INSTITUTE VISION

To promote excellence in the technical education and scientific research for the benefit of the society

INSTITUTE MISSION

- To provide quality technical education to fulfill the aspiration of the student and to meet the needs of the Industry
- To provide holistic learning ambience
- To impart skills leading to employability and entrepreneurship
- To establish effective linkage with Industries
- To promote Research and Development activities
- To offer services for the development of society through Education and Technology

DEPARTMENT VISION

To achieve excellence in technical education and research in Civil Engineering field for the betterment of the society

DEPARTMENT MISSION

1. Fulfilling the aspiration of the students and needs of the industry by providing quality technical educational experiences.
2. Providing comprehensive learning environment
3. Imparting employability and Entrepreneurial skills
4. Establishing industrial collaborations
5. Promoting Research and Development activities in emerging areas of Civil Engineering
6. Serving the society through quality education, technology and consultancy.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

<i>After few years of graduation our Civil Engineering graduates are expected to:</i>	
PEO I	<i>Demonstrate expertise in offering solutions in Civil Engineering field (Core Competence).</i>
PEO II	<i>Exhibit professional skills to function effectively with ethical principles (Professional and Ethical Skills).</i>
PEO III	<i>Engage in perpetual learning and research with social responsibility (Lifelong Learning).</i>

PROGRAM OUTCOMES (POs)

Students in the Civil Engineering program should, at the time of their graduation, be able to

PO1 : Engineering knowledge

Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2 : Problem analysis

Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.

PO3 : Design/development of solutions

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4 : Conduct investigations of complex problems

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5 : Modern tool usage

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6 : The engineer and society

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PROGRAM OUTCOMES (POs)**P07 : Environment and sustainability**

Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

P08 : Ethics

Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

P09 : Individual and team work

Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

P010 : Communication

Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

P011 : Project management and finance

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

P012 : Life-long learning

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

Civil Engineering graduates will

PSO1: Design, create and maintain safe and cost effective structural systems.

PSO2: Design hydraulics and water supply systems with environmental concerns for sustainable development.

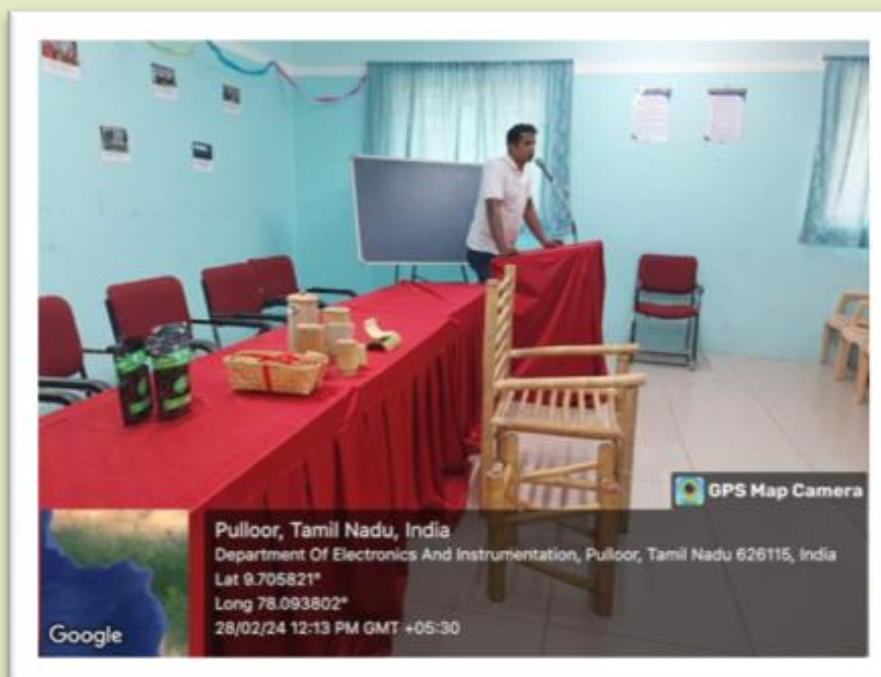

ACTIVITIES DURING THE ACADEMIC YEAR 2023-2024

Guest Lecture on “Applications of Glass Fibre Reinforced Concrete in the Building Construction”

Lecture by Ar.R.Balakumar, Architect and Proprietor, Bharat GRC Industry, Madurai.

Guest Lecture on “Applications of Bamboo in the Building Construction and Interior Design”

**Lecture by Mr.Suthagar Selvaraj, Manufacturere and Trainer,
Arola Bamboo Craft, Madurai.**

Signing of MOU between Yi Madurai – Innovation Vertical and Sethu Institute of Technology Incubation Centre.

**Guest Lecture on “Creativity and Innovation” by
Rtn.L.Ramanathan in association with
CII – Yi Madurai & Yuva of SIT.**

**The Lecture was in alignment to
“Creative Thinking and Innovation” and
“Product Development Project”**

Two Days Workshop for Faculty Members on “Autodesk Fusion 360 – Leading with Generative Design” in SIT.

**“WHY ART IS IMPORTANT” – How it helps the Body,
