm evaluation of agroecosystem sustain	abilit	y - /	Alterr	ative
agriculture approaches/ farming techniques for sustainable food production - Goals and components of a					
community f	ood system - Case studies.				

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the concepts, principles and advantages of sustainableagriculture.	Understand
CO.2	Evaluate the sustainable ways in managing soil health, nutrients, pests and diseases.	Evaluate
CO.3	Analyze suggest the ways to optimize the use of water in agriculture to promote an ecological use of.	Analyze
CO.4	Develop energy and waste management plans for promoting sustainable agriculture in non-sustainablefarming areas	Apply
CO.5	Assess an ecosystem for its level of sustainability and prescribe ways of converting to asustainable system through the redesign of a conventional agroecosystem	Evaluate
CO.6	Apply the farming techniques for sustainable food production model	Apply

21CEVG53	SUSTAINABLE BIO MATERIALS	L	T	Р	С		
		3	0	0	3		
Course Learning Objectives:							
 To learn 	about Fundamentals aspects of Biopolymers and their applications				ļ		
 To learn 	about bioceramics and biopolymers				ļ		
To introd	duce the students about metals as biomaterials and their usage as implants						
To make	the students understand the significance of bionanomaterials and its applic	ation	s.				
 To learn 	about Fundamentals aspects of Biopolymers and their applications						
Unit I INTR	ODUCTION TO BIOMATERIALS				9		
Introduction: De	finition of biomaterials, requirements & classification of biomaterials- Typ	es of	Bio	mate	rials-		
Degradable and	I resorbable biomaterials- engineered natural materials- Biocompatibility	-Hyd	roge	ls-py	rolitic		
carbon for long	term medical implants-textured and porous materials-Bonding types-	cry	stal	struc	cture-		
imperfection in c	rystalline structure-surface properties and adhesion of materials -strength of	f bio	ogic	al tis	sues-		
performance of i	mplants-tissue response to implants- Impact and Future of Biomaterials				ļ		
Unit II BIO F	POLYMERS				9		
Molecular struc	ture of polymers -Molecular weight - Types of polymerization ted	hniq	ues-	Туре	s of		
polymerization i	reactions- Physical states of polymers- Common polymeric biomaterials	s - F	Polye	ethyle	ene -		
Polymethylmeth	acrylate (PMMA-Polylactic acid (PLA) and polyglycolic acid (PGA) - Polyca	aprola	actor	e (P	CL) -		
Other biodegrad	lable polymers -Polyurethan- reactions polymers for medical purposes -	Colla	gens	s- El	astin-		
Cellulose and de	erivatives-Synthetic polymeric membranes and their biological applications						
Unit III BIO C	ERAMICS AND BIOCOMPOSITES				9		
General proper	ties- Bio ceramics -Silicate glass - Alumina (Al2O3) -Zirconia (ZrO2)-Caı	bon-	Ca	lcium		
phosphates (Ca	phosphates (CaP)- Resorbable Ceramics- surface reactive ceramics- Biomedical Composites- Polymer Matrix						
Compsite(PMC)-Ceramic Matrix Composite(CMC)-Metal Matrix Composite (MMC)- glass ceramics -							
Orthopedic impla	Orthopedic implants-Tissue engineering scaffolds						
Unit IV MET	ALS AS BIOMATERIALS				9		
Biomedical met	als-types and properties-stainless steel-Cobalt chromium alloys-Titanium	allo	ys-	Tanta	alum-		

Nickel titanium alloy (Nitinol)- magnesium-based biodegradable alloys-surface properties of metal implants for

osteointegration-medical application-corrosion of metallic implants – biological tolerance of implant metals

