We collaborated with The Rotaract Club of DYPUSM and took part in the event KAGZERIA which is an initiative taken to promote the use of paper bags and stop polluting the environment with plastic bags. On 12th of July, our members made paper bags on their own and distributed them to the nearby shops and pharmacies. It was really a very good experience in interacting with common people and creating awareness to them. We got many feedbacks from shop owners and they were very much interested in selling their products in paper bags. In medical shops, the tablets are being sold in paper covers but the other products aren't. Some of them even requested us to provide paper bags to them frequently so that they could avoid plastic bags completely.