Unit V NANOBIOMATERIALS

9

Meatllicnanobiomaterials—Nanopolymers-Nanoceramics- Nanocomposites -Carbon based nanobiomaterials - transport of nanoparticles- release rate-positive and negative effect of nanosize-nanofibres-Nano and micro features and their importance in implant performance-Nanosurface and coats-Applications nanoantibiotics-Nanomedicines- Biochips — Biomimetics- BioNEMs -Biosensor- Bioimaging/Molecular Imaging- challenges and future perspective.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Describe biomaterials, classifications, their properties, performance	Understand
00.1	specification and biological applications	
CO.2	Evaluate important Bioceramics and Biocomposite materials	Evaluate
	Apply the knowledge of biomaterials to judge which material/implant should	Apply
CO.3	be used for what kind of application according to nature of diseased and ill	
	area of the body	
CO.4	Decide the testing procedure for specific biomaterial/implant and evaluate the	Apply
00.4	response of biomaterial/Implant to Human body	
CO.5	Analyze methods to modify surfaces of biomaterials and choose material for	Analyze
00.5	sustainable development.	
CO.6	Analyze the biocompatibility and toxicological screening of biomaterials	Analyze

21CEVG54	MATERIALS FOR ENERGY SUSTAINABILITY	L	Т	Р	С
		3	0	0	3

Course Learning Objectives:

- To familiarize the students about the challenges and demands of energy sustainability
- To provide fundamental knowledge about electrochemical devices and the materials used.
- To introduce the students to various types of fuel cell
- To enable students to appreciate novel materials and their usage in photovoltaic application
- To introduce students to the basic principles of various types Super capacitors and the materials used.

Unit I SUSTAINABLE ENERGY SOURCES

9

Introduction to energy demand and challenges ahead – sustainable source of energy (wind, solar etc.) – electrochemical energy systems for energy harvesting and storage – materials for sustainable electrochemical systems building – India centric solutions based on locally available materials – Economics of wind and solar power generators vs. conventional coal plants – Nuclear energy

Unit II | ELECTROCHEMICAL DEVICES

9

Electrochemical Energy – Difference between primary and secondary batteries – Secondary battery (Li-ion battery, Sodium-ion battery, Li-S battery, Li-O2 battery, Nickel Cadmium, Nickel MetalHydride) – Primary battery (Alkaline battery, Zinc-Carbon battery) – Materials for battery (Anode materials – Lithiated graphite, Sodiated hard carbon, Silicon doped graphene, Lithium Titanate) (Cathode Materials – S, LiCoO2, LiFePO4, LiMn2O4) – Electrolytes for Lithium-ion battery (ethylene carbonate and propylene carbonate based)

Unit III FUEL CELLS

9

Principle of operation of fuel cells – types of fuel cells (Proton exchange membrane fuel cells, alkaline fuel cell, direct methanol fuel cells, direct borohydride fuel cells, phosphoric acid fuel cells, solid oxide fuel cells, and molten carbonate fuel cells) – Thermodynamics of fuel cell – Fuel utilization – electrolyte membrane (proton conducting and anion conducting) – Catalysts (Platinum, Platinum alloys, carbon supported platinum systems and metal oxide supported platinum catalysts) – Anatomy of fuel cells (gas diffusion layer, catalyst layer, flow field plate, current conductors, bipolar plates and monopolar plates).

Unit IV PHOTOVOLTAICS

9

Physics of the solar cell – Theoretical limits of photovoltaic conversion – bulk crystal growth of Si and wafering for photovoltaic application - Crystalline silicon solar cells – thin film silicon solar cells – multijunction solar cells – amorphous silicon based solar cells – photovoltaic concentrators – Cu(InGa)Se2 solar cells – Cadium Telluride solar cells – dye sensitized solar cells – Perovskite solar cells – Measurement and characterization of solar cells - Materials used in solar cells (metallic oxides, CNT films, graphene, OD fullerenes, single-multi walled carbon nanotubes, two-dimensionalGraphene, organic or Small molecule-based solar cells materials - copper-phthalocyanine and perylenetetracarboxylicbis - benzine – fullerenes - boron subphthalocyanine- tin (II) phthalocyanine

Unit V SUPERCAPACITORS

9

Super capacitor –types of super capacitors (electrostatic double-layer capacitors, pseudo capacitor sand hybrid capacitors) - design of super capacitor-three and two electrode cell-parameters of super capacitor- Faradaic and non - Faradaic capacitance – electrode materials (transition metaloxides (MO), mixed metal oxides, conducting polymers (CP), Mxenes, nanocarbons, non-noblemetal, chalcogenides, hydroxides and 1D-3D metal-organic frame work (MOF), activated carbonfibres (ACF)- Hydroxides-Based Materials - Polyaniline (PANI), a ternary hybrid composite conductive polypyrrole hydrogels – Different types of nano composites for the SC electrodes(carbon–carbon composites, carbon-MOs composites, carbon-CPs composites and MOs-CPs composites) - Two-Dimensional (2D) Electrode Materials - 2D transition metal carbides, carbonitrides, and nitrides.

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	understand the principles of different electrochemical devices	Understand
CO.2	.Analyze acquire knowledge about energy sustainability.	Analyze
CO.3	Apply knowledge of the relationship between material properties and their suitability for energy-related applications	Apply
CO.4	Apply knowledge on different types of supercapacitors and the performance of various materials	Apply
CO.5	Analyze scientific literature related to energy materials and sustainability.	Analyze
CO.6	Evaluate the basic principles and concepts of materials science and engineering related to energy sustainability.	Evaluate

Text Books:

- 1. Functional materials for sustainable energy applications; John A. Kilner, Stephen J. Skinner, Stuart J. C. Irvine and Peter P. Edwards.
- 2. Hand Book of Fuel Cells: Fuel Cell Technology and Applications, Wolf Vielstich, Arnold Lamm, Hubert Andreas Gasteiger, Harumi Yokokawa, Wiley, London 2003.

- 1. B.E. Conway, Electrochemical supercapacitors: scientific fundamentals and technological
 - a. applications, Kluwer Academic / Plenum publishers, New York, 1999.
- 2. T.R. Crompton, Batteries reference book, Newners, 3rd Edition, 2002
- 3. Materials for Supercapacitor applications; B.Viswanathan. M.Aulice Scibioh Electrode Materials for Supercapacitors: A Review of Recent Advances, Parnia
- 4. Forouzandeh, Vignesh Kumaravel and Suresh C. Pillai, catalysts 2020.
- 5. Recent advances, practical challenges, and perspectives of intermediate temperature solid
- 6. oxide fuel cell cathodes Amanda Ndubuisi, Sara Abouali, Kalpana Singh and
- 6. VenkataramanThangadurai, J. Mater. Chem. A, 2022.
- 7. Review of next generation photovoltaic solar cell technology and comparative materialistic
- 8. development Neeraj Kant, Pushpendra Singh, Materials Today: Proceedings, 2022.
- 9. B.E. Conway, Electrochemical supercapacitors: scientific fundamentals and technological a. applications, Kluwer Academic / Plenum publishers, New York, 1999.

21CEVG5	GREEN TECHNOLOGY	L	T	Р	С
	GREEN IZGIINGZGGI	3	0	0	3
Course Lea	arning Objectives:				
To a	acquire knowledge on green systems and the environment, energy technology a	and e	efficie	ency,	and
sust	ainability.				
Тор	provide green engineering solutions to energy demand, reduced energy footprint.				
Unit I P	RINCIPLES OF GREEN CHEMISTRY				(
Historical P	erspectives and Basic Concepts. The twelve Principles of Green Chemistry and	gree	n en	gine	ering
Green chem	nistry metrics- atom economy, E factor, reaction mass efficiency, and other green	che	mistı	y me	trics
application of	of green metrics analysis to synthetic plans.				
Unit II P	OLLUTION TYPES				9
Pollution –	types, causes, effects, and abatement. Waste - sources of waste, different	nt ty	pes	of w	aste
chemical, pl	nysical and biochemical methods of waste minimization and recycling.				
Unit III G	REEN REAGENTS AND GREEN SYNTHESIS				,
Environmen	tally benign processes- alternate solvents- supercritical solvents, ionic liquids,	wate	r as	a rea	ction
medium, en	ergy-efficient design of processes- photo, electro and sono chemical methods, r	micro	wav	e-ass	siste
reactions					
	DESIGNING GREEN PROCESSES				ç
Unit IV		esiar	<u> </u>	Desig	n fo
	n, process intensification, in process monitoring. Safe product and process de	00.9.			
Safe design	n, process intensification, in process monitoring. Safe product and process do , Real-time Analysis for pollution prevention, inherently safer chemistry for accide	·	reve	ntion	
Safe desigr degradation		·	revei	ntion	
Safe desigr degradation Unit V	, Real-time Analysis for pollution prevention, inherently safer chemistry for accide	ent p			,
Safe design degradation Unit V Nanomateri	Real-time Analysis for pollution prevention, inherently safer chemistry for accide	ent p or en	viron	men	tal
Safe design degradation Unit V Nanomateric remediation	Real-time Analysis for pollution prevention, inherently safer chemistry for accide REEN NANOTECHNOLOGY als for water treatment, nanotechnology for renewable energy, nanotechnology for	ent p or en	viron	men	tal

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the basic design principles of green engineering and technology	Understand
CO.2	Apply the basic concept to identify pollution types using hazardous chemicals and solvents	Apply
CO.3	Apply advance green reagents and synthesis processes and products to make them green and safe.	Apply
CO.4	Analyse the design processes and products using green technology	Analyze
CO.5	Choose the appropriate green technology for water treatment, renewable energy materials for safe design processing	Analyze
CO.6	Investigate the nanotechnology products as potential substitutes for harmful chemicals, environmental concerns with nanotechnology for current scenario	Analyze/ Mini Project

Text Books:

- Green technology and design for the environment, Samir B. Billatos, Nadia A. Basaly, Taylor & Francis, Washington, DC, ©1997
- 2. Green Chemistry An introductory text M. Lancaster, RSC, 2016.

- 1. Green chemistry metrics Alexi Lapkin and david Constable (Eds) ,Wiley publications, 2008.
- 2. Environmental chemistry, Stanley E Manahan, Taylor and Francis, 2017

21CEV	256	ENVIRONMENTAL QUALITY MONITORING AND ANALYSIS	L	Т	Р	С
ZICEV	330	ENVIRONMENTAL QUALITY MONTORING AND ANALTSIS	3	0	0	3
Course L	.earnin	g Objectives:				
• T	o intro	duce the students to conceive knowledge about the sampling metho	ds fo	or th	e qu	ality
m	nonitorii	ng for Air, Water and Soil.				
• T	he cou	rse will also emphasize environmental investigative techniques, instrument s	selec	tion,	and	
q	uality c	ontrol, including documentation, calibration, and sample management.				
Unit I	Introd	luction to EQM				9
Definition	of Env	vironment - Objectives and functions of monitoring-Environmental Indicat	ors -	Link	bet	ween
source/en	vironm	ent/receptor - Exposure; Health effects; Toxicology - fate and transport of pe	olluta	nts		
Unit II	Quali	ty control and Quality Assurance				9
Quality Page	aramet	ers for environmental water, air and soil - Monitoring of environmental par	amet	ers -	defi	nition
and synth	nesis of	a monitoring – sampling - analysis method – Selection of monitoring sites-	Туре	s of r	monit	oring
program	- Samp	oling requirements- Sampling methods – Preservation of samples - Qua	lity A	Assur	ance	and
quality co	ntrol (C	QA/QC)				
Unit III	Water	Quality Monitoring				9
Water qu	ality g	uidelines – Quality indicators - Monitoring of quality indicators – Water	r qua	lity r	nonit	oring
programs	– In s	itu and Ex situ studies - Structure of monitoring report for water quality -	- Reł	nabili	tatior	and
Sustainab	ole usa	ge.				
Unit IV	Air a	nd Soil Quality Monitoring				9
Air quality	y guide	lines – Air quality monitoring programs – Emission control– Indoor and ou	utdoo	r m	onito	ring -
Soil conta	aminan	ts - Rehabilitation studies - Soil remediation - Barrier system - Physico o	chem	ical r	netho	ods –
Biological	l metho	ds – Rehabilitation studies.				
Unit V	Adva	nced monitoring system				9
Environm	ental Ir	formation system (ENVIS) – Real time monitoring system with GIS and Rer	note	sens	ing –	
Sensors a	and IoT	based techniques – Case Studies.				
		Т	ОТА	L - 4	5 Pe	riods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Comprehend the importance of quality monitoring on society and ecosystem by stressing on quality practices.	Understand
CO.2	Evaluate the nature of exposure, health effects due to transport of toxicants.	Evaluate
CO.3	Identify the contaminants, monitor them and treat them with suitable technology.	Apply
CO.4	Apply the concepts of engineering with advanced technologies to select sampling sites, collect samples and forecast soil, water and air quality.	Apply
CO.5	Carry out sample collection, preserve them, analyze the collected samples and plan suitable monitoring system with advanced software.	Analyze
CO.6	Prepare reports for real time monitored data and suggest possible remediation and rehabilitation measures	Analyze

Text Books:

`					
21CEV	INTEGRATED ENERGY PLANNING FOR SUSTAINABLE	L	Т	Р	С
2.0240	DEVELOPMENT	3	0	0	3
Course Lo	earning Objectives:		1	<u>H</u>	
• To	create awareness on the energy scenario of India with respect to world				
 To understand the fundamentals of energy sources, energy efficiency and resulting environmental 					
im	implications of energy utilisation				
• Fa	amiliarisation on the concept of sustainable development and its benefits				
• R	ecognize the potential of renewable energy sources and its conversion technolog	ies foi	atta	ining	
SU	stainable development				
Unit I	ENERGY SCENARIO				9
Compariso	on of energy scenario – India and World (energy sources, generation mix, consi	 Imptio	n pa	ttern.	T&D
	ergy demand, per capita energy consumption) – energy pricing – Energy securit	•	•		
Unit II	ENERGY AND ENVIRONMENT				9
Conventio	nal Energy Sources - Emissions from fuels - Air, Water and Land pollut	on –	Env	ironm	nental
standards	- measurement and controls				
Unit III	SUSTAINABLE DEVELOPMENT				9
Sustainab	le Development: Concepts and Stakeholders, Sustainable Development G	oal (S	SDG)	- 5	Social
developme	ent: Poverty, conceptual issues and measures, impact of poverty. Globalization	nd Ed	onor	nic g	rowth
- Economi	c development: Economic inequalities, Income and growth.				
Unit IV	RENEWABLE ENERGY TECHNOLOGY				9
Renewabl	e Energy – Sources and Potential – Technologies for harnessing from Solar, W	ind, F	lydro	, Bio	mass
and Ocea	ns – Principle of operation, relative merits and demerits				
Unit V	ENERGY PLANNING FOR SUSTAINABLE DEVELOPMENT				9
National 8	State Energy Policy - National solar mission - Framework of Central Electricit	/ Auth	ority	- Na	tional
Hydrogen	Mission - Energy and climate policy - State Energy Action Plan, RE integr	ation,	Roa	d ma	p for

TOTAL - 45 Periods

ethanol blending, Energy Efficiency and Energy Mix

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the world and Indian energy scenario	Understand
CO.2	Analyze energy projects, its impact on environment and suggest control strategies	Analyze
CO.3	Evaluate the need of Sustainable development and its impact on human resource development	Evaluate
CO.4	Evaluate renewable energy technologies for sustainable development	Evaluate
CO.5	Apply Fathom Energy policies and planning for sustainable development	Apply
CO.6	Create Road map for ethanol blending, Energy Efficiency and Energy Mix model	Apply

21CEVG58 EN	ERGY EFFICIENCY FOR SUSTAINABLE DEVELOPMENT	L	Т	Р	С
		3	0	0	3
Course Learning Objec	tives:				
 To understand th 	e types of energy sources, energy efficiency and environmental imp	olicat	ions	of	ļ
energy utilisation					
 To create awarer 	ness on energy audit and its impacts				
 To acquaint the t 	echniques adopted for performance evaluation of thermal utilities				ļ
 To familiarise on 	the procedures adopted for performance evaluation of electrical util	ities			ļ
To learn the cond	cept of sustainable development and the implication of energy usage	е			ļ
					ļ
Unit I ENERGY AND	ENVIRONMENT				9
Primary energy sources	- Coal, Oil, Gas – India Vs World with respect to energy production	n and	con	sump	otion,
Climate Change, Global	Warming, Ozone Depletion, UNFCCC, COP Start Contents here				
Unit II ENERGY AUD	DITING				9
Need and types of ener	gy audit. Energy management (audit) approach-understanding ei	nergy	/ cos	sts, b	ench
marking, energy perform	ance, matching energy use to requirement, maximizing system efficiency	cienc	ies, (optim	izing
the input energy requiren	nents, fuel & energy substitution, energy audit instruments				
Unit III ENERGY EFF	ICIENCY IN THERMAL UTILITIES				9
Energy conservation ave	nues in steam generation and utilisation, furnaces, Thermic Fluid	Heat	ers.	Insul	ation
and Refractories - Con	nmercial waste heat recovery devices: recuperator, regenerato	r, he	eat p	ipe,	heat
exchangers (Plate, Shell	& Tube), heat pumps, and thermocompression				
Unit IV ENERGY CO	NSERVTION IN ELECTRICAL UTILITIES				9
Demand side manageme	ent - Power factor improvement – Energy efficient transformers - E	nerg	y cor	nserv	ation
avenues in Motors, HVA	C, fans, blowers, pumps, air compressors, illumination systems and	cool	ng to	wers	í
Unit V SUSTAINAB	LE DEVELOPMENT				9
Sustainable Developmer	الـ t: Concepts and Stakeholders, Sustainable Development Goal (S	SDG)	. Glo	baliz	ation
-	Economic development: Economic inequalities, Income ar	-			

TOTAL - 45 Periods

development: Poverty, conceptual issues and measures, impact of poverty,

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand the prevailing energy scenario	Understand
CO.2	Evaluate Familiarise on energy audits and its relevance	Evaluate
CO.3	Apply the concept of energy audit on thermal utilities	Apply
CO.4	Analyze Employ relevant techniques for energy improvement in electrical	Analyze
	utilities	
CO.5	Evaluate Sustainable development on human resource development	Evaluate
CO.6	Apply Sustainable impact on human resource development	Apply

Course Learning Objectives:

- ToimpartknowledgeofthebasicconceptsinDisasterManagement, TypesandCategoriesof
 Disasters the ChallengesposedbyDisastersand theImpactsofDisasters
- Toprovideanunderstandingoftheapproachesto disaster riskreduction
- Tocreate awarenessofthe disaster management Policiesand Legislationin India

Unit I INTRODUCTION ANDTYPES OF DISASTERS

9

Definition: Disaster, Hazard, Vulnerability, Resilience risks severity, frequency and details, capacity,impact,prevention,mitigation.Geologicaldisaster:Earthquakes,landslides,tsunami,mining);Hydr o-MeteorologicalDisasters(floods,cyclones,lightning,thunder-storms,hailstorms,avalanches, droughts, cold and heat waves) Biological Disasters (epidemics, pest attacks, forestfire); Technological Disasters (chemical, industrial, radiological, nuclear) and Man-made Disasters(buildingcollapse,rural andurban fire,transportation accidents,nuclearradiation,radiological,chemicalsandbiologicaldisasters)-mountain andcoastalareas-ecologicalfragility.

Unit II DISASTER IMPACTS

9

Impacts (including social, economic, political, ecological, environmental, health, psycho-social, etc.)Differential impacts: urban disasters, pandemics, complex emergencies, Climate change - hazardlocations- globalandnational disaster trends.

Unit III DISASTER RISKREDUCTION (DRR)

9

Disaster management cycle - its Phases, Culture of safety, prevention, mitigation and preparednesscommunitybasedDRR,Structural-non-structuralmeasures—

riskanalysis, vulnerabilityandcapacityassessment; earlywarningsystems, Post-

disasterenvironmentalresponse(water, sanitation, food safety, waste management, disease control, security, communications); Roles andresponsibilities of community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs) and otherstake-holders.

Unit IV | DISASTERSAND DEVELOPMENT

9

Factors affecting Vulnerabilities, differential impacts, impact of Development projects and environmentalmodifications such as dams, changes in Land-

use, urbanization, etc. sustainable and environmental friendly recovery; reconstruction and development methods.

Unit V DISASTERRISK MANAGEMENTIN INDIA

9

Disaster(Hazardandvulnerability)Profileof India—MegaDisastersof IndiaandLessonsLearnt,Disaster Management Act 2005 – Institutional and Financial Mechanism, National Policy on DisasterManagement, National Guidelines and Plans on Disaster Management; Role of Government (local,stateandnational),Non-GovernmentandInter-GovernmentalAgencies

TOTAL - 45 Periods

Course Outcomes:

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understanddifferenttypesofdisasters,causes andtheirimpactonenvironmentandsociety	Understand
CO.2	Evaluatevulnerabilityand variousmethodsofrisk reductionmeasuresaswell as mitigation.	Evaluate
CO.3	EvaluatetheimpactofdevelopmentprojectsinIndianScenarioanduseappropriatet echnologyandresources	Evaluate
CO.4	Analyze the various vulnerability profiles of disaster and its mitigation activities.	Analyze
CO.5	Analyze the various recovering and restructure processing in natural and manmade disaster	Analyze
CO.6	Carryoutfieldworksrelated to disaster management	Apply

21UCE	974 AIRPOLLUTIONANDCONTROLENGINEERING	L	1	Р	С
		3	0	0	3
Course	earning Objectives:				
	 ToimpartknowledgeontheprincipleanddesignofcontrolofIndoor/particulate/gatantand itsemergingtrends. To giveanoverviewoffactorsaffectingselectionofcontrolequipmentforparticulateantaminants. 				
Unit I	INTRODUCTION				9
Structure	and composition of Atmosphere — Definition, Scope and Scales of Air Pollut	ion -	–So	urces	
and clas	sification of air pollutants and their effect on human health, vegetation, ani	mals	,prop	erty,	
aesthetic	value and visibility- Ambient Air Quality and Emission standard	ds	–Am	bient	,
andstack	samplingandAnalysisofParticulateandGaseousPollutants.				
Unit II	METEOROLOGY				9
Effects	of meteorology on Air Pollution - Fundamentals, Atmospheric stabili	ty, I	nver	sion,	
Windpro	ilesandstackplumepatterns-Atmospheric Diffusion Theories — Dispersion models, Figure 1.0 and 1.0 are the same of the same o	Plum	erise) .	
Unit III	CONTROLOFPARTICULATECONTAMINANTS				9
Factorsa	ffecting Selection of Control Equipment-Gas Particle Interaction-Working principle	,Des	ign	and	
performa	nce equations of Gravity Separators, Centrifugal separat	ors	F	abric	
filters,Pa	ticulateScrubbers,ElectrostaticPrecipitators-OperationalConsiderations.				
Unit IV	CONTROLOFGASEOUS CONTAMINANTS				9
Factors	affecting Selection of Control Equipment — Working principle,	Des	ign	and	
performa	nceequations of absorption, Adsorption, condensation, Incineration, Bio se	crubl	oers,	Bio	
filters —	ProcesscontrolandMonitoring-OperationalConsiderations.				
Unit V	INDOORAIRQUALITY MANAGEMENT				9
Sources	types and control of indoor air pollutants, sick building syndrome type	es	– R	adon	
Pollution	anditscontrol-SourcesandEffectsofNoisePollution-Measurement-Standards-				
Controla	ndPreventivemeasures.				

306

TOTAL - 45 Periods

After the successful completion of the course, Students will be able to,

COs	CO Statements	BT Levels
CO.1	Understand thevarious	Understand

Course Learning Objectives: • Exposure on thetraffic engineeringbasics &statisticsmethodstoanalysisthetrafficsafety. • Knowledge on theinfluencingfactorsand causesofaccidents.	0 3
 Exposure on thetraffic engineeringbasics &statisticsmethodstoanalysisthetrafficsafety. Knowledge on theinfluencingfactorsand causesofaccidents. 	<u> </u>
Knowledge on theinfluencingfactorsand causesofaccidents.	
Idea about the vale of vacidational and is seen ald a since of the content of infrastructure	
 Idea about theroleof roadsafetyinplanninganddesignoftheurban infrastructure. 	
 Exposure about thetraffic managementsystemsforimprovingtheroadsafety. 	
Unit I Fundamentals ofTraffic Engineering	9
Characteristics of Motor vehicle Traffic, Highway Capacity- Applications of Traffic	
ControlDevices-TrafficDesignofParkingFacilities-typeofsurveys-Traffic survey - speed, journey	
time and delay surveys, classified volume count survey, vehicle occupancy survey.	
Hait II Assistant Investigations and Distance are a	
Unit II Accident Investigations and RiskManagement	
Accident Data-Condition and Collision Diagram-Causes and Remedies-Traffic	
ManagementMeasures-AssessmentofRoadSafety,Methods to	
IdentifyandPrioritizeHazardousLocationsandElements,CrashesandCountermeasures,SafetyDesign-	
AccidentReconstruction.	
Unit III Road Safetyin Geometric Design	
Road alignment-Cross section of roads and its elements-roaddesignandequipmentredesigningjunctions	3,
intersection improvements-reconstruction & rehabilitation, traffic control, concepts of	
vehicledesign&protectivedevices.	
Unit IV Urban infrastructureinRoad safety	
Geometric design ofroads-significance ofhorizontal & vertical elements-Role and	
importanceofjunctions:atgradeandgradeseparatedintersections-	
roadsafetyinurbantransport,sustainablemodesand theirsafety.	
Unit V TrafficManagementSystemsforRoad Safety	
Road Safety Audits and Tools for Safety Management Systems, Road Safety Audit	
Process, Approach to Safety, Road Safety Improvement Strategies, ITS and Safety.

21UCE977	SOLID WASTE MANAGEMENT	L	Т	Р	С
2.0020		3	0	0	3
Course Learn	ing Objectives:			-	
•	To impart the knowledge and skill stoid entify and assess the waste storage, collection of the property of t	n,tra	ansfe	r,	
	handlingand disposalmeasures.				
•	Toprovidetheknowledge onissuesofsolid wastemanagement.				
•	Togive anoverviewoflegislation andregulationsofsolid wastemanagement.				
Unit I INTR	ODUCTIONTOSOLIDWASTEMANAGEMENT				9
Need and obje	ctives – waste management hierarchy – Functional elements – Environmenta	al imp	oact	of	
mismanageme properties.	nt – solid waste: Sources, types, composition, quantities, physical, chemical	and I	oloic	gical	
Unit II STO	RAGE,COLLECTION &TRANSFER				9
General consi	derations for waste storage at source - factors affecting storage and	ollec	tion	-	
collection serv	vices – collection system, equipments, time and frequency ofcollection	– la	abou	r	
requirement -	collection routes - preparation of master schedules -Need for transfer o	pera	tion	-	
transfe	r stations – types: Transfer stations –	sele	ectio	า	
oflocation,type	es&designrequirements,operation&maintenance.				
Unit III PRO	CESSING& DISPOSALOFMUNICIPAL SOLIDWASTE				9
Processing tec	hnologies: composting, incineration and pyrolysis. Energy recovery fromsoli	d wa	aste	_	
Bio-methanat	ion.Disposal: Landfill and its introduction – Essentialcomponents – site	sel	ectio	n	
Land fi	lling methods – Leachate analysis and landfill gasmar	age	ment	_	
treatmentandd	sposal.Municipalsolidwastemanagementrules2016				
Unit IV BIO	MEDICALWASTEMANAGEMET& HEALTHASPECTS				9
Biomedical	waste:sourcesand generation— classificationofbiomedicalwaste—ma	nage	emen	t	
technologies. I	Health Aspects: handling, processing, segregation, recovery, recycling and	reu	se o	f	
solid wa	ste. Public involvement and participation in		soli	b	
wastemanage	mentpractices.Biomedicalwastemanagementrules2016.				
Unit V IND	USTRIAL & E-WASTEMANAGEMENT				9
Industrial was	te: sources — types — collection and disposal — control measures -	-recy	/clin	g	
E-waste:sourc	es-types-recycling-disposal.DangersofE-waste.E-WastemanagementRu	les2	016.
